POOLE'S

POOLE'S SEED AND IMPLEMENT CO.
1507-9 PACIFIC AVE.,
TACOMA, WASH.

PARCEL POST RATES

SIZE AND WEIGHT

A Parcel Post package may weigh from four ounces to seventy pounds for the first, second and third zones, and 50 lbs. for all other zones, and must not exceed in size 84 inches in length and girth combined.

Four ounces or less will be charged for at one cent per ounce or fraction thereof, except on books, seeds, plants, bulbs, etc., which are 1c for 2 ozs. up to 8 ozs. for any distance.

SEEDS, BOOKS, ETC.

Seeds, plants and books over 8 ozs. and other 4th class matter over 4 ozs. are charged at pound rates, a fraction being charged as a full pound.

REFERENCE TABLES

Quantity of Seed to Produce a Given Number of Plants and Sow an Acre

	Quantity per acre		Quantity per acre
Artichoke, 1 oz. to 500 plants	6 oz.	Horse Radish Roots	10,000 to 15,000
Asparagus, 1 oz. to 800 plants	1 bu.	Kale, 1 oz. to 5000 plants	4 oz.
Barley	2 to 2½ bu.	Kaffir Corn, in drills	6 to 8 lbs.
Beans, dwarf, 1 lb. to 100 ft. of drill	1 bu.	Kohl Rabi, 1 oz. to 100 ft. of drill	4 lbs.
Pole, 1 lb. to 100 hills	½ bu.	Leek, 1 oz. to 100 ft. of drill	4 lbs.
Beet, garden, 1 oz. to 100 ft. drill	7 lbs.	Lettuce, 1 oz. to 150 ft. of drill	3 lbs.
Mangel, 1 oz. to 75 ft. drill	5 lbs.	Millet, for seed, 12 lbs., for hay	20 lbs.
Broccoli, 1 oz. to 2000 plants	4 oz.	Melon, Musk, 2 oz. to 100 hills	2 to 3 lbs.
Brussels Sprouts, 1 oz. to 2000 plants	4 oz.	Water, 4 oz to 100 hills	2 to 4 lbs.
Broom Corn, in drills	15 lbs.	Nasturtium, 1 oz. to 20 ft. of drill	—
Buckwheat	½ to 1 bu.	Oats	2 to 3 bu.
Cabbage, 1 oz. to 2000 plants	4 oz.	Okra, 1 oz. to 100 ft. of drill	8 lbs.
Carrot, ½ oz. to 100 ft. drill	3 lbs.	Onion Seed, for sets	60 to 85 lbs.
Cauliflower, 1 oz. to 3000 plants	3 oz.	1 oz. to 150 ft. of drill	4 to 5 lbs.
Celery, 1 oz. to 5000 plants	4 oz.	Onion Sets, 1 qt. to 40 ft. of drill	8 bu.
Cheat	2 bu.	Parsnips, 1 oz. to 150 ft. of drill	3 lbs.
Chicory	4 lbs.	Parsley, 1 oz. to 150 ft. of drill	3 lbs.
Clover, Alsike and White	6 to 8 lbs.	Peas, Field	2 bu.
Alfalfa	15 to 20 lbs.	Garden, 1 lb. to 100 ft. of drill	1 to 2 bu.
Crimson Trefoil	10 to 15 lbs.	Pepper, 1 oz. to 1000 plants	—
Red	10 to 12 lbs.	Pumpkin, ½ lb. to 100 hills	3 to 4 lbs.
Collards, 1 oz. to 2000 plants	4 oz.	Radish, 1 oz. to 100 ft. of drill	10 lbs.
Corn, Pop (shelled)	8 to 10 lbs.	Rape	3 to 5 lbs.
Sweet or Field, hills	12 to 20 lbs.	Rye	1½ to 2 bu.
Meadow Fescue	1 bu.	Salsify, 1 oz. to 100 ft. of drill	6 lbs.
Mixed Lawn	5 to 6 bu.	Speltz	100 lbs.
Red Top	2 bu.	Spinach, 1 oz to 100 ft of drill	8 lbs.
Red Top, solid seed	12 to 15 lbs.	Sugar Cane in drills	10 lbs.
For sowing, drills	2 bu.	Sunflower	8 lbs.
Cress, ¾ oz. to 100 ft. of drill	1 lb.	Squash, Summer, 4 oz. to 100 hills	3 lbs.
Cucumber, 1 oz. to 100 hills	2 to 3 lbs.	Winter, 8 oz. to 100 hills	4 lbs.
Egg Plant, 1 oz. to 2000 plants	4 oz.	Timothy	12 to 15 lbs.
Endive, ¼ oz. to 100 ft. of drill	4 lbs.	Tomato, 1 oz. to 2000 plants	4 oz.
Flax, broadcast	¾ bu.	Tobacco, 1 oz. to 4000 plants	3 oz.
Grass, Blue, Kentucky	2 bu.	Vetches	2 bu.
Grass—Orchard, Perennial, Rye, Red Top	—	With grain	1 bu. each
Fowl Meadow, Wood Meadow	2 bu.	Wheat	1½ to 2 bu.

When and How to Order

USE ORDER BLANK in the front of your Catalog, carefully filling out the blank spaces at the top for shipping directions. Be sure to sign your name.

PRICES—The prices named in this catalog are those prevailing at the time the catalog goes to press and are subject to market changes in value. Your order will be figured at the price prevailing at the time same is received and where lower you will be protected and refund made according to price. As prices usually advance on many items, toward the planting season, it will be to your advantage to order early.

OUR TERMS ARE STRICTLY CASH WITH ORDER where arrangements for credit have not been previously made.

 **Send MONEY** by Postoffice or Express Money Order, Bank Draft or Registered Letter. Postage stamps will be accepted for small amounts. Money sent in any other way is entirely at sender's risk.

NOTE CAREFULLY that seeds in packets, ounces and quarter pounds are **postpaid**; all other items are F. O. B. Tacoma, Wash., unless the price is stated otherwise, and money should be sent to cover transportation if sent to a station without an agent or if sent parcel post, balances will be promptly returned. A compliance with this will save expense and annoyance and insure quicker delivery. **Advise how you want your goods shipped.**

SPECIAL QUOTATIONS ON LARGE ORDERS. Any dealer, market gardener, institution or individual wishing seed in large quantities, is requested to mail us a list of what is wanted, and we will promptly return it with the very lowest market prices. **A letter of inquiry may save you dollars** if you want to buy in quantity. If in need of something pertaining to agriculture not herein listed, write us before ordering elsewhere.

EXPRESS AND FREIGHT. Seeds sent by freight or express means that we deliver the goods to the express or railway company. The purchaser pays all transportation charges on goods. On moderate sized orders we advise express shipment rather than freight. Upon delivery of goods to transportation company, a sale is completed. In event of loss or damage to goods in transit the purchaser must have notation of such loss placed upon his receipt, and may then file claim for loss at his station, or may send the necessary papers to us when we shall gladly enter claim for him, remitting to him as soon as the claim is paid. Remember that our responsibility ceases on delivery in good order to the transportation company, and it is therefore imperative that every purchase be carefully examined for loss or damage before receiving it.

WE DO NOT GUARANTEE REPLACEMENT OF GOODS SENT BY MAIL. An additional remittance of five cents will insure any mail package.

PREPAY STATIONS. When you send in orders to go by freight or express be sure that you add money enough to pay freight charges if your station is a prepay point, which is always the case where there is no regular agent.

COMPLAINTS OR PRAISES. If you are well pleased with our goods and the manner of doing business, tell everyone. If you are not, tell us, so we can please you. Our best efforts will be put forth in filling all orders carefully and promptly in a way that will please you.

KEEP A COPY OF YOUR ORDER. Check goods when received. We use the greatest care in filling, checking and packing orders, but in spite of all, mistakes may occur. Should any happen in your order, advise us promptly, giving order number, and same will be promptly rectified. Do not return goods until you hear from us.

PRICES—*In these days of advancing prices, it is with pleasure that we call your attention to our pre-war prices on our seed packet goods. This is not done by lessening the size of the packet nor of reducing the quality of the seeds, for we use none but the best seeds in our packets. Our seeds are all tested for purity and germination and only those seeds that are above the standard are used. Our seeds are not sold on commission, therefore we do not have a quantity of unsold seeds returned to us or carried over. Packets are put up fresh each season and you can make no mistake in using POOLE'S Quality Seed.*

SEED DISCLAIMER

All orders are accepted, all shipments made, subject to the following disclaimer, to-wit:

While we exercise the greatest care to have all Seeds pure and reliable, and all Bulbs, Plants and Nursery Stock true to name, we do not give any warranty, express or implied, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms and conditions, they must be returned at once, and the money that has been paid for the same will be refunded.—POOLE'S SEED & IMPLEMENT CO.

VEGETABLE SEEDS

We catalogue only the very best varieties of both the newer and the older strains, those that are especially adapted to the peculiar conditions on the Pacific Coast.

Culture—Sow the seed thinly in rows 1 foot apart in

ASPARAGUS

April or May (4 or 5 lbs. to the acre), and keep down all weeds. To secure strong, healthy plants, thin the seedlings to 3 or 4 inches in the rows, saving only the strongest. The one-year-old plants should be set out in spring in rich, sandy loam, dug 18 inches deep, into which has been worked plenty of well-rotted manure. If a stiff clay is all that can be had, add plenty of sand and sifted coal-ashes to loosen it up, and see that it is well under drained. In planting for private use, set out in beds 5 feet wide, three rows in a bed, the outer being each 1 foot from the edge, and allow 18 inches between the rows; set the plants from 4 to 6 inches below the surface. If set out in autumn, top-dress with 6 inches of manure. For market, on a large scale, set out 4 by 1½ feet. Every fall apply a good dressing of coarse manure, after the tops have been cut, and in spring fork in. Never cut too closely. The roots need the benefit of some foliage during the year, else they will weaken and die. Slugs are easily destroyed by applying air-slaked lime or paris green. **Asparagus from seed does not always come true to name.**

Colossal—The approved standard sort. The famous *Argenteuil* of the French is identical with it. Oz., 15c; ¼-lb., 35c; 1 lb., \$1.00.

Palmetto—Of southern origin; a very desirable, bright green Asparagus. Oz., 15c; ¼-lb., 35c; 1 lb., \$1.00.

Columbian Mammoth—Very large shoots. Oz., 15c; ¼-lb., 35c; 1 lb., \$1.00.

All 5 cents per packet.

Palmetto—2-year-old roots. Doz., 25c; 50, 75c; 100, \$1.25.

BEANS

CULTURE—About the first of May, if the ground is perfectly warm, select a warm, dry, sheltered spot, dig and manure slightly; make drills 2 inches deep, and 18 inches to 2 feet apart; drop the beans 3 inches apart in the drills, and cover not more than 2 inches deep. Hoe well in dry weather to keep down the weeds. Sow every two weeks for a succession. One quart to 100 feet of drill; one bushel to the acre, in drills.

DWARF OR BUSH—YELLOW PODDED

When ordering Beans by mail, add to cover postage.

HUMOGERM INOCULATION FOR BEANS

Will increase your crop and Build up Your Soil. We have it.

See Page 40

BEANS—Continued

DWARF BUSH—YELLOW PODDED

Improved Golden Wax—One of the most popular garden varieties in cultivation. Pods are long, nearly straight, broad and flat, and golden-yellow; seed white, more or less covered with two shades of purplish red. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Wardwell's Kidney Wax—A hardy, strong growing vine, handsome, long podded variety. A few days later than Golden Wax; pods long, golden-yellow, brittle and entirely stringless; seeds white, with dark markings about the eye. Market gardeners find this bean one of the most profitable. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Prolific Black Wax—An improvement on the old Black Wax or Butter Bean. Very vigorous and prolific; pods fairly long, golden-yellow, very brittle, and stringless; seed black. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Davis Kidney Wax—The most hardy and productive wax bean. The pods are long, white, straight, crisp and tender. The vine is rustless and very vigorous, bearing the pods in clusters. For canning this is unexcelled on account of purity of the pod and bean. It is a remarkably good variety for shipping; seed white, and on this account is desirable for a shelled bean in winter. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

DWARF OR BUSH—GREEN PODDED KIND

Stringless Green Pod—The finely shaped, long green pods are absolutely stringless, and are ready to market two weeks earlier than any other green-podded bean. It is of immense value, not only to the market gardener, but also for those who seek early beans of a rare quality for the home table. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Dwarf Horticultural, or "Cranberry Bean"—Grows erect, strong and shrubby, and is very prolific. The bean is highly prized, green shelled. It is rather large, plump, and beautifully mottled yellow and red; one of the most delicious and desirable beans and a great favorite with market gardeners. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Refugee, or Thousand to One—Of great value on account of its hardness, vigorous growth and wonderful productiveness. It is not excelled by any other variety as a snap bean, and is considered the best for pickling or canning. Beans small, dark purple, veined brown. Pods of perfect form, dark green; veined purple. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Canadian Wonder—This splendid bush bean is the largest, most prolific of the green-podded sorts, and is entirely stringless in its early development. Comes a little later than the New Stringless Green Pod, but continues in bearing throughout the season, and is excellent shelled green. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Early Long Yellow Six Weeks—A long podded green variety. Plants strong and vigorous. Full and flat pods. Excellent for market gardeners. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Broad Windsor—Stalk erect, strong and shrubby. The bean is large, broad and flat; should be planted early and is best green shelled. An English variety. **Pkt., 10c; lb., 30c.**

Castor Bean—Used for medicinal purposes and by some claimed to keep moles away. Castor beans are very ornamental, the plants and foliage being large and tropical in appearance. **Pkt., 10c; lb., 50c.**

BURPEE'S BUSH LIMA—A bush form of the large, flat Pole Lima, growing only 18 to 20 inches high. The beans are borne very profusely. **Pkt., 10c; lb., 40c.**

Lady Washington Field Bean—An improvement over the old Navy Bean; is earlier, larger and more productive. **Pkt., 10c; lb., 25c; 10 lbs., \$2.25.**

POLE OR RUNNING BEANS

Kentucky Wonder—This grand pole bean continues to be a great favorite. It is perfectly suited to this climate. Medium early, and enormously productive. Very large, long pods that cook tender and melting, and when once matured the green shelled beans are excellent. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Dutch Case Knife—A little later. Has large, green flat pods; good for "snap" or shelled green. The large Lima beans are too late for our climate, and the Dutch Case Knife is the nearest approach to them of any here. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Scarlet Runner—Especially used as a flowering bean. **Pkt., 10c; lb., 35c.**

Lazy Wife—Pods are from four to five inches in length, produced in large clusters in great abundance. Dark green, thick, fleshy and stringless; of unusually rich flavor. Dry beans, pure white, excellent for winter use. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Horticultural Pole—Good as a snap or as a shell bean; one of the old standards and still very popular. Pods short, pale green, becoming splashed with brownish red. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Kentucky Wonder Wax—The Pride of the Garden. It commences to bear when scarcely higher than the average bush variety. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

OREGON POLE LIMA

The Only Lima Bean that Will Thrive in Our Cool Climate. Price, **Pkt., 10c; lb., 30c.**

BEET

CULTURE—Sow as early in the spring as the ground can be worked (one ounce to 50 feet of drill, five or six pounds to the acre), and every two weeks after for a succession up to the first week of July. For general crop, sow about the middle of May. The soil should be light, sandy loam, well enriched with stable manure and plowed and harrowed until very fine. Sow in drills 1 foot to 15 inches apart, and when well up, thin to from 4 to 6 inches. The young beets, with their tops, pulled out of the row, are excellent used as a spinach. For this purpose, sow frequently and use when of the size of a hickory nut.

Extra Early Egyptian—The best variety for forcing, and for market gardeners, being very early with small tops. Roots very dark red, rounded on top, but flat beneath, with very small tap roots. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

Detroit Dark Red Turnip—A fine beet for bunching for market; tops exceptionally small and uniformly upright. The roots are perfect turnip shape with small tap-roots. One of the deepest red beets. Quality is of the finest; sweet and tender, best beet for home gardens. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

Early Eclipse—One of the best early sorts. It possesses all the qualities requisite in a first-class beet, and is of a uniform, globular shape. The roots are a bright, glossy red, fine-grained and delicious. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

Crosby's Egyptian—Very popular early beet, as it reaches the desired size quickly. The beets are of good size, rather flat than round, and flesh dark. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

Crimson Globe—Globular shape; flesh rich, deep crimson; tender and sweet. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.25.

Long Blood—The root is smooth and handsome, flesh brilliant in color and excellent quality. Good keeper. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

STOCK BEETS OR MANGEL-WURZEL

YELLOW GIANT

SLUDSTRUP

GOLDEN TANKARD

See next page for list of varieties and description.

WE PAY POSTAGE ON ALL GARDEN SEEDS BOUGHT BY PACKET OUNCE OR ¼-LB.

STOCK BEETS OR MANGEL-WURZEL

CULTURE—As all Mangels require a deep soil in order to grow well, plow subsoil at least 1 foot to 18 inches. Sow in May or June, in rows 18 inches to 2 feet apart, and thin to 8 inches in the rows. Young plants may be transplanted to fill up vacancies. On 5 pounds or over, 5c pound less.

Danish Sludstrup—An improved variety, considered one of the best. Awarded first class certificate. Color reddish-yellow and of a distinct type. It is very hardy, grows well above ground; is easily pulled and very nutritious. Pkt., 5c; oz., 10c; ¼-lb., 20c; lb., 50c.

Improved Mammoth Long Red—Very popular and much used. A large and heavy cropper. Dark red skin, with whitish flesh; grows one-half or more above the surface; roots quite regular; attain a very large size. Pkt., 5c; oz., 10c; ¼-lb., 20c; lb., 50c.

Golden Tankard—An enormous yielder of weight per acre, and at the same time very nutritious; flesh deep yellow; of fine shape, growing largely above soil, thus being easily harvested. Pkt., 5c; oz., 10c; ¼-lb., 20c; 1 lb., 50c.

Yellow Giant, Intermediate or Gate Post—Roots very large, growing over one-half out of the ground; flesh white, sweet and tender; tops bright green, comparatively small; neck small, short. Its fine flesh never becomes woody and the crop is easily harvested. Pkt., 5c; oz., 10c; ¼-lb., 20c; lb., 50c.

Giant Half Sugar Mangel—A new variety, very much more valuable for feeding purposes than the old sorts, it being very much richer. Yields as much per acre as the best Mangels, and twice as much per acre (bulk of roots) as the rich sugar beet. Roots long and thick and large, very smooth, with few rootlets and creamy white in color, with medium-sized top. Pkt., 5c; oz., 10c; ¼-lb., 20c; lb., 50c.

French White Sugar—The sugar beet most generally grown, as it combines, with heavy yield, from 10 to 13 per cent of sugar. Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 75c.

Klein Wanzleben Sugar—This is the standard variety grown commercially for the production of sugar. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c.

SWISS CHARD

Swiss Chard "Lucullus"

BROCCOLI

CULTURE—Sow early sorts as soon as the ground can be worked in the spring, in shallow drills, drawn 3 or four inches apart. Plant out 2 feet apart each way when the plants are about 4 inches high. Cultivate the same as cabbage, in rich soil.

Early White—Resembles cauliflower; very white and sure to head. Pkt., 5c; oz., 75c; ¼-lb., \$2.00.

Mammoth White—A valuable variety with large, white heads, firm and of good flavor. Pkt., 5c; oz., 75c; ¼-lb., \$2.00.

New Savoyed Leaf "LUCULLUS"—An improved variety of "Swiss Chard," growing about two and a half feet high. The heavy stalks are over an inch thick and bare for more than a foot of their length. The leaves make the finest of "greens." By cutting back the leaves close to the ground tender shoots spring up quickly. These or the mid-rib are very delicious cooked as asparagus. Swiss chard is hardy, easily grown and should be in every garden. It is one of the most delicious of all vegetables. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

BRUSSELS SPROUTS

CULTURE—Sow in May, in the same manner as cauliflower, and transplant in July, 1 foot apart in the rows which should be 1½ feet apart. The Brussels Sprout is, without exception, the very best winter vegetable that can be grown.

DWARF IMPROVED

A carefully grown strain, very hardy and giving compact, round sprouts of large size and good quality. Pkt., 5c; oz., 35c; ¼-lb., \$1.10.

CHICORY

Witloof—Known in restaurants as French Endive. Sown in May and June in drills. Transplant or thin to 6 inches; treat as endive, except that in late summer or fall it should be gradually banked up like celery. The stalks, when blanched, make a delicious salad. It is also used the French as a boiled vegetable. **Pkt., 5c; oz., 35c; ¼-lb., \$1.00; lb., \$3.00.**

CHERVIL

Curled—This plant is used for flavoring soups and salads, and has a strong perfume. **Pkt., 5c; oz., 25c; ¼-lb 80c.**

CORN SALAD

Petticus, or Lamb's Lettuce—A refreshing salad, used extensively in winter and spring as a substitute for lettuce. It is often cooked like spinach. Sown in drills one foot apart, in the spring or fall. On the approach of cold weather cover over with straw or coarse litter. **Pkt., 5c; oz., 30c; ¼-lb., \$1.00.**

COLLARDS

True Georgia—Used as "Greens" mainly in the South and West. As the leaves are pulled off, others grow in their places. **Pkt., 5c; oz., 20c; ¼-lb 65c.**

CABBAGE

CULTURE—The requisites for complete success are: First—Good seed. There is no other vegetable where the seed has so much influence on the quality of the product, and gardeners should always use the best procurable. Second—Rich, well prepared ground. Third—Frequent and thorough cultivation. A heavy moist and rich loam is most suitable, which should be highly manured and worked deeply. Cabbage is universally grown and specific directions regarding the time and method of planting applicable to all localities cannot be given. In general, the early sorts should be sown very early in hot beds, hardened off by gradually exposing to outside air, and as early

as the ground is in good condition, transplanted, setting 18 to 36 inches apart, according to size of variety. The late Autumn and Winter varieties may be transplanted when four to six inches high to get them up.

Early Jersey Wakefield—The earliest and hardest heading of first early cabbages. Most gardeners depend upon it for the bulk of their extra early crop. Its exceeding hardness not only to resist cold but other unfavorable conditions, insures the greatest likelihood of profitable and satisfactory results.

Our stock is grown and selected with the greatest care there is none better, and few as good. Head conical, very compact, solid and of excellent quality. The thick, stout leaves and compact habit of this variety make it the best sort for very early setting. **Highest quality seed. Pkt., 5c; oz., 30c; ¼-lb., \$1.00; lb., \$3.00.**

Copenhagen Market—A new extra early globe-shaped Cabbage slightly flattened. The large solid heads are very uniform, with few other leaves, keeps well and stands handling. **Copenhagen Market** originated in Denmark, where it is the favorite market variety, and we recommend it to our customers as the best early round head. Gardeners should give it a trial. Our stock is direct from the originator. **Pkt., 5c; oz., 40c; ¼-lb., \$1.25; lb., \$4.00.**

Early Winnigstad—A desirable variety, having conical, solid heads; a sure header under almost any condition, and keeps better than most early varieties. Fine appearance and of excellent quality. **Pkt., 5c; oz., 30c; ¼-lb., \$1.00; lb., \$3.00.**

Large Wakefield or Charleston—The heads are of similar form, though not so pointed, but of equal solidity as the original Jersey Wakefield, while they grow half again as large, reaching full size about ten days later. **Pkt., 5c; oz., 30c; ¼-lb., \$1.00; lb., \$3.00.**

Early Summer—Large, solid, round, flattened, compact heads of excellent quality; the plant has a peculiar bluish tinge. **Pkt., 5c; oz., 30c; ¼-lb., \$1.00; lb., \$3.00.**

SPRAY

BLACKLEAF "40" TO KILL CABBAGE APHIS

Premium Late Dutch—Best for winter use; round or slightly flattened heads; stands freezing well. A good keeper and of excellent quality. **Pkt., 5c; oz., 30c; ¼-lb., \$1.00; lb., \$3.00.**

CABBAGE—Continued

Danish Ball Head or Cannon Ball Long Stemmed—This is one of the hardest cabbages in cultivation and endures both frost and drouth that would destroy other varieties.

Plants rather long-stemmed, but compact; leaves very smooth, but thick; head of medium size, round and very solid, being the hardest heading cabbage we know of, and of the very best quality. Matures quite late, keeps well, and is considered by many the best cabbage to hold over for Spring markets. Pkt., 5c; oz., 40c; $\frac{1}{4}$ -lb., \$1.25; lb., \$4.00.

Danish Ballhead, or Cannon Ball—Short stem. Very round, solid winter sort, largely grown in Denmark for the London market. A fine shipper. Pkt., 5c; oz., 40c; $\frac{1}{4}$ -lb., \$1.25; lb., \$4.00.

Red Drumhead—A large, very solid, late red cabbage, much used in pickling. Good keeper and a favorite with the ladies. Pkt., 5c; oz., 45c; $\frac{1}{4}$ -lb., \$1.35; lb., \$4.50.

Drumhead Savoy—This is the finest of the Savoy cabbages, and a general favorite; of excellent flavor, surpassing that of any other late cabbage. Stands freezing well. Pkt., 5c; oz., 40c; $\frac{1}{4}$ -lb., \$1.25; lb., \$4.00.

CARROTS

CULTURE—A sandy loam is the best soil for the carrot, but any good land, if thoroughly and deeply worked, will produce satisfactory crops. Sow as early in the Spring as the ground is fit to work, though good crops may be grown as late as June 15. For table use, sow the smaller kinds in rows 16 to 18 inches apart, and for field culture prepare the ground thoroughly and sow in drills 18 to 24 inches apart. Cover one-half to one inch deep and see to it that the soil is well firmed above the seed.

Orange, Improved Long—Popular for farm use on deep, mellow soil. Our stock is an improvement obtained by years of careful selection of the best formed and deepest colored roots, which grow to a large size, some specimens averaging twelve inches in length. Enormous crops can be grown under fair culture; one of the best varieties for feeding stock. Pkt., 5c; oz., 10c; $\frac{1}{4}$ -lb., 30c; lb., \$1.00.

Danver's Half Long—Grown largely on account of its productiveness and adaptability to all classes of soil. Tops, medium sized, coarsely divided. The smooth, handsome roots are of medium length, tapering uniformly to a blunt point; flesh, sweet, crisp, tender; deep orange in color. Although the roots of this variety are short, they produce as large bulk as the longer field sorts and are more easily harvested. Pkt., 5c; oz., 10c; $\frac{1}{4}$ -lb., 30c; lb., \$1.00.

Early Scarlet Horn—The best early kind for general use. It is larger than the forcing variety, but fully as good in quality, and produces a much larger crop. Pkt., 5c; oz., 15c; $\frac{1}{4}$ -lb., 40c; lb., \$1.25.

Oxheart—A thick carrot, five or six inches long and very blunt at the lower extremity. It grows very rapidly and the root attains a weight of more than a pound. It is tender and of good flavor. Pkt., 5c; oz., 10c; $\frac{1}{4}$ -lb., 30c; lb., \$1.00.

Chantenay—The market gardener's favorite. Tops, medium sized; necks, small; roots, tapering slightly, but uniformly stump-rooted and smooth; color, deep orange red; flesh, very crisp and tender. Although this is a medium early sort, it furnishes roots of usable size as early as any; is a heavy cropper, and is undoubtedly one of the best for both the market and private garden, while its great productiveness makes it very desirable as a field sort. Pkt., 5c; oz., 10c; $\frac{1}{4}$ -lb., 30c; lb., \$1.00.

YELLOW GIANT, Specially Adapted to Moist, Heavy Soils—This new carrot originated at the Sydney, Australia, Experimental Station, and has proved itself to be the earliest and most productive stock carrot offered to date. It is a half long variety, with an immense broad shoulder. The carrot penetrates less than one-half the depth into the ground, which saves about one-half the expense of harvesting the crop. The color is bright yellow, and is perfection itself for giving the proper color to butter. Every dairyman who wants a big crop of carrots of the right quality and easy of culture should plant our Yellow Giant. Pkt., 5c; oz., 10c; $\frac{1}{4}$ -lb., 35c; lb., \$1.25.

Large White Belgian—Extensively grown for stock feeding; very productive. Grows so much above the ground that the entire crop can be pulled by hand. Pkt., 5c; oz., 10c; $\frac{1}{4}$ -lb., 30c; lb., \$1.00.

WE PAY POSTAGE ON ALL GARDEN SEEDS BOUGHT BY PACKET OUNCE OR $\frac{1}{4}$ -LB.

CAULIFLOWER

CULTURE—The same as for cabbage, except that extra manure and plenty of water will pay upon cauliflower. If the soil be dry, water frequently, and, if the plants have a heavy mulch of hay or straw, it will keep the soil moist, and they will not suffer from drought. The early kind should be strong enough to plant out not later than the middle of April; the late kinds may be planted out the same time as cabbage.

Early Snowball—This variety is much in demand by market gardeners for main crop. Its earliness, compact habit, large-sized heads and snow-white color recommend it to every grower as a variety of special merit. We have an extra selected stock of this sort, and recommend it with the greatest confidence.

Pkt., 15c; ¼-oz., 75c; ½-oz., \$1.40; oz., \$2.50.

Poole's Mt. Tacoma Cauliflower—The earliest of all. Produces large, heavy, solid, white heads of finest quality. Undoubtedly the best variety. **Pkt., 25c; ¼-oz., \$1.25; ½-oz., \$2.25; oz., \$4.00.**

DANISH GIANT—DRY WEATHER CAULIFLOWER

Danish Giant is an early, large, solid white Cauliflower that can successfully withstand a drouth that would prove fatal to other varieties and will thrive splendidly in dry sections, being peculiarly adapted to their growing conditions, but like all cauliflower must have rich soil and cultivation to give best results. **Danish Giant** can also be grown under moist conditions and is a dependable market variety. **Pkt., 15c; ¼-oz., 75c; ½-oz., \$1.40; 1oz., \$2.50**

LARGE ALGIERS

A valuable late sort, sure to head, of the best quality and very popular with market gardeners everywhere. Plants large, but of upright growth, the leaves protecting the heads so that they will endure, uninjured, a frost that would ruin other sorts. One of the very best of the late varieties. **Pkt., 10c; ¼-oz., 40c; ½-oz., 75c; oz., \$1.35.**

AUTUMN GIANT

The heads are white, large, compact and thoroughly protected by foliage. **Pkt., 10c; ¼-oz., 40c; ½-oz., 75c; oz., \$1.35.**

CRESS

Curled or Pepper Grass—This salad is much used with lettuce, to which its warm, pungent taste make an agreeable addition. The seed should be sown in drills about 16 inches apart, on very rich ground, and the plants well cultivated. It may be planted very early. **Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.50.**

True Water

One of the most delicious of small salads, and should be planted wherever a suitable place can be found. The seed should be sown and lightly covered in gravelly, mucky lands, along the borders of small, rapid streams. Under favorable conditions they increase very rapidly by self-sown seed and extension of the roots. **Pkt., 5c; oz., 60c; ¼-lb., \$2.00.**

CELERY

CULTURE—Sow the seed early, about February, in a hot-bed or cold frame. When three inches high, transplant, setting them four inches apart. When grown six inches, and fine, stocky plants, set in richly manured, deep soil, in rows three and a half feet apart and about nine inches from plant to plant. Water if dry weather follows transplanting. During the next two months all the attention that is required is to keep down the weeds. Blanch by placing boards along the rows, or earth up a little, and continue doing so at intervals until only the tops of the leaves are visible late in Autumn. **Never hoe up the earth when plants are wet.** One ounce of seed produces about six thousand plants.

White Plume, the Leading White Celery

—A handsome, crisp sort, of very easy cultivation. Naturally its stalks and portions of its inner leaves and heart are white, so that by closing the stalks either by tying or by simply drawing the soil up against the plant and pressing it together, the work of blanching is completed without the troublesome process of "banking" or "earthing up." It is the earliest celery known. **Pkt., 5c; oz., 25c; ¼-lb., 75c; lb., \$2.50.**

Planet Jr. Drills and Cultivators

A Planet Jr. Seeder will soon save enough seed to pay for itself; gives a better stand and makes cultivation easy. **Saves time and money.**

DON'T practice false economy by buying low-priced seeds. We sell High Grade tested Seeds.

Early Snowball

CELERY—Continued

White Plume

Golden Yellow Self-Blanching—This is no doubt the best celery for early spring market use. Plants of a yellowish green color when young, but as they mature the inner stems and leaves turn a beautiful golden yellow, which adds much to their attractiveness and makes the work of blanching much easier. French grown. **Pkt., 10c; oz., 50c; ¼-lb., \$1.75.**

Winter Queen—This is without doubt the most valuable variety of celery for winter and spring use ever introduced. Has double the amount of heart of any known celery. The plant has a fine appearance, of compact growth, and blanches to a beautiful cream-white. Ribs perfectly solid, crisp and a delicious nutty flavor.

Stored for winter or spring use, it is an excellent keeper and when taken out the blanched stalks will be firm and crisp; entirely free from strings; brittle and of sweet flavor. **Pkt., 5c; oz., 25c; ¼-lb., 75c; 1b., \$2.50.**

Giant Pascal—Largest variety grown; of fine nutty flavor; very easily blanched. **Pkt., 5c; oz., 25c; ¼-lb., 75c; 1b., \$2.50.**

Celery Seed—For flavoring. **Oz., 10c; ¼-lb., 20c; 1b., 65c.**

CELERIC

TURNIP ROOTED CELERY

Large, Smooth Prague—An improved form, producing large smooth roots, which are nearly round. **Pkt., 5c; oz., 25c; ¼-lb., 75c.**

With vegetables at such high prices why not plant more of a garden? What is your back yard worth to you?

SWEET CORN

CULTURE—Corn should not be planted until the ground is warm, as the seed will rot in cold damp soil, or if planted too deep. Late April is early enough for the first plantings and for succession plant every two weeks through May and June. Cover the first planting very lightly, increasing the depth a little for the later plantings. For the Dwarf Early varieties, rows should be three feet apart; for later large varieties, four feet, and the hills two to three feet in the rows.

Sweet or Sugar varieties are used both for table and stock feeding, some of the large later sorts being preferred for silos and fodder.

Field Varieties are grown for fodder and for ensilage in the Pacific Northwest more than for grain, but of recent years improved early varieties have given good results and splendid crops are reported from many sections where it was thought corn could not be grown.

White Cob Cory—An improvement on the Red Cobbed Cory, as well as being equally early. The ears are larger, and it has the further advantage of having both a white cob and white grain. A splendid market garden variety, and excellent for the table. **Pkt., 10c; 1b., 30c; 10 lbs., \$2.50.**

Early White Cory, Mammoth—The stalks are no larger than those of the White Cob Cory, but each stalk furnishes two or more large, fine-shaped ears, which are fit for use before those of most other sorts. The ears are 12-rowed, very symmetrical and handsome. The grain is large, broad, very white, and of remarkably good quality. **Pkt., 10c; 1b., 30c; 10 lbs., \$2.50.**

Early Evergreen—An improvement on Stowell's similar in appearance and general character, but a week or ten days earlier, and remaining fit for use somewhat later than that well-known sort; equal to Stowell's in all other respects. **Pkt., 10c; 1b., 30c; 10 lbs., \$2.50.**

(Corn continued next page)

We Pay Postage on All Seeds Bought by Package, Ounce or Quarter-Pound

SWEET CORN—Continued

GOLDEN BANTAM

GOLDEN BANTAM—It is the sweetest and most deliciously flavored sweet corn that has been grown, and has no equal for the home garden or early market. In flavor it is equaled by none.

The ears are short, thick, and compactly filled with large, plump, creamy-yellow kernels, which become golden-yellow as they ripen. The stalks are of dwarf habit, sturdy and very productive. It is one of the hardiest varieties, may be planted early, and is especially adapted to the Northwest. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Black Mexican—This sweet corn, when young, cooks remarkably white, but the ripe grain is black. It is an excellent late variety. The stalks grow about six feet high, and the ears about eight inches long. The kernels are tender, sweet and delicious. **Pkt., 10c; 1 lb., 30c; 10 lbs., \$2.50.**

Peep-o'-Day—One of the earliest; very sweet and of delicate flavor. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Early Minnesota—This old and deservedly popular variety is one of the best early sorts for the market and private garden. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Country Gentleman—Valued for its richness of flavor and productiveness, having 3 to 4 good ears to the stalk, all extra large, with exceedingly deep kernels. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Stowell's Evergreen—Remarkable for remaining a long time in a fresh condition, suitable for the table. Hardy and productive, tender and sugary, and the best late variety for general use.—**Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

Add Postage on Above if Wanted by Mail.

FIELD CORN

Pride of the North, or Yellow Dent—Recommended after repeated tests by the Agricultural College, as the best for Washington, Eastern Oregon and Idaho. A quick growing dent variety, thriving well where the Summers are not very long. Bright golden color. **Lb., 15c; 10 lbs., \$1.00.**

Wisconsin White Dent—Wisconsin White Dent is a large, handsome White Dent, extremely early and matures perfectly, and is the best White Dent Corn for Washington and Oregon. **Lb., 15c; 10 lbs \$1.00.**

Write for Prices on Larger Quantities.

Minnesota No. 13, Yellow Dent—A variety of great promise, being the earliest of the yellow dent corns and reported to

be the heaviest yielding. Producing splendid large ears, closely filled from end to end with bright yellow kernels. Has rather a thick cob and the shelled grains have a tendency to irregularity. **Minnesota No. 13** will average 7 feet high and being a rapid, vigorous grower, with heavy foliage, makes a fine fodder corn. Will mature in 90 days under favorable conditions. **Lb., 15c; 10 lbs., \$1.00.**

GOLDEN GLOW

Prize winner for Wisconsin. Sixteen to twenty rows, deepkerneled, uniform type of early variety. **1 lb., 15c; 10 lbs., \$1.00.**

The Acme Automatic One-hand Corn Planter Put the right number of kernels just where you want them and the proper depth. Works equally well with right or left hand.

CUCUMBERS

CULTURE—Cucumbers need a warm, rich soil, and should not be planted in open ground until the weather is settled, as otherwise they will not thrive. Plant in hills four feet apart each way, thinning to three or four of the strongest plants, after danger from insects is passed. As fast as the cucumbers attain suitable size they should be taken from the vine, whether required for use or not, as their ripening soon destroys the vine's usefulness.

Noroton Selected White Spine Cucumber

White Spine, Improved Early—A selection of improved White Spine. Earlier, more perfect in shape and more prolific; best slicing variety; splendid either for home garden or market. **Pkt., 5c; oz., 15c; ¼-lb., 50c; lb., \$1.50.**

Boston Pickling—A distinct variety, very popular for pickles; color bright green, a great producer and of excellent quality. It is for producing medium-sized pickles that this variety is so highly esteemed. If the fruits are gathered as soon as large enough, the vines will continue bearing through a long season. **Pkt., 5c; oz., 15c; ¼-lb., 50c; lb., \$1.50.**

Japanese Climbing—Often used for ornamental purposes, as the vines are very vigorous, throwing out tendrils, enabling them to climb trellises admirably. Dark green fruit, quite large and very tender. **Pkt., 5c; oz., 20c; ¼-lb., 60c.**

Cool and Crisp—Extra early and very prolific; long, straight, slender and very dark green; good either for pickling or slicing. **Pkt., 5c; oz., 20c; ¼-lb., 50c.**

Try our Vegetable Fertilizer on your Cucumbers, it gives the best of results.

Improved Long Green—The leading large variety. Fruit from 10 to 12 inches long, dark green, crisp and tender. A good variety for slicing, and when ripe they are the best for sweet pickles. We offer "Highest Quality" seed that will grow long and uniform fruit. **Pkt., 5c; oz., 15c; ¼-lb., 50c; lb., \$1.50.**

Arlington White Spine—One of the best sorts for table use. Vines vigorous, fruiting early and abundantly. Fruit uniformly straight, light, bright green in color, with a few white spines. Flesh crisp, tender and of excellent quality. **Pkt., 5c; oz., 15c; ¼-lb., 50c; lb., \$1.50.**

Early Green Cluster—One of the extra early varieties. A great bearer; fruit small, dark green and borne in clusters of excellent quality. **Pkt., 5c; oz., 15c; ¼-lb., 50c; lb., \$1.50.**

Davis Perfect—Fine for forcing or for outdoors. The fruit is long and straight, and being a comparatively shy seeder, is very valuable for slicing. **Pkt., 5c; oz., 15c; ¼-lb., 50c; lb., \$1.50.**

Small Gherkin—Very small bur; used for pickles. **Pkt., 5c; oz., 25c; ¼-lb., 75c.**

ENDIVE

CULTURE—This is a hardy vegetable, cultivated principally for a Winter salad. Sow from May until August for a succession of crops; tie the leaves closely together to blanch them.

Green Curled—Standard sort for Fall and Winter. **Pkt. 5c; oz., 15c; ¼-lb., 50c.**

Broad Leaved Batavian (Escarolle)—Has broad, thick leaves, which form a large, loose head. **Pkt., 5c; oz., 15c; ¼-lb., 50c.**

White Curled—A beautiful variety, with curled, mossy leaves, for early use. **Pkt., 5c; oz., 15c; ¼-lb., 50c.**

EGGPLANT

NEW YORK IMPROVED SPINELESS—Considered the best variety. Oval shaped, deep purple, large size and fine flavor. **Pkt., 5c; ½-oz., 40c; oz., 75c.**

QUALITY WILL ALWAYS BE FOUND IN POOLE'S SEEDS

KALE, OR BORECOLE

A specie of Cabbage, forming a mass of leaves. The leaves are cooked as greens. Should be planted late, as the cold weather improves it. It is hardy and will withstand cold weather.

Tall Green Curled Scotch—Heads are formed on stalks two and a half feet high. Color bright green and leaves are exceedingly curly. **Pkt., 5c; oz., 20c; ¼-lb., 60c; lb., \$1.75.**

Dwarf Green Curled Scotch—Noted for its extreme hardness, dwarf, compact habit and extra fine curled leaves. **Pkt., 5c; oz., 20c; ¼-lb., 60c; lb., \$1.75.**

Thousand Head Kale—Is almost indispensable as a green feed for stock and poultry through the winter. The plants are hardy and thrifty, producing a heavy tonnage per acre and may be left in the field until wanted for feed. It is an ideal feed for dairy cows. Quarter-pound will produce sufficient plants for one acre. **Pkt., 5c; oz., 10c; ¼-lb., 30c; lb. 90c.**

KOHL RABI

Hardy and of easy culture. Grown from plants the same as cabbage. The Kohl Rabi is a vegetable intermediate between the cabbage and turnip and combines the flavor of both. The edible part is a turnip-shaped bulb formed by the swelling of the stem. Kohl Rabi is far superior to cabbage or turnips in the delicacy of its flavor, and is a splendid addition to every garden. It should be eaten before growth ceases.

Early White Vienna—Very early; bulb white; best table variety. **Pkt., 5c; oz., 25c; ¼-lb., 75c.**

LEEK

The Leek belongs to the Onion family. Prized for soups. Cultivation similar to that of Onions, but should be hilled up about the neck to blanch it.

Large Rouen, or American Flag—A large favorite American sort. **Pkt., 5c; oz., 35c; ¼-lb., \$1.15.**

The cost of the very Best Seeds is so small, compared with the value of the resulting crops, that sensible planters know they cannot afford to risk seeds of doubtful pedigree—and we know just as well that we cannot afford to risk our hard-earned reputation by selling stock of uncertain character.

LETTUCE

NEW YORK

Lettuce, like many other vegetables, requires very rich soil, plenty of water, a cool growing season and intense culture to produce the best results. If the earliest varieties are planted out in the spring, and the weather turns dry and hot, they will run to seed without heading. The same seed sown in the Fall or with cooler weather would develop perfectly. At a temperature of 40 degrees or lower lettuce will not thrive. For outside planting sow the seed in shallow drills from one to two ounces to the 100 yards. An ounce will produce 3,000 plants. Four pounds should plant an acre. Lettuce matures in forty to sixty days from time of planting.

GRAND RAPIDS For Early Forcing—As a Lettuce for green house forcing this variety undoubtedly stands at the head of the list. Gives quick growth, and stands for some days after being cut. The plant is upright, and forms a loose head or cluster of large, light yellowish green leaves, slightly crimped and blistered, rather thin, good flavor, crisp and tender. It will stand shipping better than most curled sorts. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

Hanson—Grows to large size, and is uniformly sure heading. Heads very solid and beautifully blanched; crisp, mild and tender. One of the finest varieties to grow for market during the summer months. Our stock is unexcelled. **Pkt., 5c; oz., 15c; ¼-lb 45c; lb., \$1.50.**

New York, or Wonderful—This is the mammoth head lettuce so popular in California from whence it is shipped to the Northern markets, arriving in splendid condition. The immense heads are solid, heavy, beautifully blanched to a creamy white with bright green outer leaves. The quality is unsurpassed, being tender, crisp and sweet. New York is a hardy, rapid grower, deep rooted and resistant to drought; a slow seeder and sure to head. **Pkt., 5c; oz., 25c; ¼-lb., 75c; lb., \$2.50.**

May King—A large growing, smooth leaved, richly flavored sort. Plant, light green, with round leaves, which form into a very solid, compact, round head; stands a long time without running to seed. Inner leaves blanch to a rich, golden yellow. Exceedingly rich, tender and buttery. Fine for open ground or forcing. For succession plant in Spring, then in August and again in September. **Pkt., 5c; oz., 20c; ¼-lb., 60c; lb., \$2.00.**

California Cream Butter—A fine large butter head lettuce of the richest flavor, tender, sweet and crisp; a great favorite in California, being a popular market variety, medium early. The heads are very broad, often measuring eight inches across and continue to grow for two or three weeks after they are ready to use, and are very slow to seed. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

ICEBERG—A beautiful lettuce. Large, curly leaves of bright, light green, with a very slight reddish tinge at the edges. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

Big Boston—This is a fine forcing variety for cold frames during the winter months, as it produces heads of very large size in a cooler temperature than most forcing strains. Large heads are beautifully blanched and of superior quality. It heads well in the open ground during cool weather of spring and fall, and is very popular in the South to grow for shipping North. Our seed is an extra selected strain. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

Simpson's Early Curled—A leading market variety for very early planting and forcing. Forms a dense mass of finely curled and wrinkled leaves that are excellent and tender, and do not wilt readily. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

Black Seeded Simpson—Forms a close, compact mass of curly leaves of a yellowish green. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

Early Prize Head—Standard sort; one of the best thin leaved, clustering, varieties. The very large leaves are savoyed or crimped, bright green, tinged with red, and are exceedingly tender, crisp and sweet, forming a large, loose head. One of the best for the garden, but not good to ship long distances. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

BROWN DUTCH

Forms a large, solid head, sweet, tender and of good flavor. Outer leaves are tinged with brown. Very hardy. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

WHITE PARIS COS OR ROMAINE

A distinct variety, forming oblong, upright heads, largest near the top. It is hardy, tender and crisp, and does not run to seed as quickly as some other Cos varieties. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

MUSTARD

The leaves of mustard make excellent greens of sharp, pungent flavor, and are cooked the same as spinach or beet leaves.

SOUTHERN GIANT CURLED

Large variety, forming a great mass of beautiful leaves, which are ruffled and finely curled on the edges; hardy, vigorous, highly recommended. **Pkt., 5c; oz., 10c; ¼-lb., 30c; lb., \$1.00.**

WHITE ENGLISH

Light green variety; tender leaves; seed light yellow. **Pkt., 5c; oz., 10c; ¼-lb., 30c; lb., \$1.00.**

FORD HOOK FANCY

The dark green leaves of this variety are more curled on the edges than any other sort, making most attractive greens. May be cooked and served like spinach. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.**

MUSHROOM SPAWN

LAMBERT'S PURE CULTURE SPAWN

Mushrooms may be grown in any place where conditions of temperature and moisture are favorable. A shed, cellar or cave may be utilized to advantage for this purpose. It is essential that the temperature be maintained from 53 to 60 degrees F., and that the moisture be properly regulated. Lambert's Pure Culture Spawn is far superior to the old-style varieties, and much better results can be obtained from its use. The bricks should be broken into pieces about two inches square and planted from 10 inches to a foot apart. Bricks weigh from 18 to 24 ounces. A brick will spawn 10 square feet of bed. With Lambert's Pure Culture Spawn it is impossible to raise poisonous mushrooms. Price, **per brick, 40c.**

MUSKMELON

OSAGE, OR MILLER'S CREAM

One of the finest flavored melons in cultivation, and highly recommended. The flesh is of a rich salmon color, very sweet and melting in quality. **Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.**

ROCKY FORD OR NETTED GEM

The most popular and best seller among Muskmelons. The fruit is oval, slightly ribbed, densely covered with coarse netting. Flesh thick, green, very sweet and highly flavored. **Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.**

WATERMELONS

SWEET HEART

Good shipper. Vine vigorous and productive, ripening its fruit early. Fruit large, oval, very heavy, uniformly mottled dark and very light green; rind thin, but firm; flesh bright red, firm, solid, but very tender, melting and sweet. Fruit retains its good quality for a long time after ripening. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.25.**

HUNGARIAN HONEY

A very early sort; fine for northern latitudes; perfectly round; brilliant red flesh. **Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.25.**

OKRA OR GUMBO

DWARF GREEN PROLIFIC

Short, thick pods. **Pkt., 5c; oz., 10c; ¼-lb., 30c.**

LONG GREEN

Tall; very productive; moderately long green pods. **Pkt., 5c; oz., 15c; ¼-lb., 45c.**

ONIONS—BUNCHING

EARLY WHITE QUEEN

If sown thickly, produces small, very firm bulbs, the best of all for pickling, and is especially useful to market gardeners for producing an attractive "green onion." If given more room, matures an excellent onion, that will keep all Winter. **Pkt., 5c; oz., 40c; ¼-lb., \$1.25; lb., \$4.00.**

WHITE PORTUGAL, OR SILVER SKIN

This variety is one of the leading white sorts, and is of beautiful shape and very mild flavor. The bulbs are flat in shape and mature early. It is a splendid variety for both family use and the market gardener, and also for its good keeping qualities. **Pkt., 5c; oz., 35c; ¼-lb., \$1.00; lb., \$3.50.**

WHITE GLOBE

Yields abundantly and, as a table variety, its clear white color is exceptionally attractive. **Pkt., 5c; oz., 35c; ¼-lb., \$1.00; lb., \$3.50.**

WHITE BARLETTA

A small, pure white, mild onion; fine for pickles. **Pkt., 5c; oz., 35c; ¼-lb., \$1.00; lb., \$3.50.**

ONIONS—Continued

CULTURE

One ounce will sow 160 feet drill.

Sow in spring as soon as the ground can be worked, in drills one foot apart. Thin to 3 or 4 inches and cultivate frequently with rake and hoe to keep down weeds. They grow best in rich sandy soil.

YELLOW GLOBE DANVERS

A very handsome, round or globe-shaped variety of large size, with thin, yellowish skin, white

flesh. Fine grained, mild, very firm, and the best of keepers. It ripens early. **Pkt., 5c; oz., 25c; ¼-lb., 80c; lb., \$2.50.**

Flat Yellow Danvers—Same a Globe Danvers, except in shape. **Pkt., 5c; oz., 25c; ¼-lb., 60c; lb., \$2.00.**

Prizetaker, The Genuine—Of fine flavor, handsome shape and enormous size. A perfect globe shape, with a bright straw-colored skin; the necks are very small and the onions always ripen up hard. **Pkt., 5c; oz., 25c; ¼-lb., 80c; lb., \$2.50.**

Australian Brown—This onion resembles the Oregon Yellow Danvers in general appearance, but has a clear, amber-brown skin that attracts buyers. It matures early, ripens uniformly, and will keep in good condition longer than any other onion. We offer the true seed. **Pkt., 5c; oz., 20c; ¼-lb., 55c; lb., \$1.75.**

Large Red Wethersfield—A standard variety; one of the most productive kinds, even in poor soil. Its good keeping qualities render it one of the best for shipping. **Pkt., 5c; oz., 25c; ¼-lb., 75c; lb., \$2.50.**

Onion Sets—Bottom Onion Sets, yellow, **lb., 15c;** Bottom Multiplier Onion Sets, **lb., 15c.**

PARSLEY

Parsley is very generally used for garnishing, and seasoning soups and stews. It can be used fresh from the garden, or dried and rubbed into a fine powder when it can be bottled for Winter use. It becomes finer and more beautifully curled if cut frequently. As the seed germinates slowly, it should be soaked a few hours in warm water, and sown in drills a foot apart and half an inch deep, as early in Spring as possible. Thin to three or four inches apart. Thrives best in deep, rich soil.

Fine Triple Curled—Fine for seasoning; also good for table decoration. **Pkt., 5c; oz., 10c; ¼-lb., 30c; lb., \$1.00.**

Turnip-Rooted, or Hamburg—The root, which resembles a small turnip, is the edible portion of this variety. Extensively grown and used for flavoring soups, etc. **Pkt., 5c; oz., 10c; ¼-lb., 30c; lb., \$1.00.**

PEPPER

Sow the seeds early in hotbeds, or later, when the weather becomes warm, in open beds; when two or three inches high, transplant to a warm, mellow soil, in rows eighteen inches apart and a foot apart in the row. Guano and hen manure are excellent fertilizers, and will greatly increase the yield.

Large Bell or Bull Nose—A large, mild, thick-fleshed variety. One of the best for stuffed pickles. **Pkt., 10c; oz., 70c.**

Long Red Cayenne—Brilliant, coral-red pods, three or four inches long, and a prolific bearer. Very pungent, and used very largely with pickles when green. **Pkt., 10c; oz., 70c.**

Sweet Spanish or Mountain—Similar to the Large Bell, but usually larger. Excellent for pickling and stuffing. **Pkt., 10c; oz., 60c.**

PARSNIPS

The Parsnip is nutritious and wholesome, with a sugary sweetness peculiar to itself, and is desirable both for the table and stock feeding. It yields a large crop, and is said to be more valuable for dairy cows than either the carrot or turnip. As the seed germinates very slowly, sow as early in Spring as possible, in drills fifteen inches apart on deeply cultivated, rich, loamy soil. Keep clear of weeds and thin to three or four inches apart. The roots of the parsnip are improved by freezing.

Gperrysey, Half Long—Root white, very tender, with a smooth, clear skin. Shorter and thicker than "Hollow Crown" desirable for stiff soils. **Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., 1.25.**

Hollow Crown or Long White—Root very long, white, smooth, tender, sugary, and of most excellent flavor.

Very hardy; will keep through the Winter without protection. **Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.**

GARDEN PEAS

When ordering Peas to be forwarded by mail add postage.

CULTURE—Peas can be grown in every garden, but for the earliest of the dwarf, wrinkled varieties a light, warm, moderately rich soil is most suitable. The smooth kinds can be sown as soon as the ground can be worked, but the wrinkled varieties should not be planted till it is warmer, or they will rot. Sow in single or double rows from 1½ to 3 feet apart, dropping a pea every inch and covering from 2 to 3 inches deep. For a succession sow every ten days up to July. Sow one quart to 50 feet drilled; 1½ to 2 bushels to an acre.

EARLY PEAS

ALASKA, OR EARLIEST OF ALL—By careful selection and growing we have developed a stock of this smooth blue pea of unequalled evenness in growth of vine and early maturity of pods which are filled with medium sized, bright green peas of good flavor. Vines two and one-half to three feet high. Seed small, and bluish-green in color. Matures all the crop at once and is an invaluable variety for market gardeners and canners. **Pkt., 10c; lb., 25c; 10 lbs., \$2.25.**

AMERICAN WONDER—The earliest of the dwarf, wrinkled varieties, vines branching, about ten inches high and covered with well filled pods of medium size, containing five to eight large, exceedingly sweet, tender and well flavored peas. A great favorite for planting in the small garden on account of its short, compact growth. We have taken great pains in growing our stock and know it to be much better than that usually sold. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

McLEAN'S LITTLE GEM—The vines are of dwarf growth and produce an abundance of round well filled pods of good size, about three inches long, only a few days after the American Wonder. The peas are green, wrinkled, of sweet, delicious flavor and excellent quality. One of the best for family use. It remains fit for use longer than the American Wonder and Nott's Excelsior, and thought by many to be sweeter. Height, 15 to 18 inches. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

EARLY GARDEN PEAS—Continued

NOTT'S EXCELSIOR—A deservedly popular variety; an enormous yielder, and of the very choicest flavor; pods well filled with six to eight peas, packed very closely together; valued highly for the home garden, and for all-round excellence is second to none; 15 inches high. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

LITTLE MARVEL—A splendid new dwarf pea, for home or market. The dwarf, bushy vines averaging 15 inches are loaded with firm, square-ended pods $2\frac{1}{2}$ to 3 inches long, tightly filled with plump, luscious, deep green peas. Little Marvel is as early as American Wonder, fully equals the superb quality of Nott's Excelsior, and far outyields these two popular sorts. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

GRADUS—This extra early, wrinkled pea bears pods of large size and combines quality with earliness. It is very hardy; can be planted fully as early as the smooth peas; growth, vigorous and healthy; vines $2\frac{1}{2}$ feet in height; very prolific. The quality and flavor are delicious and the peas remain tender and sweet for a long time. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

LAXTONIAN—A new, early, dwarf, robust, large podded pea of superior excellence; often referred to as "Dwarf Gradus," and is said to surpass Gradus in yield and quality, with the added advantage of dwarfed growth, averaging 16 inches. The large pods are well filled, holding 8 to 10 peas. Laxtonian is so highly recommended that you should give it a trial. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

THOMAS LAXTON—A cross between Gradus and one of the extra-early sorts. Ripens within a day or two of the earliest round varieties; very productive. The pods are large and contain seven or eight large, wrinkled peas of the finest flavor. Height 3 feet. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

BLUE BANTAM—Unequaled for extreme earliness, superb quality, and unusual productiveness. The dwarf vigorous vines average 15 inches in height and carry really enormous crops of large, deep bluish-green pods. The handsome pointed pods average 4 inches long and are tightly packed with extra large, deep bluish-green peas of most luscious flavor. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

MAIN CROP VARIETIES

STRATEGEM—A semi-dwarf variety with large leaves and large pods. The peas are dark green, wrinkled, and of good quality. It is planted in large quantities by gardeners for market. In quality it is unsurpassed, the peas when cooked being of the most delicious sweetness. Vines grow 18 inches to 2 feet high, and they are very stocky. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

DWARF TELEPHONE—Of English origin and introduction. The striking features are its large pods and the way in which they are heaped up in ridges on the short, strong vines. The pods are nearly double the size of American Wonder or Little Gem, and are always well filled with large peas of most excellent quality. The vines are dwarf, strong and thrifty, making an ideal garden variety. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

TALL TELEPHONE—This variety has now come into general use, and is acknowledged to be of great merit. It is immensely productive, of the finest quality and excellent, sugar flavor; vines strong, the pods are of large size, filled with large, luscious peas; height four feet. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

CHAMPION OF ENGLAND—A most popular and extremely productive pea, which has been valued for many years as the standard variety. Vines are of strong growth and very productive of large, well-filled pods. The flavor of the peas is delicious. Height, 5 feet. **Pkt., 10c; lb., 30c; 10 lbs., \$2.50.**

MAMMOTH MELTING SUGAR—Grows 4 feet tall, producing very large broad flattened pods. A great favorite with many. In the Edible-Podded or Sugar Peas the pods are gathered, broken and cooked like string beans when the peas start to develop in the pod or have reached about half their full size. **Pkt., 10c; lb., 35c; 10 lbs., \$3.00.**

Laxtonian

There is a vast difference in "strains" of garden peas. You will find our stock "very superior," healthy, vigorous and true, much better than the average seed sold by dealers.

Write for special quotations on large quantities.

Humogerm for Garden Peas

increases the yield, enriches the soil.

Garden size 25c, $\frac{1}{4}$ Bu., size, 35c.

COMPLAINTS OR PRAISES—If you are well pleased with the goods and our manner of doing business, tell everyone. If you are not, tell us, so we can please you. Our best efforts will be put forth in filling all orders carefully and promptly in a way that will please you.

SEED POTATOES

**EARLY ROSE**

Strong, vigorous vines of medium height. Flowers white, rather abundant. Tubers quite smooth, elongated or oblong, stem and seed end rather blunt. Eyes shallow, but sharp and strongly marked; skin thin but tough. Flesh creamy white sometimes streaked with red, solid and brittle, rarely hollow. Our strain of this grand "old timer" is exceptionally good. **Price per lb., 4c; Per 100 lbs., \$3.00.**

Write for prices in quantities.

BEAUTY OF HEBRON

Slightly flesh-colored skin, with pure white flesh. Very productive and of the finest quality; a first-class variety. A popular potato with the home gardener. **Price per lb., 4c; Per 100 lbs., \$3.00.**

Write for prices in quantities.

PRIDE OF MULTNOMAH

Tubers are uniform in size, of the ideal elongated type with smooth, thin white skin; eyes shallow; flesh snow white, of finest table quality; flowers white; vines medium large of bushy growth; withstands drought; and is blight and disease resistant to a remarkable degree. **Price per lb., 4c; Per 100 lbs., \$3.00.**

Write for prices in quantities.

AMERICAN WONDER

One of the earliest and best main crop varieties. Strong grower of branching

habit and great producer. Tubers white, large and uniform in size; elongated and slightly compressed. Blooms white; foliage rich dark green. Our stock is of exceptional quality, selected to our standard.

Price per lb., 4c; Per 100 lbs., \$3.00.

Write for prices in quantities.

NETTED GEM

A splendid main crop late potato that gives good results in dry sections. Tubers are elongated, medium sized with russet netted skin; flesh white; eyes are flush with surface; good keeper and produces a fine yield. This is the variety grown extensively by irrigation in Washington and Idaho for baking. Our stock is extra choice of the most improved type.

Price per lb., 4c; Per 100 lbs., \$3.00.

Write for prices in quantities.

BURBANK

A standard commercial variety. Late and very productive. Skin nearly smooth. Eyes rather shallow. Tubers long and slightly flattened. Under proper selection it thrives equally as well now as at any time since its introduction. We offer a select true heavy yielding strain. Regard to our standard of type and freedom from disease.

Price per lb., 4c; Per 100 lbs., \$3.00.

Write for prices in quantities.

NO WARRANTY

NOTE—While we exercise the greatest care to have all Seeds pure and reliable, and all Bulbs, Plants and Nursery Stock true to name, we do not give any warranty, express or implied, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms and conditions, they must be returned at once, and the money that has been paid for the same will be refunded.

POOLE'S SEED & IMPLEMENT CO.

Prices on Potatoes may have to be advanced as the season approaches, and are subject to change without notice.

PUMPKIN

CULTURE—May be planted middle of Spring, in hills 8 or 10 feet apart each way, four seeds in a hill. In other respects is cultivated in same manner as cucumbers. Avoid planting near other vines. One pound seed will plant 300 hills.

Sweet, or Sugar—A handsome and productive small pumpkin, ten to twelve inches in diameter; round flattened; skin, orange; flesh, deep yellow, fine grained and very sweet. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

Winter Luxury—The best flavored pie

pumpkin grown; enormously productive; excellent keeper; medium size; color, golden-russet, finely netted; flesh, deep golden, sweet, tender and very thick; none better. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

Large Yellow, or Connecticut Field—Large, round; deep, glossy yellow. Vines vigorous and very productive; good keeper. Grown extensively for stock feeding. Pkt., 5c; oz., 10c; ¼-lb., 30c; lb., \$1.00.

Mammoth Tours—A productive French variety; grows to an enormous size. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

RADISH

CULTURE—Sow as soon as the ground is dry in the Spring, in rows 8 to 12 inches apart, every week or ten days for a succession, up to the middle of June, after which they are but little used, unless a cool northern spot can be had, where the ground is shaded during part of the day. They should be sown in light, rich soil, as a crisp Radish cannot be produced in heavy soils. Sow also in early fall for late crops and Winter use. Sow 8 to 10 lbs. to the acre. Radishes should be eaten quite small; it is a mistake to let them grow too long and too large. This applies particularly to the French Breakfast and small turnip-shaped sorts.

Early Scarlet Turnip (White Tipped)—An exceptionally fine strain so largely grown by market gardeners. Its color is of the deepest scarlet with a prominent white tip; superb flavor. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

Early Scarlet Turnip—One of the standard sorts for general sowing. Roots are turnip shaped, dark red and of fine quality. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

French Breakfast—This well known radish is olive shaped, bright scarlet with the exception of the white tip. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

Chartier—Roots are red with a white tip, slender, and remain solid and crisp until of large size. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

Icicle—One of the earliest and purest of all long, white varieties. For crispness and tenderness it is unsurpassed. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

Lady Finger, or White Vienna—Of rapid growth and beautiful shape. Skin and flesh snow-white; very juicy, firm, crisp and tender; the finest of Long White Radishes. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

In California, they have had great success with the new Agricultural Mineral Compound "TOVASCO" as an Insecticide. All reports received state that it will rid the soil of root maggots and all softbodied pests. Try a little and see what it will do here.

See Page 39

White Strasburg—One of the best large Summer sorts. It covers a long season, as it is good when quite small. The roots are long, very white, crisp and tender. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

Early Long Scarlet, Short Top—This bright scarlet, small topped sort is uniformly straight, smooth, brittle and crisp, and is a standard and excellent sort for private gardens or market use. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

Early Scarlet Turnip (Forcing)—Popular everywhere, either for forcing or outside sowing. Its brilliant color, uniform shapes, and crisp, white flesh make it a favorite with all. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

China Rose Winter—One of the best Fall and Winter varieties; a favorite with market gardeners; bright rose color; flesh white, firm and of superior quality. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

Black Spanish Long—Standard Winter sort; has good flavor and keeps well. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

Black Spanish Round—Same as long, except shape. Pkt., 5c; oz., 10c; ¼-lb., 35c; lb., \$1.25.

RHUBARB OR PIE PLANT

CULTURE—Rhubarb succeeds best in deep, rich, somewhat retentive soil. The richer its condition and the deeper it is stirred the better. Sow in drills an inch deep and thin out the plants to six inches apart. In the Fall transplant the young plants into very highly manured and deeply stirred soil, setting them four to six feet apart each way, and give a dressing of coarse manure each Spring. The stalks should not be plucked until the second year and the plant never allowed to exhaust itself by running to seed.

Victoria, or Mammoth—Very large; finest cooking variety. Pkt., 5c; oz., 15c; $\frac{1}{4}$ -lb., 50c; lb., \$1.50.

SALSIFY—Oyster Plant

The roots are long and tapering; when cooked has a flavor like oysters. If more people knew how many fine dishes are made out of Salsify Roots it would be much more extensively planted. Same culture as carrots. Roots good all Winter.

Mammoth Sandwich Island—The best variety of Salsify, being very smooth, of fine quality, pure white and extra large size. Pkt., 5c; oz., 20c; $\frac{1}{4}$ -lb., 60c; lb., \$2.00.

SEE THE EDITORIAL PAGE 39

—by Cail H. Davis, editor of the magazine, "California Fruitman," describing the wonderful results obtained by the use of TOVASCO.

SPINACH

CULTURE—Sow in early Spring, in drills a foot apart (10 to 12 lbs. to the acre) every two weeks for a succession, and, as it grows thin out for use. For Fall use, sow in August, and for Winter crop in September. Cover that which is left out over Winter with straw or leaves after the weather becomes quite cold. Keep clear of weeds.

Long - Standing (Round Thick-Leaved)—Dark Green; leaves large and thick; very long-standing. Best for Spring growing. Oz., 10c; $\frac{1}{4}$ -lb., 25c; lb., 75c.

Victoria—Extra-dark, black-green color. Two or three weeks later than the ordinary "Long-standing." A fine variety for Spring sowing. Oz., 10c; $\frac{1}{4}$ -lb., 25c; lb., 75c.

Round Viroflay (Thick-leaved)—Has very large, thick, dark green leaves; the favorite market-gardeners' sort for Fall or Spring sowing. Oz., 10c; $\frac{1}{4}$ -lb., 25c; lb., 75c.

Prickly, or Winter—Vigorous and hardy; recommended for Fall sowing. Oz., 10c; $\frac{1}{4}$ -lb., 25c; lb., 75c.

Fertilize Your Garden with
Our DIAMOND QUALITY
VEGETABLE FERTILIZER

SQUASH

CULTURE—Sow in hills in the same manner and at the same time as cucumbers, and bush varieties 3 to 4 feet apart, the running kinds from 6 to 9 feet apart.

Early White Bush Scallop—The best summer sort for the market; very productive and of good size. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

English Vegetable Marrow—Oblong, dull, yellow skin, very prolific and of finest table quality. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.75.

True Hubbard—The best seller and most popular variety on our list. Rind dark green, warty and very hard. Flesh light orange, very dry, sweet and rich flavored. Has no superior. Keeps perfectly through the winter. Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.

Golden Hubbard—The same in size, shape and quality as the well-known Hubbard Squash, except that it is a bright red or golden color, and somewhat earlier. It is also a long keeper. One of the very best fall and winter sorts yet introduced. Maturing before the frosts; is vigorous and wonderfully productive. Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.

Mammoth Chili—The largest of all Squashes, growing to an enormous size, often weighing over 200 pounds, while its rich, fine flavored flesh insures its value for all purposes. Its size makes it valuable for stock feeding. Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.

Essex Hybrid—A good fall and winter sort; fine-grained; rich flavor; very prolific. Pkt., 5c; oz., 15c; ¼-lb., 45c; lb., \$1.50.

Early Yellow Bush Scallop—An early, flat, scallop-shaped variety; color, yellow; flesh, pale yellow and well flavored; very productive. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

TRUE HUBBARD

Mammoth Summer Crookneck—Early, prolific, solid, curved neck; skin yellow, thin, hard and warty; flesh tender and of good quality. Twice as large as the ordinary Crookneck and several days earlier. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

Boston Marrow—Skin yellowish, very thin; flesh dry and fine grained; of unsurpassed flavor. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

SUNFLOWER

Every farmer and poultry raiser should raise sunflowers, for the seed is very fattening and contains a high percentage of protein, an excellent egg food.

Mammoth Russian—The largest and best for seed. Large pkt., 5c; ¼-lb., 10c; lb., 25c.

Look to Us for Your

GARDEN AND FARM IMPLEMENTS

TOBACCO

Sow the seed thinly in beds, as early as they can be well prepared. Cultivate thoroughly, transplanting when six inches high to rows four feet apart each way.

Connecticut Seed Leaf—Hardy, and the best adapted to cool localities, and for general use. Pkt., 10c; oz., 75c.

Havana—Of fine texture and delicate flavor. Pkt., 10c; oz., 75c.

TOMATOES

CULTURE—Sow in a hotbed in early spring, or the seed may be sown in shallow boxes and placed in a window when one does not wish to have the trouble of making a hotbed. Transplant to the open ground when all danger of frost is past, setting the plants 3 to 4 feet apart each way. Fruit may be used several weeks earlier by sowing seed quite early and transplanting to small pots. Tomatoes that have not ripened at the end of the season may be taken from the vines and placed in empty cold frames, or wrapped in tissue paper, and carefully packed in flat boxes—where a large proportion of them will ripen from time to time, frequently until Christmas.

Spark's Earliana—The earliest tall variety, forming ripe fruit much earlier than any other variety. The fruit is large, smooth, of a bright scarlet color and of fine quality. Very valuable for early market use. Pkt., 5c; oz., 40c; ¼-lb., \$1.25.

BONNIE BEST

An early scarlet fruited Tomato. It is smooth, very even in size, very solid and also very prolific. Price Pkt., 5c; oz., 40c; ¼-lb., \$1.25.

Tomatoes continued next page

DON'T practice false economy by buying low-priced seeds. Our Motto—Quality First
Price as Low as We Can Make It

TOMATOES—Continued

Chalk's Early Jewel—Large, bright red, smooth, round fruits, very deep and colored evenly up to the stem; very solid, almost seedless and of the finest flavor.

Vines are vigorous, not subject to blight, and yield fully equal to, or better than, Earliana. Pkt., 5c; oz., 40c; ¼-lb., \$1.25.

John BAER—It is similar to CHALK'S Early Jewel; prolific, and of best quality. Pkt., 5c; oz., 40c; ¼-lb., \$1.25.

Stone—A large tomato of good quality; round or apple shaped, and very uniform, deep red in color, and exceedingly heavy. Pkt., 5c; oz., 40c; ¼-lb., \$1.25.

Dwarf Champion or Tree Tomato—Vines erect and vigorous; fruit of medium size, round, smooth, of excellent quality, very fleshy; approaching purple in color. Pkt., 5c; oz., 40c; ¼-lb., \$1.25.

Red Cherry—Small fruits, used for pickles; very handsome. Pkt., 5c; oz., 50c.

Ground Cherry, or Husk Tomato—Grows to great perfection under ordinary culture, yielding abundantly; very much prized for preserving; should be in every garden. Pkt., 10c; oz., 75c.

CHALK'S EARLY JEWEL
Yellow Plum—Round and regular; bright yellow; used for pickles. Pkt., 10c; oz., 75c.

TURNIPS

CULTURE—Turnips do best in highly enriched light sandy or gravelly soil, commence sowing the earliest varieties in April in drills from 12 to 15 inches apart, and thin out early six or nine inches in rows. For a succession sow at intervals of a fortnight until the last week in July, from which time until the end of August sowing may be made for the fall and main crop. One ounce will sow 150 feet of drill; two to three pounds to the acre.

For feeding stock in the fall or winter there is nothing superior to turnips and rutabagas, as they are much liked by all kinds of stock and serve to keep them in good condition. We cannot too earnestly recommend farmers to increase their sowings largely, for we are sure the crop will prove remunerative.

Early Purple Top Milan—This variety is ready for the table sooner after planting than any other yet introduced. Top small, erect, strap-leaved; bulb a deep purple above, white underneath; flesh white, firm and delicate. Pkt., 5c; oz., 20c; ¼-lb., 60c; lb., \$1.75.

Early White Milan—Same as Purple Top Milan, but pure white, sweet and tender; best early market variety. Pkt., 5c; oz., 20c; ¼-lb., 60c; lb., \$1.75.

Early White Flat Dutch—One of the very best and most universally grown. Small, erect top, round, flat; flesh, white, firm, but very tender and sweet. Of quick growth, it is soon ready for the table and keeps well. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

Golden Ball—Undoubtedly one of the most delicate and sweetest yellow-fleshed turnips yet introduced. Not of large size, but firm, hard and most excellent flavor. Keeps well and is superior as a table variety. It is extensively used by market gardeners. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

Purple Top Strap Leaf—A leading white-fleshed variety, and one of the best, either for the family, market garden or field crop. It is medium size, and produces a large crop. The flesh is firm, but tender, and of a superior rich buttery flavor. A good keeper. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

Turnips continued next page

TURNIPS—Continued

Pomeranian White Globe—One of the most productive kinds and in good, rich soil, roots will frequently grow to 12 pounds in weight. It is of perfect globe shape; skin white and smooth; leaves dark green and of strong growth. **Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.**

Cowhorn—Sometimes called Long White. Slightly crooked. Pure white except a little shade of green at the top. Grows half out of the ground and is of very rapid growth. It is delicate and well flavored. Has proved itself one of the best stock turnips ever introduced in Wash., as it is an immense yielder. **Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.**

Yellow Aberdeen—Round, medium size; light yellow. Produces a large crop; is hardy and keeps well; flesh very firm but tender and sweet. A great favorite with the dairymen. **Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.**

RUTABAGA

Improved American Purple Top—The leading standard variety, being very distinct in type, attaining a wonderfully large size; immense yielder. The flesh is very firm, superior in every way, valuable alike for all purposes. **Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.**

White Sweet Russian—This variety is most excellent, either for table or stock; it grows to a very large size; flesh white; solid, of a firm texture, sweet and rich; an excellent keeper. **Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.**

HERB SEEDS

Anise—Seeds aromatic and carminative. **Pkt., 5c; oz., 50c.**

Balm—For culinary purposes. **Pkt., 10c; oz., 60c.**

Basil—For flavoring soups. **Pkt., 5c; oz., 50c.**

Borage—Leaves used as a salad. **Pkt., 5c; oz., 50c.**

Caraway—For sowing. Used in flavoring bread and liquors. **Pkt., 5c; oz., 25c.**

Catnip—Has medicinal qualities. **Pkt., 10c; oz., \$1.40.**

Coriander—Seeds aromatic. For sowing. **Pkt., 5c; oz., 25c.**

Dill—For sowing. Seeds used for flavoring vinegar. **Pkt., 5c; oz., 25c; ¼-lb., 75c.**

Fennel, Sweet—Seeds aromatic; for flavoring. **Pkt., 5c; oz., 30c.**

Horehound—has medicinal qualities. **Pkt., 10c; oz., 75c.**

Lavender—True. For oil and distilled water. **Pkt., 10c; oz., 70c.**

Marjoram, Sweet—Is used in seasoning. **Pkt., 10c; oz., 75c.**

Rosemary—Yields an aromatic oil and water. **Pkt., 10c; oz., \$1.00.**

Early Snowball—Early round turnip, maturing in seven weeks, is of perfect form, snowy whiteness, crisp, solid and of fine flavor. **Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.**

White Egg—Is perfectly smooth, of a pure, clear white, growing half out of the ground, and at times to the size of a rutabaga, being a very choice kind for table use; of excellent flavor, sweet and mild. Pulls clean from the ground; thin, snow-white skin. **Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.**

Purple Top White Globe—A large, globe-shaped variety; purple above the ground; it is handsome and of excellent quality, and recommended both for the family garden and field crop. **Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.**

Rue—Said to have medicinal qualities. **Pkt., 10c; oz., \$1.00.**

Sage, Broad-Leaf—A culinary herb; also used in medicine. **Pkt., 10c; oz., 75c.**

Savory, Summer—Is used as a culinary herb. **Pkt., 10c; oz., 75c.**

Tansy—Generally used in bitters. **Pkt., 10c.**

Thyme, French—Is used as a seasoning. **Pkt., 10c; oz., \$1.25.**

Wormwood—Has medicinal qualities. **Pkt., 10c; oz., 65c.**

CLOVER AND ALFALFA SEEDS

Write for prices on larger quantities. They are always subject to market changes. When ordering, to go by Mail, add Postage

ALFALFA OR LUCERNE

Requires deep, rich, well-drained soil. The taproot descends often to a depth of 10 to 15 feet in loose soil. It is, consequently, capable of resisting great droughts. It should be sown alone (about same time as oats in this section) in thoroughly prepared, deeply plowed soil, at the rate of 20 to 25 pounds to the acre. **Per lb., 32c. Write for prices in quantities.**

ALSIKE OR SWEDISH CLOVER

(*Trifolium Hybridum*.)

A perfectly hardy perennial variety which is rapidly growing in popular favor. Excellent for hay and pasture. Valuable for bees. Resists both drought and excessive moisture. The hay of this variety is greatly preferred by some to that of Red Clover, for the reason that it is generally finer, brighter and not so dusty, making it better for horses. **Per lb., 27c. Write for prices in quantities.**

WHITE DUTCH CLOVER

(*Trifolium Repens*.)

A small variety, having a white blossom. Of a vining nature, spreading rapidly. Superior for pasture and unsurpassed for the production of honey. It also makes a beautiful lawn when mixed with Blue Grass. **Fancy Seed, per lb., 55c. Write for prices in quantities.**

RED CLOVER

(*Trifolium Pratense*.)

The standard Clover for all purposes. Hardy and succeeds well on any good soil. Makes superior hay—especially mixed with Timothy—either for dairy cows or for general use. **Per lb., 30c. Write for prices in quantities.**

MAMMOTH RED CLOVER

Grows very large and is used almost exclusively for plowing under for manure. **Per lb., 32c. Write for prices in quantities.**

CRIMSON OR SCARLET CLOVER

(*Trifolium Incarnatum*.)

Highly recommended for pasture and fertilizing purposes. Is a thrifty annual, growing from twenty to thirty inches high. Germinates quickly, grows rapidly, and stools abundantly. Cut for hay when in full bloom. Planted in the Fall can be plowed under after blooming in the Spring and be followed with barley or potatoes. **Lb., 32c. Write for prices in quantities.**

BOKHARA SWEET OR HONEY CLOVER

(*Melilotus Alba*.)

A rapid-growing, white-flowered sort; excellent for bees. Sow 10 pounds per acre. **Per lb., 26c. Write for prices in quantities.**

GRASS SEEDS

The prices on Clover, Grass and Field Seeds may change as the season advances. Prices now given are those prevailing when this list was published. Kindly write for samples and current prices.

CENTRAL PARK LAWN GRASS MIXTURE

To obtain a good Lawn Grass Mixture, it is necessary that the best possible seed of fine grasses be used in the combination, embracing such varieties as are of neat, close growth, extreme hardness, and adapted to produce a quick, permanent sod. Judicious selection of seed, knowledge of the habits, vigor, quality and hardness of varieties used in the mixture can only be gained by thorough and practical tests under different climatic and soil conditions. After more than 25 years' experience, we offer our Central Park Lawn Grass Seed Mixture, composed of a thoroughly balanced combination of various native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that will flourish under varied soil and climatic conditions, and which may be depended upon to produce a beautiful, compact evergreen sod that will resist tramping and hard usage, and at the same time present that handsome, velvety appearance so much desired. Sow one pound to 400 square feet.

Price, 60c per lb. Write for prices in quantities.

TIMOTHY

(*Phelum Pratense*.)

This is the most valuable of all grasses for hay. Thrives best on moist, loamy soil. Sow early in the Spring or Fall. Sow 15 to 20 pounds per acre. **Per lb., 13c. Write for prices in quantities.**

ORCHARD GRASS

(*Dactyllis Glomerata*.)

One of the most valuable of all the cultivated grasses, blooming with Red Clover, and making with it admirable hay. As a pasture grass it is more productive than any other, and does best under close feeding. Sow 28 pounds per acre. **Per lb., 25c. Write for prices in quantities.**

ITALIAN RYE

(*Lolium Italicum*.)

A quick-growing grass, attaining a height of 2½ to 4 feet; very desirable for temporary meadows or pastures (will last from two to six years). Thrives best on soils that are slightly moist, and will even stand considerable overflow. Grows easily and bears an abundance of foliage that makes the best and sweetest hay imaginable. Sow 40 pounds per acre. **Per lb., 18c. Write for prices in quantities.**

KENTUCKY BLUE GRASS

(*Poa Pratensis*.)

One of the best grasses for permanent pasture, furnishing a constant supply of the most nutritious feed during the greater part of the year. Sow 28 pounds per acre.

For Lawns—Blue Grass is used very extensively for lawns and is found in all lawn grass mixtures. Sow 1 lb. to 400 sq. feet if used alone. **Per lb., 45c. Write for prices in quantities.**

RED TOP

(*Agrostis Vulgaris*.)

A good perennial grass. Generally sown for permanent pastures. Does best on moist or even marshy land. If the ground is not overflow land it is advisable to mix it with Meadow Fescue, Orchard Grass or Alsike Clover. Sow 14 pounds per acre. **Per lb., 30c. Write for prices in quantities.**

Meadow Fescue (*Festuca Partensis*)

Perennial; grows three or four feet high. Roots deep, thus resisting drought. It succeeds on any ordinary soil; yields a heavy crop of superior hay; one of the best grasses for pastures, being valuable to mix with other kinds. Sow alone, use 40 lbs. per acre. **Per lb., 22c. Write for prices in quantities.**

All Grass, Grain and Field Seeds Are Subject to Market Fluctuations in Price. We Will Fill Mail Orders at Price Prevailing on Date Order Is Received.

GRASS SEEDS—Continued

ENGLISH RYE GRASS

(*Lolium Perenne*.)

A strong growing hardy perennial grass, noted for its nutritive qualities. It is equally valuable for both grazing and hay. Forty pounds per acre.

For Lawns—This is used and recommended by many gardeners. If sown thickly it makes a fine lawn, and for large grounds and parks it is very successful. **Per lb., 18c. Write for prices in quantities.**

CANADIAN BLUE GRASS

(*Poa Compressa*.)

Recommended in all pasture mixtures on dry soil; thrives well on clay or hard trodden and poor soil. Sow 28 pounds per acre. **Per lb., 33c. Write for prices in quantities.**

Tall Meadow Oat Grass (*Avena Elatior*)

—Often attains a height of three to four feet by the middle of June. Makes splendid hay and thrives on sandy loam, but makes its best growth where there is some clay. Can be fed as a pasture grass, and will generally bear cutting three times. For mixing with Perennial Rye and Alfalfa for sandy soils it is excellent. Sow about 30 to 40 pounds per acre alone, or half that amount if mixed with the above varieties. **Per lb., 40c. Write for prices in quantities.**

Mesquite (*Holcus Lanatas*)—It is usually sown on virgin soil, without cultivation, after the ground has been burned over.

Sow about 35 pounds to the acre chaff seed; hulled 15 pounds per acre. Fancy Hulled Seed, **Per lb., 25c. Write for prices in quantities.**

Sheep Fescue (*Festuca Ovina*)—Grows freely in high, dry and open pastures. Its chief merit is for sheep pasture. Thirty five pounds to the acre. **Per lb., 70c; Write for prices in quantities.**

Hard Fescue (*Festuca Duriuscula*)—Fine, rather dwarf, justly noted for its drought resisting qualities. Valuable as a pasture for sheep. Sow 20 pounds per acre. **Per lb., 75c. Write for prices in quantities.**

Red or Creeping Fescue (*Festuca Rubra*)—Forms a close turf and is valuable for lawn and golf mixtures; thrives in sandy soils along the Coast (14 lbs. to the bushel.) **Per lb., 90c. Write for prices in quantities.**

RHODE ISLAND BENT

(*Agrostis Canina*.)

Resembles Red Top. Makes a close sod; valuable for permanent pastures and meadows. Twenty-eight pounds per acre. For lawns, use 12 to 15 pounds per 50-foot lot. Gives good results. **Can't Supply.**

CREEPING BENT GRASS

(*Agrostis Stolonifera*.)

Well adapted for sandy pastures, near the Coast, and good for pasture on low lands. If sown alone, use 25 pounds per acre. Excellent for lawns. Use 12 to 15 pounds per 50-foot lot. **Can't supply.**

GRAIN AND FIELD SEEDS

Grain and Field Seed Prices Subject to Change without Notice—Write for Prices

OATS

Swedish Select

A SPLENDID VARIETY; UNEQUALLED IN QUALITY

Swedish Select has long been popular, and a splendid variety for Puget Sound country. It yields very heavy crops, makes a very sturdy growth; the straw is of medium height and is extra large, making it less liable to lodge than any other variety. In quality it is by far the best of any oat that we have tested. It has a large spreading head, and the grain is large, plump, and very heavy. It is one of the very earliest varieties, and on account of its exceptionally fine quality and heavy yield is probably the most valuable variety grown in the great oat growing sections in Washington. **Price per lb., 5c; Write for Prices in Quantities.**

GRAY WINTER

This Oat is planted extensively throughout the Northwest as a Fall or Winter Oat. Is well and favorably known, being a good yielder, and the Oats are large and plump. **Price per lb., 5c. Write for prices in quantities.**

BEARDLESS BARLEY

Beardless—The earliest barley known. The straw is about the height of the Common Barley, but better, and will stand up on any land; with good season and land, has produced 80 bushels per acre. Sow as early as you can; frost does not hurt it. Many farmers will not grow Barley on account of the long, harsh beards which are so disagreeable in threshing, although it is a profitable crop. This is beardless, and as easy to grow and handle as oats. It is becoming more popular each season. **Per lb., 5c. Write for prices in quantities.**

White Hulless, or Bald Barley—A grand barley for stock feeding. Grain plump, heavy and when threshed is hulless, like wheat. A heavy cropper. When grown and cut for hay it produces a magnificent fodder, which is very rich and almost equal to a grain feed. Much relished by horses and stock of all kinds. An excellent hog feed. **Per lb., 6c. Write for prices in quantities.**

Field Peas—Field Peas are a very profitable crop and are grown here very extensively. They can be grown alone or with oats. When planted with grain and cut green they make a large amount of very rich feed; also very valuable for enriching the soil if plowed under. The dry peas make excellent hogfeed and are quite fattening. Sow, if alone, 120 pounds to the acre; if with other grain, 60 pounds.

Yellow Canadian—These small, round, smooth yellow peas are the most generally grown field peas for stock food, and great quantities are also used for human consumption. **Per lb., 8c; Write for Prices in Quantities.**

Green, or Bluebell—The seed is larger than the Yellow Canadian, and it has a bluish color, but is very similar in all other respects. **Per lb., 9c. Write for prices in quantities.**

Speltz—It will grow well and produce immense crops on poor soil. Dry weather seems to have no bad effect on it. After the grain is threshed out, the straw makes good hay. The grain has a hull, something like barley. Sow in the Spring, the same as wheat, at the rate of two bushels per acre. Cut when the grain is past the middle stage of milk, when it will make splendid grain and lots of rich straw hay. Thresh like wheat, only not so closely. Can be feed whole, rolled like barley, or ground. **Per lb., 6c; Write for prices in**

GRAIN AND FIELD SEEDS—Continued

WHEAT

BLUE STEM—Spring

The best known and one of the most profitable Spring varieties for the Northwest. Heads are large and well-filled, stools freely. Grain very hard. Although a Spring variety, can be planted as a Fall Wheat in sections where Winters are mild. The Blue Stem of the Pacific Coast has a white grain and smooth chaff, quite unlike the Velvet Chaff and Red grains of the states East of the Rockies. Better results are had with this Wheat East of the Cascade Mountains, as it has a tendency to lodge in the moist sections on the Coast. **Price lb., 5c; Write for Prices in Quantities.**

RED RUSSIAN—Winter

This is extensively grown in Western Washington, where conditions are favorable. It grows vigorously, maturing late, and gives a heavy yield of both grain and foliage. It is a superior variety for choking out weeds, growing close and luxuriantly. **Price lb., 5c; Write for Prices in Quantities.**

VETCHES OR TARES Greatest Forage Plant

Common, or Spring (Vicia Sativa)—One of the best forage plants that can be grown on the Pacific Coast. Often called Fall Vetches. This is a species of the pea, and is grown very extensively. It furnishes an abundance of excellent feed, either green or cut and cured for hay. The seed should be mixed with an equal weight of some variety of wheat, oats or rye having a stiff straw, and the mixture sown at the rate of two bushels per acre. Vetches weigh 70 pounds per bushel. Sow in the Fall or early Spring. **Per lb., 7c. Write for prices in quantities.**

MILLETS

Golden—An improved variety, yielding a larger crop of seed than the Common Millet. It is also taller than the Common, and yields a heavier crop of hay. **Per lb., 15c. Write for prices in quantities.**

Common—A well-known variety growing from three to four feet high; has broad blades and strong stalks. **Per lb., 15c; Write for prices in quantities.**

ARTICHOKE TUBERS

Jerusalem—Grown especially for hog feed and often yields 20 tons to the acre. **Write for Prices.**

Hungarian Vetch is the result of a period of development by the Oregon Agricultural College at Corvallis. It is a hardy, drought and aphid resisting vetch and is good on wet lands. **Price per lb., 12c. Write for prices in quantities.**

Sand, or Winter Vetches (Cicia Villosa)—This variety thrives on poor, arid, sandy soils. It is sown either in the Fall or early Spring, and is generally mixed with rye, which serves to support the plants. It grows to a height of three or four feet, and can be cut twice; first, as soon as the bloom appears, and afterward for seed. The plant is perfectly hardy and makes a very nutritious food. **Per lb., 25c. Write for Prices in Quantities.**

Rape, Dwarf Essex—We offer you true, pure seed. One of the best forage plants, on account of the large amount of green feed it will produce at a season of the year when everything else is dried up. It has yielded ten tons of green forage per acre, and has twice the feeding value of green clover. Sheep, swine, cattle and poultry eat it readily. Rape will do well on almost any soil. Prepare the ground as for turnips, and sow any time from May till September; or plant it with grain. Sow, per acre, four pounds, in drills; or, if broadcast, eight pounds. **Lb., 20c. Write for prices on quantities.**

BUCKWHEAT

Japanese—Ripens early—is hardy and yields the largest crops. The grains are extra large, dark brown, very thin hulled and makes the highest grade of flour. Good seed stock has been very scarce for several seasons, but we now have a fine lot which we can offer at a very low price. **Per lb., 9c. We will gladly quote prices on large quantities.**

SUNFLOWER

Mammoth Russian—The largest and most productive variety. It makes one of the very best of foods for poultry; a great egg producer. **Per lb., 15c. Write for prices on quantities.**

FLAX SEED

We have a splendid lot of selected re-cleaned Western-grown Flax, new crop, large plump seed. **Per lb., 15.**

Ground Flax for medicinal uses. **Per lb., 20c.**

BIRD SEED

Not for Planting

P. S. & I. Co.'s Best Mixed, **per lb., 15c.**

Canary—Best Re-cleaned, **per lb., 15c.**

Hemp, **per lb., 15c.**

Millet, **per lb., 15c.**

Rape, **per lb., 15c.**

Cuttle Bone, Large Bone, **per oz., 10c.**

Sunflower for Feed, **lb., 15c; 10 lbs., \$1.25**

IMPORTANT—READ CAREFULLY

Clover, Grass and Field Seeds are subject to market changes, therefore we can not print prices good for any length of time. When ready to buy, write us for special prices, stating quantity wanted, or send in your order at catalog prices. **We guarantee that we will give you full value for the money sent,** whether the price at the time you order be higher or lower, or if the difference is very great, we will notify you before shipment.

We Don't Pay Postage on Clover, Grass or Grain Seeds—See Inside Front Cover for Rates

Poole's Quality Sweet Peas and Flower Seeds

NEW SPENCERS—The new "Spencer type has lovely waved and fluted flowers of gigantic size and exquisite colorings, length of stem, and lasting qualities are much superior to older types. "Spencers," however, are very shy seeders and require much careful selection to develop fixed types. The seed is therefore scarce, and cannot be cheaply produced.

WHITE

KING WHITE — The newest and most magnificent white; of perfect Spencer type; the immense petals gracefully frilled—are a pure white of wonderful substance. **Pkt., 10c; oz., 50c.**

CONSTANCE HINTON — Decidedly the best black-seeded, white flowered variety. Flowers are of large size, and come at times with a decided blush tinge. **Pkt., 10c; oz., 50c.**

WHITE SPENCER — A pure white flower of enormous size, beautiful crinkled and fluted, of splendid substance. **Pkt., 10c; oz., 50c.**

PINK

ANNIE BOWNASS — Flowers of largest size. Color rich, bright pink, heavily suffused salmon and amber on white ground. **Pkt., 10c; oz., 50c.**

ELFRIDA PEARSON — The color is a lovely pink; buds and flowers tinted with salmon-pink. **Pkt., 10c; oz., 50c.**

HEBE—One of the latest. Giant clear rose pink of perfect form. **Pkt., 15c; oz., 75c.**

COUNTESS SPENCER—Pink. Improved strain. Flowers extremely large, beautiful expanded, crumpled and waved. Color soft shell pink, deeper at the outer edges. **Pkt., 10c; oz., 50c.**

Enchantress—1918 Novelty; early flowering, rosy pink. **Pkt., 10c; oz., 75c.**

FLORENCE MORSE-SPENCER—Deep blush pink. The flowers are extremely large, of the finest open wavy type; they are borne upon strong, stiff stems, four flowers to stem. **Pkt., 10c; oz., 50c.**

HAWLMARK PINK—This most beautiful Sweet Pea is unsurpassed for either exhibition or general cutting purposes. The color is a most beautiful shade of rich rose-pink, deeply flushed and shaded with salmon. The wings are bright rose-pink, whereas the standard is somewhat lighter in color and slightly toned down with salmon. Large well waved blooms, usually borne in fours. **Pkt., 10c; oz., 50c.**

HERCULES—A magnificent soft rose-pink. The standard frequently measures two and one-half inches in diameter. **Pkt., 10c; oz., 50c.**

MARGARET ATLEE—Rich, glowing pink on cream ground. **Pkt., 10c; oz., 50c.**

MRS. HUGH DICKSON—Buff apricot and rose, large Spencer. **Pkt., 10c; oz., 50c.**

Royal Scott—A magnificent new red that does not burn. The color is glowing orange-scarlet. Flowers large and handsome. **Pkt., 10c; oz., 50c.**

King Edward Spencer—Bright crimson scarlet, largest size, wavy standard; drooping wings, very long stems; one of the finest bright reds. **Pkt., 10c; oz., 50c.**

Geo. Herbert—Our own select strain; a bright rosy-carmine, open form, beautifully waved; a magnificent, vigorous Sweet Pea of giant size. **Pkt., 10c; oz., 50c.**

Vermillion Brilliant—Pure scarlet; one of the best of the latest novelties. **Pkt., 10c; oz., 50c.**

LAVENDER AND MAUVE

Asta Ohn—Lavender, suffused with mauve; of perfect form, largest size, 4 blossoms on long, strong stems; very vigorous. **Pkt., 10c; oz., 50c.**

Don Alvar—The flowers are of largest size. The color is a delightful soft silvery-blue or lavender. **Pkt., 10c; oz., 50c.**

The Lady Eveline—A charming shade of rosy-mauve. The beautiful large flowers are usually produced four on a stem. **Pkt., 10c; oz., 50c.**

Masterpiece—Large wavy lavender-tinted mauve. **Pkt., 10c; oz., 50c.**

ORANGE

Helen Lewis—A giant flower of perfect form; standard rich crimson orange, wings orange rose; open form, full, wavy. **Pkt., 10c; oz., 50c.**

Helen Grosvenor—A rich deep orange; the wings are salmon-rose, of extra-large size. **Pkt., 10c; oz., 50c.**

Illuminator—A brilliant orange-salmon ground, illuminated with bright cerise pink; a rare and wonderful color combination of great beauty. First class certificate. **Pkt., 10c; oz., 50c.**

Tangerine—This is the last word in orange color sweet peas. Deep orange, almost approaching the color of a tangerine orange. Flowers of great size, beautifully waved and well placed. **Pkt., 15c; oz., 75c.**

CREAM OR PRIMROSE

Primrose Spencer—A pronounced primrose or creamy white; excellent flower. **Pkt., 10c; oz., 50c.**

Dobbies Cream—Large deep cream, perfect form. **Pkt., 10c; oz., 50c.**

BLUE AND MAROON

Wedgewood—The best blue Spencer is a unique shade of lovely light blue. **Pkt., 10c; oz., 50c.**

Warrior—Color rich maroon, flushed with bronze. The flowers are of great size, perfectly formed and placed. **Pkt., 10c; oz., 50c.**

Splendor—One of the newest of sweet peas. The color is a rich mahogany-maroon, of giant size. **Pkt., 15c; oz., 75c.**

PURPLE—LILAC—HELIOTROPE

Royal Purple—The color is a rich, warm, rosy purple, the younger flowers having a slightly softer color tone. **Pkt., 10c; oz., 50c.**

Irish Belle, or Dream—A lovely rich lilac, flushed with pink. **Pkt., 10c; oz., 50c.**

Rosina—A rich rosy heliotrope with darker shadings in the folds of the standard, the wings bluish heliotrope cream ground. **Pkt., 10c; oz., 50c.**

Senator Spencer—Claret and chocolate stripe, on light ground, large and most distinct, much admired; a profuse bloomer. **Pkt., 10c; oz., 50c.**

MIXED

Poole Superb Spencer Mixed—A splendid, well blended mixture of all true Spencer Types only. **Pkt., 10c; oz., 25c; ¼-lb., 75c.**

EARLY FLOWERING SPENCER SWEET PEAS

Six weeks earlier than the Spencers, these new early-flowering varieties begin to bloom 106 days from planting in the open ground and flower through a long season—about four months.

Early Flowering—All White. **Per pkt., 15c; oz., 75c.**

Early Flowering—Amethyst, color purple. **Pkt., 15c; oz., 75c.**

Early Flowering—Hercules, Mammoth Rosy Pink. **Pkt., 15c; oz., 75c.**

Early Flowering—Enchantress, Rose Pink. **Pkt., 15c; oz., 75c.**

Early Flowering Glitters Standard Fiery Orange, Wings Deep Orange. **Pkt., 15c; oz., 75c.**

Early Flowering—Cream, as named. **Pkt., 15c; oz., 75c.**

Early Flowering Fair Maid—Large Blush Pink. **Pkt., 15c; oz., 75c.**

CULTURE—First and most important, plant as early in the spring as the conditions will permit. Seeds should be sown at the rate of one ounce to 15 feet. Make a trench about 3 to 4 inches deep, planting seeds in the bottom about 2 inches deep, pressing the soil down firmly. After the plants are well up, thin to 4 or 5 inches apart, and draw the soil around them until the trench is filled above the level. This gives a depth to the roots, preserving the moisture. Keep the ground well worked and water if needed, an occasional soaking down being better than a daily sprinkling. Keep the flowers cut close and a pruning of the tips of the vines will also aid in prolonging the season of bloom and insuring better flowers.

POOLE'S SELECTED CHOICE FLOWERS

Worthy of Special Attention, Embracing

ANNUALS, BIENNIALS, PERENNIALS, CLIMBERS AND EVERLASTINGS

All Flower Seeds Sent Free by Mail on Receipt of the Price Placed Opposite Each Variety

ACROLINIUM

(Everlasting Flower.)

Mixed—All colors, Annual. Pkt., 10c.

AGERATUM

Mexicanum—Light blue; annual; 1½ ft. Pkt., 10c.

Dwarf Blue—9-inch; fine for edgings. Pkt., 10c.

Mixed Single—Fine colors. **Pkt., 10c.**

Giants of California Mixed—The flowers are very large and the colors embrace every conceivable shade of crimson, white, violet, lavender, etc. **Pkt., 50c.**

Dwarf Petunias—This beautiful type is particularly well suited for solid beds or borders. The plants form neat round bushes which are literally covered with thousands of flowers, beginning to bloom in June and lasting until frost.

Snowball—Neat and compact bushes of bright green leaves covered with a mass of small white star-shaped flowers. Snowball looks particularly well in solid beds. **Pkt., 10c.**

Inimitable—The white flowers are attractively starred and striped with contrasting rich crimson. **Pkt., 10c.**

Bedding Petunias—The Bedding Petunias of a spreading growth, and much used for large beds or in broad and irregular borders. They bloom freely and grow luxuriantly even under adverse conditions. Recommended for porch boxes.

Rosy Morn—The throat is silvery white shading to soft rose-pink toward the edges of the flowers. Very dainty and beautiful. **Pkt., 10c.**

General Dodds—The large and well-shaped crimson flowers are borne continuously throughout summer and fall. **Pkt., 10c.**

Howard's Star—The flowers are of good size. They are attractively marked with a distinct five-pointed white star on purplish crimson ground. The bushes are simply covered with flowers. **Pkt., 10c.**

PHLOX DRUMMONDI—Flame Flower

The hardy annual Phloxes are dazzling in effect, particularly so when grown in masses or ribbon beds of contrasting colors. Few flowers are so easy to habit, from seed, so pretty and compact in habit, so quick to bloom, or give such a brilliant display of color for so little cost and care.

Alba—Pure white flowers borne in profusion all Summer. **Pkt., 10c.**

Chamois-Rose—A soft shade. **Pkt., 10c.**

Grandiflora—Choice mixed. **Pkt., 10c.**

Kermesina Splendens—Vivid crimson; extra large flowers. **Pkt., 10c.**

PINKS—Dianthus

The Dianthus family embraces some of the finest of all flowering plants. The blooms are of the richest and most pleasing colors, and nothing can surpass the exquisite fragrance of some varieties. They are hardy, and become perennial in warm climates.

Double Mixed China Pink—All best colors. **Pkt., 10c.**

Heddwigii, Single Mixed. $\frac{1}{4}$ -oz., 25c; **Pkt., 10c.**

Imperial Double Mixed. **Pkt., 10c.**

Plumarius. **Pkt., 10c.**

FLOWER SEEDS—Continued

Shirley Poppy

PORTULACA—Rose Moss

Brilliant dwarf annuals, only six inches high, luxuriating in warm situations, and blooming profusely from early summer to autumn. For low beds and masses of color from spring until frost, they are indispensable; colors range through innumerable shades of red, yellow, pink, white, striped, etc.

Single Mixed. Pkt., 10c.

Double Mixed. Pkt., 10c.

PRIMROSE—Evening Primrose

The *Oenothera* or Evening Primrose blooms all summer very freely; the bright, poppy-like flowers open early every evening and last well into the next day; of the easiest culture in sunny situations.

Oenothera, Mixed Annual Varieties. Pkt., 10c; oz., 25c.

RICINUS—Castor-Oil Plant

Picturesquely showy and imposing, the *Ricinus* gives to the garden magnificent semi-tropic effects. Grown as a specimen, it makes a perfect pyramid of gigantic leaves.

Borboniensis *Arboreus*—Green foliage; 15 ft. Pkt., 10c.

Cambodgensis—Glistening dark maroon; stems black; 5 ft. Pkt., 10c.

Hybridus *Panormitanus*—Cross between *Cambodgensis* and *Zanzibariensis*. Huge dark brown leaves, blue-powdered stems; upright habit. Pkt., 10c.

SALPIGLOSSIS—Painted Tongue

Produces very showy, funnel-shaped flowers of large size. Fine for beds. Half-hardy annuals.

Fine Tall Mixed. Pkt., 10c.

Fine Dwarf—Mixed. Pkt., 10c.

POPPY—Papaver

Before tulips are fairly gone, our gardens begin to be gay with Poppies. Few flowers have the same grace of stem, airiness of poise and delicacy of tissue. For beds and borders with a background of green there is nothing finer.

Oriente *Brilliant*—Vivid scarlet; beautiful; perennial. Pkt., 10c.

Nudicaule—(Iceland Poppy.) These dwarf, bright yellow Poppies form one of the chief attractions of the garden through several months. They are most beautiful when grown in masses from seed sown every year; 1 ft. Pkt., 10c.

Shirley, *Santa Rosa* *Hybrids*—Beautifully crimped petals; shades of blue, lavender, salmon, etc. Pkt., 10c; oz., 50c.

Glaucum—(Tulip Poppy.) Striking, tulip shaped flowers of intensely brilliant scarlet; dwarf. Pkt., 10c.

Double, *American Flag*—White, bordered with scarlet, and exceedingly brilliant flowers. Pkt., 10c.

Double Mixed, *All Sorts*. Oz., 30c; Pkt., 10c.

Flander Poppy, Pkt., 10c; oz., 40c.

California Poppy—(See *Escholtzia*.)

SALVIA—Flowering Sage

Very ornamental; flowers borne in spikes of fiery red or crimson, and continue in bloom in open ground until after severe frosts. Start in heat and transplant into light soil, one to two feet apart. Excellent for bedding in masses or single planting. Hardy annuals.

Salvia *Zurich*—New Dwarf Early. The finest of all Dwarf Salvias. Very floriferous. Pkt., 10c.

Bonfire—(Clara Bedman). One of the finest Salvias ever introduced; compact bush about two feet in height and diameter. Its erect spikes of flowers of brilliant scarlet stand clear above the dark green foliage and completely cover the plant. Pkt., 10c.

SCHIZANTHUS — *Butterfly Flower* — Beautifully fringed and delicately colored flowers so numerous as to hide the foliage. Splendid bedding plant. Seeds sown in open come into bloom in a few weeks. Fine pot plant for house in winter. Height 1 to 2 feet. Mixed colors. Pkt., 10c; ¼-oz., 50c.

SMILAX

A well known greenhouse climber, with small, dark, green foliage; of great value in floral work; 8 ft. Pkt., 10c.

SNAPDRAGON—Antirrhinum

One of the most useful and showy of border plants of almost every color, and striped as beautifully as Carnations. They have recently been much improved and are now really magnificent. Hardy perennial.

TALL VARIETIES—

Album—White. Pkt., 10c.

Delicate Rose. Pkt., 10c.

Mixed. Pkt., 10c.

BONFIRE—Lovely orange pink. Pkt., 10c.

TALL, LARGE FLOWERING VARIETIES

Blood-Red—Fine color. Pkt., 10c.

Queen Victoria—Pure white. Pkt., 10c.

White—Beautiful for cutting. Pkt., 10c.

Yellow—A pure, soft color. Pkt., 10c.

Large Flowered, *Mixed* — Fine. ¼-oz., 30c; oz., 75c; Pkt., 10c.

FLOWER SEEDS—Continued

STOCKS—Double Ten Weeks

These popular flowers are easily grown, and are so highly fragrant and of such beauty that they deserve a place in every garden. Half hardy annuals.

Large Flowering Dwarf Pyramidal—Finest mixture. **Pkt., 10c.**

Dwarf Large Flowering—Long, splendid spikes; large double flowers. **Pkt., 10c.**

Mixed. Pkt., 10c.

DRESDEN PERPETUAL, OR BRANCHING

"Cut-and-Come-Again"—Double white **Pkt., 10c.**

SUNFLOWER—Helianthus

Stately growing annuals with immense golden yellow flowers; effective for garden decoration.

Argyrophyllus—(Texas Silver Queen). Has handsome silvery foliage and a profusion of small, elegant, single flowers; 4 ft. **Pkt., 10c.**

Cucumerifolius Orion—A very handsome variety, with petals twisted like those of the best cactus dahlias; long, stiff stems; excellent for cutting. **Pkt., 10c.**

Cucumerifolius Hybridus f. pl.—A splendid mixture of double and semi-double sorts. **Pkt., 10c.**

Double Globe Flowered—Ball shaped; blooms late; 3 ft. **Pkt., 10c.**

Double Macrophyllus Giganteus—Huge leaves and yellow flowers; 5 ft. **Pkt., 10c.**

SWEET WILLIAM—Dianthus

Barbatus

A well known, remarkably free flowering plant of brilliant colors, ranging from

snow white to darkest crimson and purple. They emit a very delicate and refreshing fragrance. Hardy perennial.

Single Mixed—Very beautiful. $\frac{1}{2}$ -oz., **25c; Pkt., 10c.**

Double Mixed. Pkt., 10c.

TRITOMA

Sometimes called Red Hot Poker. This is a fine handsome plant. It is hardy, though requiring some protection through the winter. The flowers are produced in large spikes of brilliant rich colors. Cut flowers keep a long time. Half hardy perennial.

Mixed New Hybrids—Strikingly handsome, 2 to 5 ft. **Pkt., 10c.**

VERBENA

Very few annuals will make such a gorgeous display during the summer months, or furnish more flowers for cutting, than the Verbena. Start seed in the house or under glass three or four inches of growth. They flower in July and continue strong and healthy until destroyed by frost.

Hybrid Condidissima—Large trusses of purest white flowers. **Pkt., 10c.**

Hybrid Coerulea—Bright blue in various shades. **Pkt., 10c.**

Hybrid Defiance—Intensely brilliant scarlet; fine for bedding. **Pkt., 10c.**

Double Scarlet—Different shades. **Pkt., 10c.**

Hybrida Finest Mixed—Extra choice. **Pkt., 10c.**

Hybrida Mammoth, Rose Queen—Brilliant rose colored flowers, 1 to $1\frac{1}{4}$ inches across when well grown, produced in magnificent large umbels. **Pkt., 10c.**

VINCA—Madagascar Periwinkle

Handsome, bushy bedding plants, that flower luxuriantly and most profusely all summer from seed sown in February or March in heat; fine also for pot culture in window garden, or greenhouse; 1 to $1\frac{1}{2}$ ft.

Mixed. Pkt., 10c.

VIOLET—Sweet Scented

(Vilva Odorata)

Much prized for spring blooming. All the varieties have great beauty, are very fragrant and quite hardy; 6 in. Violet seed takes a long time to germinate.

Blue. Pkt., 10c.

The Czar—Very large; dark blue. **Pkt., 10c.**

VIRGINIA STOCK—Malcomia Maritima

Early and very free flowering, dwarf, hardy annuals of easy culture; bright blossoms; most effective for edgings or beds; 1 ft.

Crimson King—Very fine. **Pkt., 10c.**

WALL FLOWER—Cheiranthus Cheri

Produces spikes of beautiful, exceedingly fragrant flowers. Half hardy perennials.

Single Mixed—Large flowering. **Pkt., 10c.**

Double Dwarf Branching Mixed. Pkt., 10c.

ZINNIAS

ZINNIAS—The New Dahlia Flowered—This is a new and distinct race of Zinnia, which will greatly increase the popularity of this flower. The plants of this new race are very sturdy and produce many flowers with stout stems. The flowers in full bloom often measure four inches in depth and six to eight inches in diameter. In general appearance they compare favorably with the Show Dahlias. Easily grown from seed sown in the open and thinned to one foot apart.

Mixed—All colors. Dahlia Flowered. **Pkts., 25c.**

Grandiflora Robusta—Double giants. Apricot yellow. Deep flesh, Golden yellow. Rose king. Salmon, Shrimp pink. White. All colors mixed. **Pkt., 10c; oz., \$1.25.**

Pumila, Dwarf Double—The best bedding variety. **Pkt., 10c.**

Pompon. Mixed—Small globe-shaped flowers. **Pkt., 10c.**

Picotee Type—The flowers, which are not quite as large as the Double Giants, are very effective in appearance, as the edges of the petals are all well marked with a distinct color to the body of the flower, making them very attractive as bedders and cut flowers. **Pkt., 15c.**

POOLE'S HIGH GRADE FERTILIZERS

The Base Is Bone Meal and Tankage—No Cheap Filler. Every pound Is Good Fertilizer.

POOLE'S QUALITY Fertilizers are complete fertilizers of the highest grade and concentration, no inferior ingredients or cheap fillers are used in their preparation. Bone Meal and Tankage forming the base to which is added the necessary Potash, Nitrogen and Phosphoric Acid. Each package is marked plainly, showing the percentage of available plant food.

Our fertilizers contain generous supplies of vital plant food. Being highly concentrated and readily available, small quantities only are needed for the production of the finest crops. **THEY ARE QUICK IN ACTION, RELIABLE AND ECONOMICAL.**

FERTILIZING ELEMENTS

NITROGEN

Nitrogen is necessary for the production of plant life, and without it there can be no plant growth; it is a powerful stimulant, and, when present in excess, causes a rapid and excessive, but watery and unnatural growth, which is made at the expense of fruitfulness. Too much nitrogen on wheat shows its ill-effects in such a rank growth of the plant, and later, of straw, as to be unable to sustain its own weight until the grain is matured; on hops, by great growth of plant and but few blossoms, which mature fewer burrs; on fruit trees by a rapid and sappy growth which produces little fruit.

Leguminous crops (such as clover, beans, peas, etc.) draw their supply of nitrogen principally from the air, and, therefore, an artificial application of nitrogen fertilizer to this class of plants is rarely needed.

PHOSPHORIC ACID

Phosphorus in the form of phosphoric acid is necessary for the healthy growth of plants, and is essential to the best production of straw and seed. Its deficiency in a soil is shown by the want of vigor in its plant life. To produce its full effect, however, it must be used on a soil already rich in nitrogen, or to be associated with nitrogen in the fertilizer; otherwise it will produce a tall, pale and spindling growth of straw with very small increase of grain or fruit. It has a marked effect in hastening maturity and should be used freely on all crops which should be ripened early and is especially useful for increasing all crops of seed grain.

Acid Phosphate contains lime, which is valuable on such soils as would be improved by the use of land plaster, and if prepared from bone also contains nitrogen, which gives it an additional value.

POTASH

Potash is found in greater or less quantity in all soils. It is essential to the development and growth of the plant. In combination with Nitrogen and Phosphoric Acid, Potash contributes to the full and perfect development of plants. Excess of Potash does not show any special effect on the plant, but a weakened growth, a lack of fruitfulness, and especially a slow and unsatisfactory development of starch and woody fiber, follows its deficiency in the soil.

LIME

Lime is not a direct fertilizer but improves the condition of swampy and peaty soils, which consists largely of organic matter and are consequently rich in nitrogen, but this nitrogen is unavailable, owing to the slow decay of the organic matter in some of these soils, so lime furnishes the conditions necessary for a more rapid decay. Such soils sometimes need phosphoric acid and potash as well as lime.

Lime also performs a valuable office in the sweetening of soils. When a soil betrays excess of acid, lime is needed. It also makes heavy clays light and more porous, and renders the plant food in them as well as in muck soil more available. Quick-lime, marl and ground oyster shells are the more common sources of lime. To produce the results above noted lime from stone or oyster shells is more effective.

A 100-Pound Bag of High Grade Commercial Fertilizer will contain more soluble and available plant food than 4,000 pounds (two tons) of stable manure of average quality. How much easier and cleaner to handle one 100-pound-bag than two tons of manure, and there are no weed seeds to worry over. Always remember that the commercial value depends upon the available or soluble contents of a mixed fertilizer, and the price is governed thereby. The figures giving the soluble, insoluble, totals, etc., unless understood, are often misleading, apparently giving a greater percentage of the various elements than are actually available.

NOTE—As Fertilizers are sold on a small margin, prices are subject to market changes, but you will always get FULL VALUE for your money.

POOLE'S HIGH GRADE FERTILIZERS—Continued

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

POOLE'S VEGETABLE FERTILIZERS

This is an all-round fertilizer, which can be used on any crop. It is used quite extensively by our leading market gardeners, and we recommend it very highly for the garden and farm crops. Use 5 pounds 100 square feet.

Analysis: Nitrogen 4.13 per cent; Phosphoric acid 8.25 per cent; Potash 5 per cent.

Quantity per Acre

Vegetables and berries ----- 400 to 600 lbs.
Grain ----- 300 to 400 lbs.

Price: 10 lbs., 55c; 100 lbs., \$3.25.

POOLE'S FRUIT AND ONION FERTILIZER

This fertilizer is also used for Raspberries, Blackberries, etc. We sell large quantities for growing the famous Puyallup Valley Raspberries and Strawberries. Analysis: Nitrogen, 3 per cent; Phosphoric Acid, 8 per cent; Potash, 9.50 per cent.

10 lbs., 55c; 100 lbs., \$3.25.

POOLE'S LAWN AND ROSE FERTILIZER

It promotes a vigorous and healthy growth, giving the desired dark rich green appearance, it can be applied at the time the seed is planted and later as a top dressing; one hundred pounds is sufficient for an ordinary city lot, and is far more effective and less objectionable than stable manure. Remember it contains no weed seeds. When used as a top dressing it is best to make several light applications about two weeks apart. Use 5 pounds to 100 square feet. Price: 10 lbs., 55c; 100 lbs., \$3.25. Analysis: Nitrogen 4.50 per cent; Phosphoric Acid 9.00 per cent.

TANKAGE

Ground meat scraps and bone, dessicated in a vacuum, is very rich in phosphoric acid and nitrogen. Use 5 pounds to 100 square feet; per acre, same as General Fertilizer. Price: 10 lbs., 55c; 100 lbs., \$3.00.

SHEEP GUANO

Pure pulverized sheep manure is the most nutritious of the animal fertilizers. It promotes steady and rapid growth. We recommend it very highly for use in green-houses, as well as for garden purposes. **USE**—For Flowers, Roses and Lawns, apply at any time—just prior to growing season being preferable—using at the rate of one ounce to the square foot.

Price: 100 lbs., \$1.75.

POOLE'S BONE MEAL

Fine ground, is one of the best fertilizers. This is the only grade of Bone Meal, and is reduced by improved machinery to an even fineness—nothing is added. This is a very valuable enricher of the soil, and one of the most economical at present prices. Price: 10 lbs., 55c; 100 lbs., \$3.25.

NITRATE OF SODA

For immediate results Nitrate of Soda is the very best for stimulating and forcing the growth of plants or any other crop. Use one pound to a ten-quart pail of water. Apply this in small amounts some little distance from the plant. Repeat in from twenty to thirty days. Price: 10 lbs., 59c; 100 lbs., \$4.00.

SUPERPHOSPHATE

This is a concentrated form of phosphoric acid, and it is actually the cheapest form in which to buy phosphoric acid. Our present stock contains 17 to 18 per cent. available phosphoric acid. Price: 10 lbs., 39c; 100 lbs., \$2.00.

GROUND LIME ROCK

This is the best form of lime for sweetening sour soil. It is fully as effective as air-slacked lime, is more convenient and less expensive. Price: 100 lbs., \$1.15, ton, \$17.00. Can't Supply.

HYDRATED LIME

Effect on Soils

Lime acts both as a direct and indirect fertilizer. It so "fixes" the potash and phosphoric acid of the soils that there is little loss. It hastens the decomposition of either barn or green manure by increasing bacterial activity. It improves the drainage by "coagulating" the soil particles, making clayey soils open and loose, makes sandy soils more compact, thus conserving the moisture, and this naturally tends to make a WARMER soil than the soil deficient in lime. Warm soils mean quicker growth and earlier ripening of fruits and vegetables, **EARLIER MARKETS and MORE MONEY.**

Hydrated Lime in bags only of 80 lbs.

Price each, \$1.15; ton, \$24.00.

MURIATE OF POTASH

Contains a larger percentage of actual Potash than other commercial forms and is therefore, cheaper where it can be safely used, but owing to the Chlorine contained, is not best for some crops unless applied a few months previous to planting, which allows the Chlorine to leach out while all of the actual Potash is retained until taken up by the plants. **1 lb., 5c; 100 lbs., \$3.75.**

SULPHATE OF POTASH

Contains no Chlorine, can be used on any crop requiring Potash and is especially adapted for mixtures, being in the form of a dry powder. It is also the best form of Potash for heavy soils. **1 lb., 5c; 100 lbs., \$4.25.**

FERTILIZER, IF GOOD, IS A REAL INVESTMENT NOT AN EXPENSE**

TOVASCO

THE NEW AGRICULTURAL MINERAL COMPOUND

The following editorial appeared in "California Fruitman" by the Editor, Carl H. Davis, in the December, 1923, issue and the facts as related have been verified by us.

A Fortune From Four Year Old Strawberries

"What with green gardens, fresh berries, trees and flowers waxen and vigorous, springtime in October, the Lowe Ranch at Cupertino is the Mecca of wondering fruitmen and gardeners this fall."—Editor.

This story had to break its way into this magazine. It had been told to your editor, who makes it a rule to discount propaganda. But when investigation reveals the truth of a claim, he calls things by their right name. Farmers want facts and we are in the business of gathering facts for fruitmen. It was to get facts that we visited the Lowe Ranch at Cupertino, Santa Clara County, on the 16th of October.

"Last spring we had a real problem to solve," said S. W. Lowe, manager of the ranch. "Our berry fields were in bad shape. To begin with, they were four years old, an age when most gardeners abandon strawberry beds. And they were infested with insect pests. The roots were alive with borers, the tops with spider and mildew. There was no young growth; it was a pasture for bugs."

The neighbors were consulted. They said, "It's no use. They are four years old. Haven't you got a plow?" Confronted with the loss of thousands of dollars, experts were called in. There was no question but that they were experts. They admitted it themselves.

It was no "hung jury," the verdict was unanimous. They said, "Plow them under."

"Well," said Mr. Lowe, "the more I see of 'experts' the better I like my dogs; there's no fleas on them." About this time we heard of a new mineral fertilizer, for which exceptional claims were being made by the producing company, and I took a trip to Oakland and looked up their field representative.

"The field man went to the ranch and after a careful survey said he would at least make a suggestion. Instead of plowing under the entire eighty acres of strawberries, we might put Tovasco on twenty acres of it and watch results.

"That advice brought me in more than \$20,000," said Mr. Lowe, "but I am getting ahead of my story. We bought 95 sacks of this product, a hundred pounds to the sack, at a cost of \$260. J. F. O'Keefe, the superintendent of the ranch, had the time of his life getting it spread over the berries. The men, who were all experienced market gardeners, thought we had been 'stung' by some agent and didn't relish being laughed at by all the neighbors. They spread it carelessly.

"Two weeks later the berry patch was green everywhere but in the spots where they had missed. Those berries fairly burst out of the ground. All clean, bright, young growth and not a sign of bugs on either roots or tops. Before we put Tovasco on you could pull a plant out anywhere and its roots would be alive with bugs.

"After spreading, we irrigated the field well, carrying the fertilizer down into the soil. When we got back onto the field again you could pull up a plant anywhere and not a pest could be seen. They had parted company with this place."

We were sitting in a semi-closed veranda of a typical California fruitman's home, a combined office and living room. Grizzled old oaks threw heavy shadows across the sunlit yard, where a pair of full-blooded Irish terriers were tumbling over each other in puppy-dog abandon.

"But did you raise any strawberries, Mr. Lowe?" Here was the kernel of the matter. Your editor hears frequently of pest control, but would this Tovasco produce fruit? That was the question. Mr. O'Keefe, the ranch superintendent, brought out the books.

The following figures, copied by your editor from the packinghouse record of receipts tell the story. The total from the twenty acres for each month was:

April, \$2,495.25, May, \$1,408.56, June \$2,872.23, July \$765.25, August \$2,405.38, September, \$1,232.80, October (to 16th) \$726.87. Total \$24,606.87.

"And that is not all," said Mr. Lowe, "we are still picking."

We went out into the fields. The picking was still on. The strawberries were bright, firm and very sweet. A vegetable garden, also fertilized with Tovasco, was fresh with an "after the rain" brightness. Cabbage, tomatoes, peas, spinach, cauliflower, peppers and a half dozen other vegetables were growing with springtime vigor. Was the calendar in reverse gear? In the garden it seemed a day in June. But, no, the roadway trees were in autumn gala dress. Only here the hand of Time was stayed.

Back to the car we went, back from springtime to October. But all the time your editor was doing mental arithmetic. What percentage was earned on the investment when \$260 worth of Tovasco produced \$24,606.87 worth of strawberries.

STIM-U-PLANT

PLANT STIMULANT TABLET

Trade Mark Registered U. S. Patent Office

PLANT FOOD IN TABLET FORM

The most efficient and Scientific method of fertilizing all kinds and conditions of growing plants in home garden, house or farm.

STIM-U-PLANT is a 26 grain tablet with a guaranteed analysis of 11 per cent nitrogen; 12 per cent phosphoric acid and 15 per cent potash.

No other plant food contains anything like as high an analysis as this. Stim-U-Plant Tablets are composed of great feeding power and of known weight and percentage of plant food.

STIM-U-PLANT Tablets should be used directly in the soil at the base of the plants or dissolved in water and applied to the soil. Do not spray the foliage. No matter how rich the soil may be, these wonderful little tablets will help the plants along.

STIM-U-PLANT Tablets are packed in four sizes:

Trial Size	15 cents, containing	10 Tablets
Small Size,	25 cents, containing	30 Tablets
Medium Size,	75 cents, containing	100 Tablets

Legume Inoculation
HUMOGERM

A SEED and SOIL INOCULANT

THAT INCREASES CROP PRODUCTION AND GREATLY IMPROVES THE SOIL

Roots like this mean bigger yields — better Soil

Crop and soil experts agree that for best growth, and to put atmospheric nitrogen in the soil, it will pay all farmers to inoculate all legumes, even where they are at present successfully grown. The cost is trivial when compared with the profit it will bring you. Legumes are clovers, peas and beans, alfalfa, soy beans, vetches, and other plants that grow their seeds in a pod. Their roots are the home of bacteria that draw fertility-building nitrogen from the air and store it in swellings on the roots, called nodules. These nodules not only feed nitrogen to the crop they are on, but rot away in the ground and supply valuable nitrogen to the soil for future bumper crops of corn, wheat, cotton, oats, fruits, etc.

HUMOGERM Is Economical and Easy to Use

Humogerm carries the nitrifying bacteria in a porous humus medium which acts as a natural home for them—keeps them fresh, active and vigorous. The ventilated cans are friction top and open easily without cutting.

Place seed in pile, moisten slightly with water and a little sugar, pour on HUMOGERM, and plant in usual way. This gives thorough inoculation, and is cheaper, safer and better than the discredited, laborious soil transfer method.

How to Order

Specify crop and number of bushels you wish to inoculate. The can unit designations are on the bushel basis; for instance, the 1 bu. size contains sufficient culture to thoroughly inoculate 1 bu. of legume seed, any variety.

Special garden size for peas, beans and sweet peas, 25 cts. You will be delighted with the fine results. Prices: ¼-bu., 35c; ½-bu., 60c; 1-bu., \$1.00. 2½-bu., \$2.25.

When more than one bushel of seed is planted to the acre, the 1 bu. size contains sufficient inoculation for the amount of seed planted on one acre.

ST. HELENS INCUBATORS

**60-(70) EGG SPECIAL HOT
WATER ST. HELENS
INCUBATOR**

Double Walled, Hot water heated, copper tank and heater, safety lamp, chick nursery, self regulating.

This little hatchery is high grade and is constructed with heavy double, red cedar case and double top with felt insulation. Tank and heater is of best grade cold rolled copper of same pattern as used on the large incubators.

Weight, crated, About 45 lbs.

Price complete, \$14.00.

Above furnished all complete with safety lamp, tested thermometer, egg tester, egg tray, heat regulator and complete instruction book.

130-(140) EGG ST. HELENS HOT WATER INCUBATOR

Floor space required, 2 feet 9 inches by 2 feet 3 inches. Equipment: Large steel oil tank, safety burner and chimney, one egg tray, one removable chick nursery tray, one tested incubator thermometer, one egg tester, complete heat regulator attached, two temperature charts and complete instruction book.

Weight, crated ----- 100 lbs.

Price, \$27.00

It makes no difference whether you buy the 130-egg Incubator or any of the larger sizes, they are all constructed and fitted exactly alike and will do the same good work. For the beginner and small poultry raiser the 130-(140) egg incubator is an ideal hatcher. This is also an excellent machine to use as tender with the larger incubators. Start both at the same time and then when the infertile eggs are tested out you can generally fill the large incubator completely full of fertile eggs to finish the hatch and then start this small incubator with another incubator as tender and make double use of it.

I have one of your incubators which has been in use since 1906 and is still giving good satisfaction.

LE ROY MASSEY, Wallace, Idaho.

ST. HELENS ELECTRIC INCUBATORS

Floor space required, 2 feet 9 inches by 4 feet.

Equipment: Large steel oil tank, safety burner and chimney, two egg trays with removable racks, two removable nursery trays, one tested incubator thermometer, one egg tester, turning racks, complete heat regulator attached, two temperature charts and complete instruction book.

Weight, crated, 160 lbs.

Price for 260 to 280, \$42.00.

Complete incubator catalogue sent on request.

260-(280) EGG ST. HELENS INCUBATOR

Each of the latest improved model St. Helens Incubators of 130 eggs and larger, are fitted with our removable egg tray rack. This is a great convenience and a new idea found only in a St. Helens Incubator. It enables you to tray up the eggs in a convenient method and makes the turning very easy and quick.

390-(420) EGG ST. HELENS INCUBATOR

Equipment—Large steel oil tank, safety burner and chimney, four egg trays fitted with removable egg racks, four removable chick nursery trays, one tested incubator thermometer of best make, one egg tester, four turning racks, complete heat regulator attached, two temperature charts and complete instruction book.

Floor space required, 2 ft. 9 inches by 7 ft.

Weight, crated, 250 lbs.

Price for 520 to (560), \$69.00.

520-(560) EGG ST. HELENS INCUBATOR

The latest improved 1923 model 560-egg incubator is an ideal incubator for baby chick hatcheries and the larger poultryman. The large steel oil tank eliminates the filling of the lamp every day, which is the case with the small founts furnished with most incubators.

It has adjustable sash locks, compound top, metal fireproof ends outside the regular double wood ends, making an extra warm air insulated space; also metal bound top and deeper egg chamber. The finest constructed hatcher that we have ever manufactured.

NONE BETTER AT ANY PRICE

ST. HELENS ELECTRIC INCUBATORS

130-(140) EGG

ST. HELENS ELECTRIC INCUBATOR

Floor space required, 31 in. by 22 in. Furnished complete ready to operate, with tested thermometer, electric egg tester, egg tray, turning rack, nursery tray, pilot light extension cord and plug, and complete instruction book.

Weight, crated, 110 lbs.

Price for 130 egg size, \$38.50.

260-(280) EGG

ST. HELENS ELECTRIC INCUBATOR

Floor space required, 31 in by 41 in. Equipped complete ready to operate with tested thermometer, electric egg tester, two egg trays with turning racks, two nursery trays, pilot light, extension cord, and complete instruction book.

Weight, crated, 170 lbs.

Price for 260-(280) egg, \$55.00.

520 to 560 EGG

DOUBLE DECK ST. HELENS ELECTRIC INCUBATOR

Floor space required, 31 in. by 41 in. Equipped the same as the 260-egg single deck as listed above. This shows the method of double-decking to save space.

We can also furnish longer legs for triple-decking when so ordered

When either double or triple decks are used they are furnished with connections for one drop cord and all decks operated from the same socket.

Weight, crated, 340 lbs.

Price for 2-Deck, \$110.00.

NOTE We believe that the St. Helens Electric and Oil operated Incubators are the best investment you can make for either price or hatch. Try one.

ST. HELENS ELECTRIC INCUBATORS

THE THREE-DECK ELECTRIC MAMMOTH

Total egg capacity from 1560 to 1680 in floor space only 61 in. by 41 in.

Three Deck, weight crated, 1054 lbs.

Two Deck, weight crated, 700 lbs.

One Deck, weight crated, 350 lbs.

PRICES

Three Deck \$282.00

Two Deck \$188.00

One Deck \$ 94.00

Capacity each Deck 520 to 560 eggs.

NOTE—For the man who wants to increase his capacity for hatching from year to year this is the finest and most economical method as it saves extra investment in additional buildings for incubation.

WRITE FOR SPECIAL DESCRIPTIVE CATALOG

BROODERS

Latest Improved St. Helens Electric Brooder

Through my double spider-web coil system in wiring this brooder, the heat is distributed evenly from outer edge to center and there is no Hot Spot or incentive for the chicks to crowd.

On a three cent heating rate this brooder can be operated cheaper than an oil stove. The No. 2 brooder can be operated for about 7c for 24 hours when filled with 200 chicks.

Regularly wired for 110 Volt. Special Order for 32 Volt

Furnished all complete with extension cord, felt yard, complete heat regulator attached, thermometer and pilot light and instruction sheet on operating brooder and feeding the chicks.

No. 2—32 in., 200-Chick Electric Brooder ----- \$22.00

No. 3—42 in., 350-Chick Electric Brooder ----- 30.00

No. 4—52 in., 500-Chick Electric Brooder ----- 38.50

No. 5—60 in., 750-Chick Electric Brooder ----- 52.00

WE BELIEVE THIS TO BE THE MOST ECONOMICAL BROODER ON THE MARKET

LATEST IMPROVED "PERFECTION" BLUE FLAME OIL BURNING BROODER STOVE

New Patented Direct Oil Feed, no danger of stoppage of oil flow, blaze will never go out. Adjustable, glass oil reservoir regulates size of blaze. One gallon common coal oil operates largest size for 24 hours. Burner and generator all metal, no asbestos wick to burn out. Constant even heat day and night, most reliable and cheapest to operate of any brooder stove. Can be used in most any kind of a tight properly ventilated room if you do not care to build a regular brooder house. This oil burning brooder stove will give a constant even heat and for that reason gives better results and with much less attention than any coal burning stove. Cap is provided with a gas tube that will carry out any fumes that might accumulate.

Made in three sizes, from 100 to 600 chicks without crowding

No. 2—32-inch canopy, 200-chick size, weight 35 lbs.	\$19.00
No. 3—42-inch canopy, 400-chick size, weight 50 lbs.	22.00
No. 4—52-inch canopy, 600-chick size, weight 65 lbs.	26.00

"PERFECTION" COAL BURNING BROODER STOVE

Burns coal, coke, brickettes or gas. I believe this to be one of the best colony coal burning Brooder Stoves that is on the market. Heavy cast iron body and grates and adjustable metal canopy. Fitted with automatic heat regulator that works on the dampers. Large fire pot that when filled with good grade of coal will last all night. These stoves are generally rated 1000 to 1200 for the latter size and 600 to 800 for the smaller one, but my idea is that this, as well as most brooder stoves, is overrated. Place about 600 or 800 under the 52-inch size and about 400 under the 42-inch size will give the best results. A room with low ceiling and about 14x14 feet for the larger stove and about 12x12 feet for the small stove would be about the ideal size. However, most any room could be made use of.

52-inch Coal Burning Brooder Stove, weight 117 lbs.	\$30.00
42-inch Coal Burning Brooder Stove, weight 95 lbs.	26.00

Please note, these stoves are much heavier casting than the common cheap stove made to sell at a lower price.

The stovepipe is extra, but all other equipment is included as shown in the picture. Three-inch pipe in 24-inch lengths, 30c each.

The 52-inch stove will hold 38 lbs. of coal, and the 42-inch size, 23 lbs.

QUEEN COAL BURNING BROODERS

No. 1— 600 Chick Size, Hover 42 inch Diameter, Price each	\$26.00
No. 2—1200 Chick Size, Hover 52 inch Diameter, Price each	30.00

BROODERS

PRIDE OF PETALUMA VENTILATING BROODER STOVES (Kresky)

Cut of
and

No. 4B
No. 2B

The stoves that get results regardless of the weather, because it provides plenty of **FRESH, WARM AIR**, constantly for the chicks. Never goes out—proper draft control. Pride of Petaluma Brooder Stove has large radiating surface, and radiates heat to the floor where the chicks are. Maintains even temperature, automatically controlled and can be depended upon during stormy weather, as it heats and cools off quickly.

No. 4B Stove, 1500 Chicks Capacity, without pipe, Price \$58.75.

No. 2B Stove, 1000 Chicks Capacity, without pipe, Price \$56.00.

THE No. 2 COMB. CANOPY

Stove is becoming one of the most popular stoves on account of its great economy in fuel costs. In fact all Kresky Stoves enjoy the highly appreciated feature. In the cut at right notice how the heat is radiated to the floor, on the backs of the chicks. This stove can be used as shown or we can supply 8-ft. or 10-ft. canopies as desired.

No. 2 Stove only, without stove pipe, Capacity 800 Chicks. Price \$45.00 without canopy.

No. 2 Stove as above with 8-ft. canopy, 600 to 1500 Capacity. Price \$62.50.

No. 2 Stove as above with 10-ft. Canopy, 700 to 1800 Chicks. Price, \$67.50.

No. 12A Brooder Stove, 300 to 1000 Capacity. Price \$49.50.

NOTICE—Stove pipe combinations as follows:

- 1 joint Galv. pipe 5x20 inch.
- 1 joint Galv. pipe 5x24 inch.
- 5 joints Black pipe 5x24 inch.
- 1 Saddle or Roof Plate for 5-inch pipe.
- 1 Hood (outside of Roof) 5-inch pipe.
- 1 Ceiling Plate.

Price for above complete is \$6.00.

The purchaser of **PRIDE OF PETALUMA** Brooder Stove who will co-operate with us in selection of a rightly built and ventilated Brooder House, and proper stove installation, can be reasonably assured of a highly satisfactory means of brooding Baby Chicks.

BROODERS AND OAT SPROUTERS

"PERFECTION" PURE AIR BROODER

(Late Improved Brooder)

(For indoor or outdoor use)

Furnished complete with O. K. Safety Lamp, Thermometer, Chick Fount and Instruction sheet.

120-Chick Pure Air Brooder, \$13.00

240-Chick Pure Air Brooder 19.25

CHEAP FEED AND HOW TO PRODUCE IT

Our "PROGRESSIVE" METAL GRAIN SPROUTER is now made in two sizes, the one illustrated being large enough for a flock up to 500 hens, and then we have a double "Progressive" Sprouter with capacity for 1500 hens or less, sprouting over three times as much as the one illustrated.

Be sure to secure good new heavy oats, as much of your success in sprouting will depend on the oats you use. Soak the oats from twelve to twenty-four hours, and for this purpose we supply the latest improved "PROGRESSIVE" sprouter with a soaking tank at the top. The picture shows the soaking tank inverted in the act of dumping the soaked oats into the top section.

The surplus water in the soaking tank as you empty each time will drain down through each section, remoistening the lower sections of oats, and then drain out through a small pipe in the bottom.

These sprouters are made from galvanized steel and will last for years.

"PROGRESSIVE" Sprouter, like cut, 500 hen size ----- \$20.00

Double "PROGRESSIVE" Sprouter, 1500 hen size ----- 46.00

MISCELLANEOUS POULTRY SUPPLIES

MOE'S SANITARY SELF-FEEDING BOXES

Made of heavy galvanized iron; soon pays for itself in preventing waste of feed. For keeping grit, shells and charcoal before the fowls at all times. 3 compartments. Weight, 2½ lbs. Price, \$1.10.

MOE'S GALVANIZED IRON DRINKING FOUNTAINS

Our galvanized Iron Drinking Fountains embody every good feature of the down-to-date drinking fountains, and we believe, are the best in use. They are easily filled, cleaned and kept clean. If placed in the shade in Summer time, the water will keep nearly as cool as in an earthen vessel.

They are much lighter than the earthenware fountains and are safer to ship. A dozen can be put in compact package for shipment, as they nest together. We offer them at a very low price.

Large size; about 1 gallon; Weight 1½ lbs. Each 75c.

STAR SANITARY FOUNTAIN AND FEEDER

For water, grit, chick food or grain, using ordinary Mason jar, either quart or half gallon. Has galvanized pan that is quickly detachable. The best fountain of this type. Price, one size only, without jar, weight ½-lb each. Each, 10c; doz., \$1.10.

McCandlish Improved Chick Feeder is the latest and most practical young chick feeder on the market. The top bar as shown in cut revolves so chicks are unable to stand on it. Made in three sizes:

	Price
12-in -----	40c
20-in -----	50c
30-in -----	75c

BLATCHFORD'S CHICK MASH

BLATCHFORD'S Chick Mash is the favored starting and growing feed of the most prominent poultry-raisers in the country. It contains all the feeds and nutriment chicks need **right from the start**. It shields them from white diarrhea, bowel trouble and leg weakness. It does not force, but, by supplying proper nourishment to each and every part of the body, promotes steady and complete development in the shortest possible time. It contains no screenings, hulls or cheap by-products from the manufacture of breakfast foods, cereal foods or scratch grains. It carries chicks **all the way**—starts, grows and matures—**without change of feed**.

10-lb. package, 80c; 25-lb. sack, \$1.70; 100-lb. sack, \$6.15

PRATTS BABY CHICK FOOD WITH BUTTERMILK

A scientific ration for the successful raising of young chicks. Uniform, pure and from finest selected grains and seeds. Pratts Baby Chick Food furnishes the material to produce bone, muscle and flesh; it is nature's food carefully combined in just such ratios as are best suited to the needs of the newly hatched youngsters, whether they are to be raised artificially or otherwise. Use a small amount for trial and you'll be convinced.

PRATTS BUTTERMILK MASH in 100-lb. Bags. Price each	7.00

Blatchford's "Fill-the-Basket" Egg Mash

THE STANDARD OF PERFECTION IN EGG MASHES

Blatchford's "Fill-the-Basket" Egg Mash is built upon the principle that the hen is an egg-making factory and that eggs are *manufactured* from the feed she receives. Consequently, her feed must be rich in materials required for egg-production. Scratch grains alone are not sufficient. They will maintain the hen's life, but *surplus* nourishment is absolutely necessary if she is to yield her maximum of eggs. Blatchford's Egg Mash successfully solves the problem of securing eggs both winter and summer. Every bag guaranteed to give satisfaction.

TRADE-MARK

25-lb. Sack, \$1.35; 100-lb. Sack, \$4.65

COW-EASE

KEEPS FLIES OFF CATTLE AND HORSES

PROTECT your cows from fly pests. They'll repay you by yielding more and better milk.

COW-EASE is the standard of its kind. A gallon will spray a cow 200 times. Never blisters nor gums the hair.

We guarantee it to give you satisfaction. Try COW-EASE on one cow and notice the difference.

COW SPRAYS

Cows are not like machines. They will not yield big quantities of milk of high quality unless they can feed in peace and comfort. Their greatest enemy is flies. Every Dairyman and owner of livestock should spray his cattle with Cow Ease during the summer season.

1 quart Cow Ease, 60c.

½ gallon Cow Ease, 90c.

1 gallon Cow Ease \$1.50.

5 gallons Cow Ease,

Special prices on Dozen Lot Orders.

CONKEY'S FLY KNOCKER

We have users who say that this is the best fly spray they have ever used. We believe them. Try it.

Prices: 1 quart, 70c; ½ gallon \$1.15; 1 gallon \$1.75.

Use one of our Continuous Spray Pumps (Listed on Page 53) for economical application of fly spray. They are efficient.

FLY-TOX

Kills FLIES, MOTHS

Mosquitoes

Bed Bugs, Fleas

Roaches, House Ants

FLY-TOX sprays into air. Penetrates cracks, crevices, and out-of-the-way places. Roaches and Bed Bugs crawl out. Another spray of FLY-TOX and they die. For moths, spray right into closet among garments; close door and moths die. FLY-TOX won't stain. Harmless to humans and animals. No dust or dirt. Pleasant odor.

FLY-TOX will rid any room of mosquitoes in five minutes. Just close doors and windows, spray FLY-TOX about and mosquitoes drop to floor. FLY-TOX has pleasant odor. Will not stain fabrics or wallpaper. Harmless to humans and animals. No dust or dirt. Easily used. Half Pint, 50; Pint, 75c; Quart, \$1.25; Gallon, \$4.00. Mouth Sprayer Free.

Lice Killer

**ZENOLEUM USED BY 46 STATE AGRICULTURAL COLLEGES
FOR CATTLE, SHEEP, HOGS, HORSES, POULTRY, DOGS**

Here is the most wonderful Disinfectant, Animal Dip and Livestock Remedy in all the world. It kills lice and vermin of all kinds. Cures sores and wounds on animals and poultry. It is very economical and can always be depended upon for positive results.

8 ounces, 35c; quart, 75c; ½-gallon, \$1.25; gallon, \$2.00; five gallons, \$8.00.

TRY A CAN ON OUR SAY SO

Zenoleum Lice Powder—This is especially prepared for poultry, but is efficient on all livestock. It does destroy lice and mites on poultry, removes fleas from dogs and lice from cattle and horses. We are positive this is the VERY BEST of all the lice powders, and we guarantee it absolutely. **Price for full one-pound package, 30c. Not prepaid. Postpaid, 37c**

CARBOLINEUM

The famous wood preserver and insecticide. Paint or spray your chicken house, hog pens, stables, sheds, etc., with Carbolineum to permanently destroy all poultry and other vermin and preserve your buildings from rot and decay. **Price, quart can, 50c; 1 gallon can, \$1.70; 5 gallon can \$8.00.**

KOW KARE

KOW KARE is different from anything ever discovered for cow troubles. It is the only cow medicine that is strictly for cows only. It is not a stock food, but a specific remedy especially for cow diseases, such as Barrenness, Scours, Milk Fever, Caked Udder, Bloating, Red Water, Swelling of the Bag, etc. It prevents abortion and removes retained after-birth. It tones up the system, renews vitality, restores appetite to cows that are "off feed," and keeps them healthy. Makes poor cows good, good cows better, and makes more money for cow owners. It increases the milk flow, and enables the cows to produce strong, vigorous calves. It's the dairyman's gold mine, and a sure profit-payer. **Price, 60c, can wt., 1¾ lbs., and \$1.20 cans, wts. 3½ lbs.**

BAG BALM

A soothing, penetrating ointment for all infections of the bag. **60c Pkgs. Wt. ½ lb.**

GRANGE GARGET CURE

An unsurpassed and positive cure. **65c cans, wt., 2 lbs.**

B - K

BACILI-KIL

Powerful Sterilizer, Deodorant, Disinfectant, Antiseptic

NOT A POISON

Phenol Coefficient 10 Plus

Ten times stronger as a germicide than undiluted U. S. P. Carbolic Acid (Phenol). Sodium Hypochlorite 3.38%, Salt 4.28%, Alkalinit n/10. Inert Ingredients 92.3%. Clean and colorless. Easy to use. Deodorizes, substitutes no odor. Made by General Laboratories, Madison, Wisconsin.

Used on farms and Dairies to sterilize fillers, cans, pails, strainers, churns, milk bottles, milking machines, cream separators. For disinfecting and deodorizing stables, floors, gutters, hog pens, poultry houses and used on livestock for wounds, cuts, contagious abortion, retained after-birth, calf scours and also in whitewash. **Every farmer should use B. K.**

WIRE FENCING

UNION LOCK POULTRY FENCE

Union Lock

Union Lock "Square Mesh" Poultry Fence
Made of two strands of No. 20 wire run horizontally with No. 19 steel wire vertical strips every three inches, the first six cables 1¼ inches apart; the next three are 1½ inches, and then 6 to 2 inches, and all above are 4 inches. This makes the fence tight at the bottom, where needed for small chicks. This fence will fit any unevenness of ground, and because of its strength and construction requires no top or bottom rail and only half as many posts as the ordinary wire netting. It is thoroughly galvanized and will last for years. The wires are not mutilated in weaving. Easy to handle, easy to build and easy to move.

		Price Per Roll

SQUARE DEAL FIELD AND HOG FENCE

Strong, simple and durable. The best fence for the money ever put out. Strand wires are waved slightly, giving an elastic tension to the fence that keep it tight and trim, absorbing all expansion and contraction due to extreme changes in temperature. Stay wires are in single piece.

THE SPECIAL FEATURE OF

Square Deal Fence, however, is its unique lock. This lock is put on by peculiarly constructed dies in a very powerful machine. The dies are so shaped that in pressing the lock over the strand and stay wire it forms a bend into both the stay and strand wires, thus clinching them together in a manner that is practically immovable, yet allowing the flexibility which is necessary in stretching over rough and uneven ground.

This lock obviates wrapping the stay wire around the strand wire or making any joints.

No. 12 1/2 SQUARE DEAL FENCE

Top and bottom wires No. 10 guage; strand and stay wires, No. 12 1/2 guage.

	Per Rod.

ECONOMY FENCE

A light weight, high quality fencing, built to meet the needs of the man who must have a low priced fence. Built with the Square Deal Lock but with lighter wire. It will give longer service than a cheap quality fence, and use less posts than the stay or hinge joint fence.

Only the best grade of galvanizing, which produces long life wire, is used in Economy Fence.

Top and bottom wires, No. 11; strand and stay wires, No. 14.

Lime and Sulphur Solution

Rex "Lime and Sulphur" Solution for San Jose scale is endorsed by experimental stations and state horticultural societies of all the fruit growing states. It is recognized and recommended as the best known preparation for exterminating San Jose on all deciduous trees. Our Lime and Sulphur Solution is made of the purest and best quality of Sub-limed Sulphur and of Lime that tests 99.98 per cent. pure. It is a clear, deep cherry colored liquid, free from sediment and is a beautiful product, is very reasonable in price, and its work is perfect. It is all ready to mix just as you get it. Merely add 11 gallons of water with each gallon of the Lime and Sulphur Solution. There is no sediment to clog the sprayers. No boiling to be done, which saves fuel, time, labor and annoyance. It is always alike and uniform in strength and results. **Prices; qt., 25c; gal., 75c; 5 gals., \$2.50; bbl., \$13.00.**

SHERWIN-WILLIAMS DRY LIME-SULPHUR

SHERWIN-WILLIAMS DRY LIME SULPHUR is not an entirely new product—it is just an improved, standard spray material that has been perfected by the Sherwin-Williams Co. It is made to supply the demand of the growers for a convenient, economical and efficient tree spray for the control of scale insects and certain fungus diseases. It is simply a practical form of Lime Sulphur which, for years has been known by growers as an effective spray material. For the usual dormant spray against scale insects such as San Jose Scale, Oyster Shell Scale, etc., from 10 to 15 pounds to 50 gallons of water. **Price, lb. can, 30c; 5 lb. can, \$1.25; 10 lb. can, \$2.00; 25 lb. can, \$4.00; 50 lb. can, \$6.75; 100 lb. drum, \$12.50.**

"CORONA" Arsenate of Lead—DRY POWDERED

Contains only Arsenic and Lead Oxides. No Fillers

Mixes quickly and easily, stays mixed longer and sticks better to leaves, branches and fruit than any other Arsenate.

"CORONA" Dry Powdered Arsenate is a light, fluffy powder that cannot freeze, dry out, cake or lose its strength—carries the highest possible percentage of arsenic oxide, 33%—is always uniform and requires only one pound to 50 gallons of water. Efficient, economical and convenient. Highest percentage of killing power. **Prices, ½-lb., 25c; 1-lb., 40c; 4-lbs; \$1.25; 10 lbs., \$2.50; 25 lbs., \$6.00.**

Black Leaf "40" For Aphis

Latest and best tobacco spray for aphis, thrip, plant lice, etc. One pound makes 170 gallons. **1-oz. bottle, 35c; ½-lb. can, \$1.25; 2-lb. can, \$3.50; 10-lb. can, \$13.50.**

NICO FUME, LIQUID

The best fumigant and spray for green-house work. Kills aphis, red spider, mealy bug, thrip, etc. **¼-lb. can, 75c; 1-lb. can, \$2.25; 4-lb. can, \$8.00; 8-lb. can, \$15.00.**

Caution Against Spraying When Trees Are in Full Bloom—Spraying when trees are in bloom may destroy bees and other insects necessary to pollinate and these natural agents should not be interfered with as their work of transferring the pollen insures bountiful crops and shapely fruit.

SPRAYS AND INSECTICIDES—Continued

For destroying and preventing maggots, grubs and worms that infest turnips, radishes, beets, rutabagas, cabbage and cauliflower, etc., also recommended for combating crown borers in strawberries.

½ pint 50c; pints, 65c; quarts, \$1.00; gals.: \$2.50.

TOVASCO

THE NEW AGRICULTURAL MINERAL FROM SURFACE MINES IN WEST TEXAS

Experiments conducted in California, have proven this to be a wonderful Insecticide for the protection of growing crops, from ROOT MAGGOT, WEEVILS, ground insects and bugs. We recommend a trial of Tovasco on your own place for the control of the crop destroying ROOT PESTS. READ the story of the Lowe Ranch at Cupertino, California, which appeared in the Magazine "California Fruitman" and written by its editor, Mr. Carl H. Davis. See page 39. Try it for yourself.

SPRAY PUMPS AND SPRAYERS

AUTO SPRAY NO. 26

The Auto-Spray No. 26 is so designed that excessive pressure generated on the down stroke of the plunger allows this sprayer to generate a continuous mist-like spray. The bowl can be detached from the pump for filling.

Auto-Spray No. 26A, 1 qt., all tin, \$1.00.

Auto-Spray No. 26B, 1 qt., tin pump, brass tank, \$1.25.

No. 326

No. 326—Air chamber 14½ inches in length and 1¾ inches in diameter; holds about 1 quart; all tin. **Price 50c.**

No. 323—Same as No. 326, except it has galvanized tank with tin tube. **Price 60c.**

AUTO-SPRAY No. 9—COMPRESSED AIR SPRAY PUMP

The Auto-Spray No. 9 is a screw top, with following exclusive features. The pump handle is malleable iron and the can collar on both galvanized and brass sprayer is of brass, also the locking nut. With both of these parts made of brass it is impossible to have them corrode and stick so tight that they cannot be unscrewed. Packing ring on tank is held in place by a flange pump collar which floats so that it does not have to turn in its seat. This insures perfect lock and long life. Tanks are well riveted and soldered both inside and outside.

SPECIFICATIONS—Capacity 3½ gallons; height 2 feet; diameter 7 in.; furnished with 2 feet ½-in. 5-ply hose and our KLOG-PROOF, AUTO-POP Hand Grip Automatic Nozzle. This nozzle made with pipe thread and can be used with ordinary pipe extension.

AUTO-SPRAY No. 9-D, Galvanized Tank. **Price, \$6.50.**

AUTO-SPRAY No. 9-B, Brass Tank. **Price, \$9.00.**

SPRAY PUMPS AND SPRAYERS—Continued

LOWELL COMPRESSED AIR SPRAY PUMP

NOTE THESE EXCLUSIVE POINTS

1. It is devoid of complex or intricate parts and is the easiest understood Compressed Air Sprayer in the world.

2. It is both automatic and positive in its action.

3. One charge is sufficient to expel entire contents of tank.

4. Each sprayer is thoroughly tested with both air and water pressure.

5. Machine can be easily washed and aired after using.

6. It is so simple in construction that a child can operate it.

Tree attachment and funnel, for filling, with brass wire strainer with each machine. Strongest Air Pressure Sprayer made—will stand five times the air pressure necessary to operate. Convex heads, seamed and soldered. Capacity of tank 3 gallons. Handy to carry; shoulder strap with each machine. No. 110—Galv. Steel, Aluminum Fin., \$6.50. No. 111—Brass, Polished and Lacquered, \$9.00.

3-foot extension; brass, \$1.00.

LOWELL COMPRESSED AIR SPRAY PUMP

LEVER HANDLE BUCKET PUMP NO. 31

The lever handle and large air chamber make this the most powerful bucket pump and the easiest one to operate. All working parts are solid brass with brass ball valves and patent agitator. Fitted with graduating Vermorel nozzle to throw a fine or coarse spray or a solid stream. Weight, 8 lbs., Price, \$7.75.

No. 31 Lever Handle Bucket Pump

No. 23—Whitewash sprayer and force pump is designed for use in pail or bucket and will fit any size. The pump is made of galvanized iron. The top and bottom are made of brass. It is regularly equipped with 3 feet best hose, one foot brass extension rod and brass nozzle, which gives two different size sprays. It has ball valves and steel foot rest. The pump is provided with an overflow which carries all the liquid which might get above the plunger, back into the pail. The plunger is easily removed and easy to operate to do double action. This pump is especially designed for spraying whitewash. Price \$3.25.

No. 26 Spray Pump

No. 26—Bucket Spray Pump. This little pump is very convenient for all sorts of small work. Has brass cylinder and valves, two nozzles, for fine or coarse work. The best low priced pump on the market. Price \$6.00.

No. 95 SPRAY PUMP

The No. 95 Pump is a double action all brass, domestic service spray pump. It is equipped with hemp plunger and ball valves and our No. 80 Angle Service Nozzel. Nozzel is complete with strainer and designed to give a fine mist. By removing verbal disc a straight stream can be had. Can be used for white washing successfully.

Weight 6 lbs.

Price, \$5.00.

No. 28 Whitewash Pump

Save Time Every Day With An Armstrong Standard Spray Pump

One more than a hundred thousand farms this simple pump of proven success is used every day for spraying trees, vines and garden crops, whitewashing, washing vehicles, extinguishing fires, spraying animals, disinfecting coups and pens, injecting medicines in veterinary cases, and for scores of other uses.

It works by hand—easily—yet sprays the tallest fruit tree from the ground. It sprays at the tree—and not at the nozzle of the pump. No need for scaffolds, platforms, or extension handles. All the work of the Armstrong Standard is done from the ground.

Single action—perfect control of expensive spraying materials. Made throughout of brass, practically indestructible. Even the valves are brass, brass balls working in brass seats. No material used in its construction that can be affected by chemicals. No

leather suckers to dry up or rot. No castings to rust. It should last a lifetime with ordinary care. Even Armstrong Standard Spray Pump is guaranteed for five years.

For bucket use a $3\frac{1}{2}$ foot length of hose is supplied. To use with barrel or tank for a large orchard, a longer hose up to 25 or 30 feet is desirable. For spraying young or scattered trees or truck crops such as potatoes, tobacco, etc., the knapsack and curved extension are used. With these attachments, the Standard will spray potatoes, one row at a time, at the rate of an acre an hour or better.

The Standard with $3\frac{1}{2}$ feet of hose and full set of Nozzles	\$5.50
Knapsack Attachments	4.25
Extensions, 19 inches long	1.00
Extra Hose, $\frac{1}{2}$-inch 4 ply Red Tubing, per foot16

SPRAY PUMPS AND SPRAYERS—Continued

THE HARDIE" ALL BRASS LEVER BUCKET PUMP

bucket pump, especially designed to meet the long felt want in this line. It is the only bucket pump on the market that has a mechanical agitator, and that is so designed as to always stand in position in the center of the bucket. It can readily be detached from the bucket by unscrewing a nut on the spider. The new device for holding the pump firmly in place in the center of the bucket enables the operator to carry the whole outfit with one hand. As will be seen by the cut here shown, the bulk of the weight is below the top of the bucket, even when the bucket is empty. This pump, as well as being held firmly in the center of the bucket, has a mechanical agitator passing directly in front of the strainer at every stroke of the handle, as shown in cut. It should be remembered that it is just as necessary to have the liquid in a bucket well agitated as that in a barrel. It is capable of developing a 200-pound pressure and maintaining a 100-pound pressure while spraying with 35 strokes to the minute, and will discharge 30 gallons of liquid per hour.

Equipped with heavy wooden bucket, 3 feet best spray hose.

1 Spraying Lance, 18 inches long and Vermorel Nozzle.

Price -----\$15.00

The Hardie Bucket Pump

IDEAL SPRAY OUTFIT No. 30 and 31

A strong, durable wheel barrow sprayer. The Ideal is well designed and will develop a higher pressure than any other wheel barrow sprayer. Pump—seamless brass cylinder, 1 1/4 in. diameter, 7 in. long; air chamber 2 in. diameter, 30 in. long, made of steel tubing. Tank—Heavy Galvanized Steel, re-inforced top and bottom with heavy channel iron hoops. Capacity 15 gallons. Wheel—20 in. diameter by 2 1/2 in. tire. Valves—Bronze balls, one cage. Equipment—15 feet, 1/2-in. spray hose, 8 feet pipe extension, 1/4-in. fog nozzle and leakless shut-off. No. 30 Outfit without Air Tank or Pressure Gauge, weight crated 100 lbs.

Price, \$26.50.

Above illustrates No. 31 Outfit, which is the same as No. 30 described at left but with addition of pressure tank and gauge. Air Tank is boiler iron, tested to 275 lbs. pressure. Pressure gauge reads to 200 lbs.

No. 31 Outfit, crated, weight 130 lbs.

Price, \$37.50

THE "HARDIE" WHEEL OUTFIT NO. 21

The Hardie Wheel Outfit No. 21

This outfit is designed to meet a long felt want by the small fruit grower and gardener for a suitable arrangement in this line. It is a handy, neat appearing, up-to-date spraying outfit, can be taken where it is impracticable to take a wagon.

The 30-gallon barrel is mounted, as shown in cut, on strong wrought iron wheels 25 inches in diameter, with 1 1/2-inch times. The solid steel axle passes clear through the barrel and is leaded into special castings on either side, making a strong, serviceable machine. The barrel is nicely painted and provided with a hardwood strainer with a bottom of brass screen wire.

Equipped with one bamboo rod and leakless stopcock, one Vermorel Nozzle.

Price, \$33.00

We also Carry in Stock, Spray Nozzles, Fittings, Hose, Extension Rods, etc.

BEE SUPPLIES

No. 1 Western Pine Dovetailed Hive—

Complete with 1 super. Consists of 1 bottom board, 1 body, 1 super, 1 cover, 8 Hoffman brood frames, 1 division board, 2 tightening springs for super, 6 section holders, 5 slotted separators, 24 sections all nailed and ready for use.

1—8 frame ----- \$3.75

1—10 frame ----- 4.25

For foundation starters for frame and sections consisting of 2 sheets medium brood and 3 sheets thin surplus foundation. Add to price of hive, 35c.

Per 5 hives K. D. flat, complete without foundation starters, weight about 150 lbs. Price for 5—8 frame ----- \$17.00.

For 5—10 frame ----- 19.00

No. 1 Western Pine Bee Hive for
4 1/4-4 1/4-1 1/2 Sections.

No. 1 Western Pine Dovetailed Supers

No. 1 Super—For 8 frame hive, section, no starter, set up. Price \$1.50. 1—10 frame \$1.75
No. 1—5 K. D. Supers for 8 frame hive with sections, no starter; weight about 40 lbs.
Price, \$6.75. 5—10 frame Supers as above \$8.00

Hoffman Brood Frames

The Hoffman Improved Foundation Fastening Frames are the latest, most satisfactory brood frames. The top bar is made with a beveled strip, which holds the foundation absolutely in place, perfectly straight and exactly in center of top bar. Anyone can put foundation in these new frames very rapidly.

Improved Hoffman frames. 10 for 70c; 100 for \$6.50.

SEPARATORS

One separator should always be placed between each section holder so that the bees will build the honey comb even in each section. Slotted wood separators, 4 1/2 x 18. Weight, 8 lbs. per 100. 10 for 15c; 100 for \$1.10.

PORTER BEE ESCAPE

Great labor-saver; weight 2 ozs. Price, postpaid, 25c. Double, 30c.

WIRE IMBEDDERS

The Easterday -- Weight 4 ozs. Price, postpaid, 60c.

Section Honey Boxes

Cut No. 1—Sections are made of the choicest white basswood lumber, and are perfect in finish and free from defects.

Root's No. 1—Best White. 100 for \$2.00; 500 for \$9.50.

SECTION HOLDERS

Six section holders with separators, one follower and wedge are put in each 24-lb. super, and each section holder holds four 1-lb. honey boxes. The bottom strip is 1/4-inch thick, and is cut out to fit in sets of the slotted sections—the style generally used.

Root's—1 1/8 x 18 1/8 inches, slotted holders, weight 23 lbs. per 100. Price, Each 5c; 100 for \$4.50.

COMB FOUNDATION

There is little question but that it pays to use foundation in full sheets in the brood frames and sections, especially the latter. If you think you cannot afford so much you should at least have a strip for a starter. It will help much more than it costs you, in getting straight, even combs. You can use a starter any width from one inch up.

Light Standard Brood Foundation—7 3/4 x 16 7/8; 7 sheets per lb. Price per lb., 55c; 10 lbs., 50c per lb.

Light Section Foundation—3 7/8 x 15 1/8, 28 sheets per lb. Price per lb., 90c.

FOUNDATION FASTENERS

Parker's—A satisfactory and serviceable tool; weight 1 lb. Price 50c.

BEE SUPPLIES—Continued

STANDARD ROOT SMOKER

Makes a good strong blast. The most satisfactory and serviceable smoker. Standard size, $3\frac{1}{4}$ -inch; weight 2 lbs. **Price, \$1.85.**

BEE ENTRANCE GUARDS

Roots—These are to admit workers, but exclude drones. Weight $\frac{1}{4}$ -lb. **Price, 40c.**

ALLEY'S COMBINED DRONE AND QUEEN TRAP

Improved wire front; 8 frame, weight $1\frac{1}{4}$ lbs. **Price, \$1.20.**

MANUM'S SWARMING DEVICE

A most complete swarming device. The swarmer is light, conveniently carried, and will reach a swarm 20 feet from the ground. Complete wire basket, with bail, no pole. **Price, \$2.50.**

CLARK'S COLD BLAST SMOKER

Probably the most popular smoker in use today. Weight $1\frac{1}{4}$ lbs. **Price, \$1.25.**

ALEXANDER FEEDER

This is comparatively a new feeder. The bottom board slides forward, and the feeder is placed at the back and under the hive. The bees go into the feeder from the brood chamber. This feeder has many good features. **Wt. $1\frac{1}{4}$ -lbs. 80c.**

HONEY BOARDS

Used to confine the queen to the brood chamber.

8-frame, unbound, $12 \times 19\frac{1}{2}$ inches. **Price, 55c; 10 frame 60c.**

8-frame, wood and wire bound, $13\frac{3}{8} \times 20$ inches. **Price \$1.00, 10 frame \$1.35.**

BEE VEILS

Globe—Has five bars that will keep veil away from head. Weight 6 oz. **Price, \$1.75.**

No. 2 Veil—Cotton tulle, silk face. **Price, \$1.60.**

New ABC XYZ of Bee Culture—**Price, \$3.50.**

BEES WAX

Per lb. Market price.

NO. 30 TINNED WIRE

$\frac{1}{2}$ -lb. spools. **50c each.**

DAIRY SUPPLIES—Continued

DAVIS MILK BOTTLE FILLERS

As meeting the demand of a first-class up-to-date Milk Bottle Filler, we offer the Davis Special Fillers. These are especially adapted to the rapid filling of from 200 to 600 bottles daily. Arranged with a ratchet lifting device of Mr. Davis' own design, automatically locking when valves are open, leaving operator's hands free to cap the row of bottles previously filled, or prepare the next case for filling. When the bottles are filled all but the last row have been capped. The Davis patented valves are the only valves that may be regulated to fill at any desired height. The bottles are filled just right, so that the caps may be placed on them clean and dry, and the milk is prevented from streaming over the outside of the bottles as with most fillers. Our valves are made of heavy bronzed metal, nickel-plated, and same design and patent as on the enamel tank machines. Sold subject to guarantee to do the work satisfactory to the purchaser. Price, T-15 with tin tank, copper bottom. **Price on application.**

We can Quote Prices on any style or size desired.

SANITARY BOTTLE DELIVERY CRATES

Strongest and most sanitary crates made. Dovetailed corners, reinforced inside. Will save their cost many times over in convenience and far less breakage of bottles. Made to stack.

THATCHER MILK BOTTLES

Thatcher Milk Bottles are manufactured in the most modern factory in the country. The Thatcher Manufacturing Co. is the only concern having the use of the famous Owen Bottle Machine. This machine is called the wonder of the age and is the only bottle machine that automatically gathers the glass, taking up the same amount each time, giving correct capacity, uniform weight and even distribution of glass.

OUR GUARANTEE

First—Correct capacity, uniform weight. When you serve milk in Thatcher Milk Bottles you have no loss; you give full measure; no more, no less. You also have the satisfaction of knowing that your bottles comply with the city ordinances.

Second—Even distribution of glass, superior annealing. Ninety per cent. of breakage is caused by poor distribution of glass and inferior annealing. There are no thin spots in our bottles and they are perfectly annealed, which means your breakage will be reduced to a minimum.

Third—Perfectly smooth finish at top for caps. There are no sharp edges to cut brush handles, or checks in the glass to chip off, as our bottles are absolutely smooth and make a perfect fit for the caps.

Fourth—Absolute water white glass for the Thatcher Manufacturing Company make no other kind of bottles but milk bottles, and the glass is always kept at the proper color for milk bottles. No smoky, blue, green, red or yellow milk bottles from us. Ours are all water white.

Price per dozen quarts	\$1.05	Per gross, wt., 270 lbs.	Gross Prices

Price per dozen ½-pints	.70	Per gross, wt., 110 lbs.	tion.

DAIRYMEN'S MILK CANS

The material used in manufacture of these cans is the very best obtainable. For proof of this we call your attention to the construction of the covers. Seamless necks and most select would ever stand the strain of drawing and bending which is done in the manufacture of these goods. The parts are all smooth, without waves or wrinkles and are guaranteed not to split. Material that is not properly annealed will split and crack, but these cans are guaranteed not to do this. All parts are treated to two coats of pure block tin after being properly made to size, so that all edges are tinned just the same as the flat surfaces.

One gallon capacity; wt., 2½ lbs. Prices on application.

Two gallon capacity; wt., 6½ lbs. Price on application.

Three gallon capacity; wt., 7½ lbs. Price on application.

We can furnish all the leading and most used bottle caps. Our caps are made from the very best material and are heavily paraffined. We carry in stock in quantity desired. The No Lip caps, Lip caps and Hagerstown or Perfection caps, and we also take orders for any kind of caps desired, by the barrel, with name on, without extra charge.

Price on application. Let us quote you.

We carry in Stock All Kinds of Milk Bottle and Can Brushes, Which We Do Not List in This Catalogue.—Prices Subject to Change Without Notice.

PEERLESS

Tubular Sanitary Milk Cooler

The most satisfactory and efficient cooler made. This cooler is made of $1\frac{1}{2}$ -inch seamless copper channel tubes tinned inside and outside, flushed into solid cast brass heads. The channel tubes do away with distributing solder strips, making a perfect sanitary cooler. The upper and lower troughs are made of tinned copper and cast end plates. They are removable for cleaning.

OPERATION The cooler is suspended in brackets, which we furnish. The water enters at bottom and flows up through each tube and out of upper outlet. The milk runs down evenly distributed over the outside of tubes into lower trough. Total height of cooler, including troughs is 24 inches.

15-inch wide, 9 tube high, Cap., per hour, 182 lbs., \$38.50.

18-in. wide, 9 tube high, Cap. per hour, 250 lbs. \$42.50.

Fig. 937

LOUDEN'S WOOD LINED STANCHION

Louden's Wood Lined Stanchion, shown by Fig. 937, is decidedly the best stanchion of class on the market. The latch is exceedingly simple. The plates to which the latch is pivoted are riveted to opposite sides of the upper end of one of the T steel bars. The upper end of the other T Bar is provided with a spur, over which the latch catches and by which the hinged side is held positively and securely in locked position. The plates are provided with diverging prongs, which always guide the side into latched position, and also form guards to prevent the cows horns from opening the latch. The latch is easily and quickly operated by one hand. Besides this, it is made of a special shape of high carbon T steel, provided with a small rib. This rib adds considerably to its strength and prevents the wood strip from getting split or knocked off. Price \$4.65.

BARN EQUIPMENT

Louden Automatic Water Bowls

The bowl is made of heavy grey iron, and is tapped to connect with $\frac{3}{4}$ -inch pipe. The valve seat, valve rod, and spring are made of brass. The bowl is so made, it can be attached to wood or pipe manger or stalls. The Louden Bowl is detachable and this is done by lifting the nose piece to a verticle position, lift up bowl and slip it off. Put Louden Bowls in your barn, you will increase your profits and decrease your expense. Write for special booklet.

Louden Water Bowl, complete ready for piping, \$4.75.

Special prices on complete outfit of bowls for barn.

NOTE—We will gladly give estimates for complete installation of pipe and fittings necessary for equipping any barn with Louden Water Bowls.

Fig. 828—LOUDEN EMANCIPATOR LITTER CARRIER

Is the carrier that satisfies the man who wants the best. It operates on One Piece Double Bead Track. The tub is 48x27 $\frac{1}{2}$ x22 inches deep, holds 10 bushels, and is made of heavy galvanized sheet steel, reinforced with angle iron. The hoisting device is the most powerful, yet very simple, it being a chain wheel shaft and the slack end taken up by an overhead shaft. A one-pound pull on the hand chain will raise 40 lbs. in the box. It will raise and lower about 7 feet. There are 4 roller bearing track wheels, 4 inches in diameter. Extra strong swivel joints 2 $\frac{1}{4}$ inches in diameter allows the carrier to travel around curves freely without bending or getting out of order.

Fig. 828—Louden Emancipator Litter Carrier, weight 200 lbs. Price \$56.75

We will gladly furnish, upon request, plans, and prices for full equipment for installation of Litter Carriers, Track, Hangers, Switches, Automatic Door Openers, also Stalls. Mangers. WRITE POOLE'S FIRST.

PLATFORM HAND CART

Platform Hand Cart. The superiority of this cart will be appreciated at a glance. It can be used for many purposes on the farm, in the creamery and elsewhere. By tilting the cart and using the handles as levers, barrels or other heavy packages may be lifted and loaded with ease. They are made wholly of steel except the platform, which are of hardwood. The wheels are 36 inches in diameter, strongly and substantially made, and fitted with removable boxes, cheaply and easily replaced in case of wear. Size of platform, 27x30 inches.

Platform Hand Cart, with 2-inch tires, wt., 95 lbs. Price ----\$13.75

Platform Hand Cart

NO. 1 AMERICAN GARDEN WHEELBARROW

These American Garden Barrows are made of wood and steel, which is combined in the simplest form to gain lightness and still maintain strength and correctness of design. The individual points of superiority are pressed angle steel sideboard holders, wheel, with 2 inch oval tire, solid steel axle oval pressed steel legs, and 20 inch steel and malleable boxes. It is strong, light and well manufactured. Finished in vermilion, hand striped and varnished and is better finished than any Garden Barrow made.

No. 1 American Garden Barrow, weight 50 lbs. Price \$8.50.

No. 2 American Garden Barrow, weight 56 lbs. Price, \$9.25.

NO. 5 TUBULAR WHEELBARROW

Tray capacity 6 cu. ft. of earth.

Greatest Length, 40 inches.

Greatest width, 32 inches.

Greatest Depth, 13 inches.

No. 15 Steel. Wheel malleable iron with grease chamber in hub—non-turning axle bolt.

Handles—one piece tubular steel. This is a very popular wheelbarrow with the dairyman, for wheeling the litter from the barn.

No. 5 Tubular Wheelbarrow, weight each 78 lbs. Price, \$12.50.

WHEELBARROWS

The K. & J. for Dairy Barns. This wheelbarrow is the favorite with the Dairyman. Its capacity is 4 cubic feet of dirt and due to its extreme depth both front and rear, will hold large quantity of liquid manure without spilling. Depth at back is 8¼ inches; at front 13 inches. Width 24½ inches. Length at top is 37¼ inches. Steel wheel 16½ inches diameter, ½ inch round spokes. The K. & J. concrete weight 74 lbs. Price \$10.50.

Stewart No. 1 Horse and Cow

Clipping Machines

Stewart No. 1 Enclosed Gear Ball Bearing Clipper

The base is designed to be strictly rigid and substantial and sits firmly on the floor or ground. All gears are ball bearing and are enclosed in a dust proof metal box, which reduces friction to a minimum. All wearing parts are hardened tool steel. New type, light, easy-running, flexible shaft 6 feet long. Complete with one set of Stewart one-nut tension knives.

Stewart No. 1 Clipping Machine; weight, boxed 36 lbs., \$15.00.

Dutchess, 16 inch cut. Price \$14.50.

COLDWELL'S MODEL "L" MOTOR LAWN MOWER

A SMALL MOWER OF LARGE CAPACITY

The Coldwell Model "L" Motor Lawn Mowers and Roller, twenty-five inch cut, has been designed with a view of combining the extreme flexibility of the hand lawn mower with the large cutting capacity, rolling feature and other advantages and conveniences which can be obtained only with a motor mower.

This mower is adapted for use on private lawns, parks, cemeteries, public grounds and for fine cutting on tennis courts and bowling greens.

Model "L" is offered to fill the need for a practical, motor driven, hand controlled, lawn mower with plenty of reserve power which will make it possible to cut close up to and around trees, shrubbery, walks and driveways, to operate efficiently on the smaller areas and at the same time to be able to cut from four to six acres per day on the larger areas of lawn. The Coldwell is a true motor mower in the strictest sense of the word. The cutting knives which are positively controlled and operated by power transmitted directly from the motor independently of the drive roller, are an integral part of the machine and have been designed and tested for their special function under power.

Send for special booklet on this mower.

Model "L" Motor Mower. Price \$305.00.

The Eureka
Potato Planter

The Eureka Potato Planter

A Tube Planter with self-locking jaws and a broad adjustable depth gauge. The object of the tube is to obviate the necessity of raising the planter for the purpose of depositing the potato in the beak, which makes it an easy and good way of planting potatoes. The operation of this planter is very simple and it cannot get out of order; if you try one you will like it. Eureka Potato Planter, net weight 3½ lbs. \$2.00

The Pingree Patent Potato Planter

Simple, strong, durable, easy to operate, has self-locking jaws and adjustable depth gauge. At one operation the holes are made, seed dropped and covered. Plants uniformly any depth desired. It will pay you well to try one of these ingenious labor savers.

Pingree Patent Potato Planter, net weight 3 lbs.

----- \$1.35

The Pingree
Potato Planter

The Acme
Corn Planter

Cahoon Broadcast Seeder

CAHOON—The standard broadcast seed sower of the world, made of steel, iron and brass and with ordinary care will last a lifetime. This is the most popular and best built seed sower; has a force feed and does excellent work. Instructions with each machine. Weight 9 lbs. Price, \$5.50.

THE ACME CORN PLANTER

A two-handled planter, light, strong and durable. Especially adapted for planting in heavy, cloddy or stony soils. Will drop seed ranging from popcorn to large kidney beans. Weight 5 lbs. Price \$1.35.

THE ROTARY CORN PLANTER

A one-hand planter, extremely accurate of drop, due to the novel design of the seed plates and steel spring cut-off. Simple, strong and durable. No tools required to make adjustments. Rotary Corn Planter, weight 6 lbs. Price, \$2.75.

The Rotary

PLANET JR. GARDEN TOOLS

No. 25 Planet Jr. Hill and Drill Seeder, Double Wheel Hoe, Cultivator and Plow

This combined Hill and Seed Drill Seeder and Double Wheel Hoe is fitted with 11½-inch wheels. Hopper holds 2¼ quarts. It combines in a most practical way the Planet Jr. No. 4 Drill and No. 12 Double Wheel Hoe. The change from drill to wheel hoe and back again is quickly made, and the entire combination is one we can heartily recommend and guarantee satisfactory.

Equipment: One pair 6-inch hoes; four cultivator teeth; one pair plows; two leaf lifters.

Price, complete ----- \$27.25

Weight, packed, 59 pounds.

No. 17 Planet Jr. Single Wheel Hoe

You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

Weight, 24 lbs.

Price ----- \$9.50

No. 17½ Planet Jr. is the No. 17 Cultivator less the plow. Weight, 22 lbs.

Price ----- \$8.75

No. 4 Planet Jr. Hill and Drill Seeder Wheel Hoe, Cultivator and Plow

No. 4 Planet Jr. combines in a single convenient implement a capital hill-dropping seeder, a continuous row seeder, an admirable single wheel hoe, a cultivator and a plow. Its work as a seeder is marvelous. It sows in continuous rows with the greatest uniformity, and also drops with accuracy in hills four, six, eight, twelve or twenty-four inches apart. The feed is automatically stopped by simply raising the handles. Capacity 2½ quarts.

Equipment: One pair 4½-inch hoes one garden plow; three cultivator teeth; one leaf lifter.

Price, complete ----- \$22.50

Weight, packed, 49 pounds.

No. 4 Planet Jr. as Drill only \$18.00

No. 12 Planet Jr. Double Wheel Hoe, Cultivator and Plow

Equipment: One pair 6-inch hoes, four cultivator teeth, one pair plows and one pair leaf lifters. Weight, packed 32 lbs.

Price ----- \$13.75

PLANET GARDEN TOOLS—Continued

No. 16 Planet Jr. Single Wheel Hoe, Cultivator, Rake and Plow

Packed weight, 26 lbs.
Steel frame.
15-inch steel wheel.

Equipment:
One pair of 6-inch hoes.
Three cultivator teeth.
One large garden plow.

All oil tempered.
One 7-inch rake.
One 4-inch rake.
One leaf guard.
Price, \$11.50.

No. 35 Planet Jr. Seeder Attachment

The No. 35 Seeder Attachment is proving very popular with the man who wants an inexpensive seeder and has only small amount of work for it. Can be attached to almost any hand cultivator. Price \$7.25.

No. 20 Garden Plow and Cultivator

No. 20 STANDARD GARDEN PLOW AND CULTIVATOR

A light, strong and serviceable Garden Plow, Cultivator, Hoe and Rake. Made of steel throughout. Wheel is 24 inches in diameter. Equipment includes plow, sweep, reversible shovel, rake and wrench. Weight 20 lbs. Price \$5.50.

Planet Jr. Pulverizer

PLANET JR. STAR PULVERIZER, LEVELER AND WEEDER

This new tool is especially adapted for preparing the seed bed. After the ground has been plowed with the Wheel Hoe plow or spaded, this Pulverizer will be found of great value in smoothing and fining the surface of the soil, putting it in the best possible condition for the seed planter. It is much more thorough and rapid in its work than an ordinary garden rake, thoroughly pulverizing lumpy soil. Use like a carpet sweeper or vacuum cleaner with sufficient pressure to cut the lumps and thoroughly pulverize the soil. The rear blade cutting 13½ inches levels the ground perfectly. After the crops are started it may be used between the rows as a weeder or as a crust breaker, leaving a fine mulch. It is a great tool for the small garden, while the vegetable grower will find many uses for it, especially under the laterals in overhead irrigation. Works equally well both forward and backwards. Weight 13 lbs. Price \$7.50.

JOHN DEERE STEEL WALKING PLOWS

John Deere New Turf and Stubble Plow—Steel Beam

This series of plows is made upon a new theory of plow surface, cut and turn. They embody all the excellencies of high-grade plows. The furrow-slice is lifted and carried unbroken along the surface of the plow bottom until it reaches the wing of the moldboard, where it is inverted, whereby the second turning and pushing forward of the dirt in front of the plow is avoided. This principle increases the scouring qualities, effects a saving in draft for the team, and leaves a clean furrow.

The turf and stubble plows of this series have a moldboard with a long, easy turn, which makes the plows easy draft and equally adapted for old ground or sod. In the latter, they lap the furrows with great regularity and leave ground in good condition for the harrow.

Steel Frame—Hardened soft-center steel share, double shin.

Hardened soft-center steel landside, chilled slip heel; hardened soft-center moldboard, double shin; double headed steel beam, high curve.

GP 12N—Steel Beam Plow, cuts 12 inches; weight, 103 lbs.	Price -----	\$31.00
GP 6N—Steel Beam Plow; cuts 14 inches; weight, 115 lbs.	Price -----	34.00
MP 14 —Steel Beam, High Landside; weight 123 lbs.	Price -----	34.50

John Deere New Mixed Land Series—Steel Beam

As the name indicates, these plows are adapted for use in soils of a mixed composition of sand and clay, or light loam, where steel of a very high temper is not required in order to scour. They are built on the general purpose pattern, for either sod or stubble plowing.

They are good substitutes for chilled iron plows and are more easily handled. Their general qualities and medium price make them a popular series.

B110—Steel Beam Plow; cuts 10 inches; weight, 94 lbs.	Price -----	\$27.65
B112—Steel Beam Plow; cuts 12 inches; weight, 107 lbs.	Price -----	32.00
B114—Steel Beam Plow; cuts 14 inches; weight, 124 lbs.	Price -----	35.75

JOHN DEERE STEEL WALKING PLOWS—Continued

John Deere Bantam Steel Plow

This is a light and graceful one-horse plow for general cultivating and garden work. It is very strong and durable. Has a hardened soft center moldboard and a steel share.

8-inch Steel Beam Steel Bantam Plow, cuts 8 inches; weight, 65 lbs. Price -----\$18.00

9-inch Steel Beam Steel Bantam Plow, cuts 9 inches; weight, 71 lbs. Price ----- 21.00

10-inch Steel Beam Steel Bantam Plow, cuts 10 inches; weight, 77 lbs. Price ----- 24.00

Above with Extra Share

CV18 John Deere Vineyard Plow

This is the most popular style of vineyard plow made. It is a small steel beam plow, equipped with an index beam, which allows the horse to walk away from the vines and at all times permits of a direct hitch to the end of the beam. The handles are steel, swiveled either way, to prevent scraping the hands on vines or shrubbery. With this plow work can be done very close to the vines.

It has a cast landside, cast steel slip share, steel frame and a hardened soft center steel moldboard with extra share.

CV8—Adjustable Steel Beam Plow, cuts 8 inches; weight, 83 lbs. Price -----\$22.50

The user of a John Deere Plow can always get repairs.

SYRACUSE PLOWS

SYRACUSE CHILLED PLOW—STEEL BEAM

The plows of this series have a sloping landside, and moldboard of special design as to produce light draft and adapt the plows to either sod or stubble plowing. Strength with simplicity has been kept in mind in their construction as well as quality of material, the result being that these chilled plows are an improvement on all plows of this character heretofore manufactured. The share and shin piece is combined, a fresh cutting edge where it is most needed being thus obtained with each new share.

No. 1466 Steel Beam Chilled Plow; cuts 8 inches; weight, 64 lbs.	Price -----	\$15.50
No. 1465 Steel Beam Chilled Plow; cuts 9 inches; weight, 72 lbs.	Price -----	19.50

SHOVEL PLOWS AND CULTIVATORS

WOOD BEAM WING SHOVEL PLOW

These are admirable tools for hilling potatoes, etc. Have adjustable wings which can be let out to any desired angle by means of punched spread-rods, and can be worked with one wing or the two wings simultaneously at different angles.

Wood Beam, Wing Shovel Plow; weight, 35 lbs. Price -----\$6.50
Steel Beam, Wing Shovel Plow; weight, 40 lbs. Price -----7.00

12-Tooth Harrow with Wheel and Pulverizer

The combination of teeth and pulverizer leaves the ground in the finest condition. The lever wheel enables the operator to set the teeth exactly to any depth desired, making delicate work not only possible, but very easy. It is invaluable in narrow rows and for fine work in market gardens, and close work on the farm. Used extensively in strawberry culture.

Planet Jr. 12-Tooth Harrow, complete, weight 75 lbs. -----\$23.00
Planet Jr. 12-Tooth Harrow, without pulverizer -----19.25
Planet Jr. 12-Tooth Harrow, without pulverizer, but with plain wheel -----18.00

The John Deere Fourteen-Tooth Steel Combination Cultivator and Harrow is adapted for close work among very small plants. It stirs the soil thoroughly, but does not throw any on the plants.

The steel teeth are reversible, each one having a small cultivator tooth forged on one end, the other being straight and sharp.

CULTIVATORS

Deere Steel Five Tooth Cultivator and Horse Hoe (Shown with Horse Hoe Attached)

These implements, specially adapted to the use of market gardeners, as well as for general use, are made in the most substantial manner. The frames are entirely of steel and malleable iron. The expansion device is a combination of two arms which expand or contract the frame by the action of the lever, at the same time bracing the frame and making the tool very rigid. Expansion lever is of good length and easy to operate. Wrought steel braces extend from the handles to the expanding bars, being so attached to the latter that their full service is secured, regardless of the position of the expanding bars.

The shovels on the five and seven-tooth are adjustable and the horse-hoe blades reversible, which admits of a variety of work.

Five Tooth Cultivator with lever, and gauge wheel	60-lbs.	Price \$12.00
Five Tooth Cultivator with lever, gauge wheel and horse hoe attachments	65-lbs.	14.50
Seven Tooth Cultivator with lever, gauge wheel	65-lbs.	13.75
Seven Tooth Cultivator with lever, gauge wheel and horse hoe attachments	71-lbs.	16.50

No. 83 Planet Jr. Seven-Tooth Cultivator

The No. 83 Planet Jr. Seven-Tooth Plain Cultivator, in the opinion of those who ought to know, is the coming one-horse cultivator, as it has seven teeth instead of five. The teeth are $2\frac{1}{4}$ inches wide, and their work is finer and more thorough than that of the five-tooth cultivator. The machine is a favorite where fine cultivation is wanted. It finishes all rows up to 42 inches apart. Weight 69 lbs. Price \$20.00.

SYRACUSE GRAPE and BERRY HOE

The Syracuse Berry Hoe is a wonderful labor-saver in the culture of berries and grapes. The Hoe is easily guided in and out around the posts and vines by the disc castor wheel, to which the handle is attached. The horse is hitched to one side of the

pole, with plenty of room for the plow to work under the vines or bushes. By changing the position of the blade the soil can be thrown toward or away from the vines. Adjustable to any width row. Weight 120 lbs. Price \$24.00.

Cultivator and spring tooth attachments at extra price

SPRING TOOTH AND RIDING CULTIVATORS

IMPERIAL SPRING TOOTH CULTIVATOR

(7-Tooth Shown in Cut. Stocked only in 5 Tooth)

This Spring Tooth Cultivator is very popular, like the spring tooth harrow. The frame is made of steel and is adjustable in width from 19 to 35 inches.

No. 121½—Imperial Spring Tooth Cultivator, with 5 teeth, wheel and adjustable lever; weight, 80 lbs. -- Price, \$14.00.

No. 122½—7 tooth. Price \$16.00.

HARROWS

John Deere Universal Steel Lever Harrow

TEETH PERPENDICULAR FOR PULVERIZING

In the Deere Universal Steel Lever Harrow we offer a tool which is entitled to great favor. The Tooth Bars are made of U-bar steel, which insures strength without useless weight. At the same time the sections are heavy enough to give to the teeth the proper amount of penetration in any condition of soil. The teeth are fastened to the bars by our patent tooth fastener, which holds the tooth firmly in position, and yet, by slightly loosening the nut, permits the tooth to be removed readily for replacing with new one or to turn the tooth to present a new corner to the work when it becomes worn. Hinge castings are attached firmly to each end of the tooth bars, and are riveted on the outside of the side bars. The tooth bars turn freely, and can be easily adjusted so the teeth will work at any desired angle. Harrow is also provided with a spring trip, which preserves the teeth when using this harrow in stony or rooty ground.

25 Tooth Universal Drag Harrow; weight, 81 lbs. Price	\$13.25
30 Tooth Universal Drag Harrow; weight, 95 lbs. Price	14.85
50 Tooth Universal Drag Harrow; weight 182 lbs. Price	30.00
60 Tooth Universal Harrow; weight, 211 lbs. Price	33.75

We can also furnish larger size harrows.

NOTE—We strongly urge upon our customers the advisability of making purchases of Farm Implements as early as possible this year. All reports of reliable investigators, confirm our belief that demand will be active, and due to being so far from factories, stocks will not be equal to this demand. Purchase early and you won't be dissatisfied.

IMPERIAL LOW DOWN SPRING TOOTH HARROW

Made with heavy steel pipe tooth bars and steel plates under runners. It is suitable for orchards, hops, vineyards and gardens; is fitted with handles and lever for adjusting the teeth. The front end of frame is tapered, which facilitates turning at the end of row of trees or vines.

9-Tooth Imperial 1 Section Low Down Harrow, cuts 3 feet; weight 137 lbs. Price \$23.50

Syracuse Spring Tooth Harrow

The Spring tooth harrow furnishes the best and only practical means of pulverizing sandy, gravelly or stony ground, where deep cultivation is required. The main advantage in the use of the spring tooth harrow, as compared with the disc or smoothing harrow, is that the spring tooth will penetrate to a greater depth than the other harrows and the lower strata of soil may be dug up, brought to the surface and mixed with the top soil.

The Syracuse frame and tooth bars are made of channel and angle bar steel of from 40 to 50 point carbon. The frame thus has great strength without disturbing the elasticity of the bars. The frames of some competing harrows are of 10 to 20 points carbon, which makes a soft steel, easily bent, and such bars when once sprung do not come back into shape.

The runners have heavy steel protective shoes $\frac{1}{4}$ -inch thick, and they provide twice the wear of the ordinary shoe used on most of harrows.

15-Tooth Syracuse 2 Section Spring Tooth Harrow; cuts 5½ ft.; weight, 240 lbs. \$38.00

17-Tooth Syracuse 2 Section Spring Tooth Harrow; cuts 6 ft.; weight 260 lbs. ---- 41.00

Riding Attachment for Wheel Harrow Extra

Imperial One-Horse Disc Harrow

The Imperial One-Horse Disc Harrow is a light weight, low priced implement for market gardeners and farmers using one or two horses. **The shafts are readily converted into a pole for two horses.** Few, if any, one-horse disc harrows other than the Imperial have two levers for adjusting the gangs independently. The gangs can be set for out-throw, as shown in illustration, or extended and reversed and used as an inthrow harrow or straddle row cultivator. The frame is made of steel angle bars, very strong, light and rigid. Discs are of first grade hard steel, 16 inches in diameter. Cleaning scrapers are regular equipment. Imperial One-Horse Disc Harrow, with 6 16-inch discs, weight 210 lbs. -----\$35.00

See the New Multitool (page 74). This tool will cut your costs of weeding and mulching in the vineyards and gardens.

Deere-Model "A" Disc Harrow

For the very best cultivation of orchards, vineyards and hop beds, the Model "A" is particularly fitted and meets all requirements. The disc gangs are reversible for either in or out throw, also adjustable in width from the center out, enabling the harrow to straddle rows or extend under the branches of trees. Discs can be extended out past the frame, doing away with the possibility of the frame scratching the trees when doing close cultivating in orchard work.

In vineyards this harrow can be adjusted to work as close to the vines as desired, working the ground thoroughly two feet or three feet from the row toward the center, and being reversible, you can throw the dirt either toward or away from the row, getting the weeds and stirring all the ground.

The frame is made of one solid piece of the best of steel. Disc blades are made of special high quality steel, carefully polished and ground to a sharp cutting edge and beveled back 1½ inches on the counter side. The bearings are made of hard maple, soaked in oil, giving a smoother and longer wearing bearing than a metal bearing, also inexpensive when it is necessary to have one or more replaced.

This harrow is stocked in one size only and priced with fore truck, less pole. Model "A" 8—16-inch Disc Harrow, cuts 4 feet; weight, 366 lbs. -----\$70.00

JOHN DEERE MODEL B DISC HARROW

The John Deere Model "B" is not only superior in general construction to other discs, but there is also one most important difference in principle that places this machine strictly in a class by itself—its flexibility.

It is a high grade Spring Pressure, Flexible Harrow. A third lever with powerful spring is provided by means of which the driver can easily lower or raise the gangs at the center so as to either cut out dead furrows or to cultivate over ridges or back furrow without burying the harrow in the center.

Each gang of the Model "B" works independently, so that only the part passing over an obstruction is raised out of the ground. With a rigid harrow, the entire machine is lifted out and considerable ground left unworked. In other words, each gang of the Model "B" is controlled by a convenient lever so that the operator can readily regulate it to secure the desired penetration the full width of the harrow.

The Model "B" is a well-built harrow. The main frame is made in one piece from high-carbon steel. The gangs pivot directly from the ends without the addition of any links or extra couplings whatever. The frame is extra well braced by means of heavy bars laid edgewise. The braces also reinforce the bent ends of the main frame as they extend under and are bolted to them, securing greater strength and stiffness where it is most needed. Greater clearance for trash is provided than on any other harrow. The driver's seat is also well up out of the dust and dirt. The disc blades are the hard-working part of any harrow. Either plain blades or cut-away discs can be furnished for the Model "B." They are of the highest quality steel, thoroughly polished on cutting side and ground to a sharp cutting edge. Bearings are the well-known John Deere hard maple oil-soaked bearings, easier and cheaper to replace and also more durable than metal bearings.

Hard-oil cups are conveniently located at top of frame out of the dust and dirt.

The scrapers are of an unusual type. They are independently removable, adjustable and replaceable. There are no rivets, set-screws or other objectionable features on them. The scrapers can be locked either at the center or edge of the discs, keeping them absolutely clean, or, if not needed, locked off entirely, reducing draft. High-grade spring steel gives them ample stiffness and sufficient flexibility to do their work in the most efficient manner without breaking or bending out of shape.

All harrows are complete with fore truck, but without pole at these prices.

8—16	Model B Disc Harrow; cuts 4 feet; 2 horse hitch; weight 367 lbs.	Price .. \$73.50
10—16	Model B Disc Harrow; cuts 5 feet; 2 horse hitch; weight 418 lbs.	Price .. 78.00

VAN BRUNT GRAIN DRILL

WHAT TO DEMAND IN A GRAIN DRILL

1. Adjustable force feeds that provide an even discharge, without bunching, of any and all kinds of seed into each seed furrow.
2. Furrow openers that make a proper seed bed, furrows of uniform depth, and deposit every seed on the bottom; that will work in any kind of soil that can be seeded, mud, gumbo, cornstalks or trash.
3. Light draft, light weight without the sacrifice of strength; proper proportions to provide against excessive strain.
4. Long life with small repair bill.

By these standards we ask you to judge the Van Brunt.

12—Disc Van Brunt Single Disc Drill with 6 inch space; weight	-----	\$162.75
16—Disc Van Brunt Single Disc Drill with 6 inch space; weight	-----	207.96
5—Disc Van Brunt One Horse Disc Drill	-----	56.00

BRILLION CULTI-PACKER

Brillion Double Gang Culti-Packer is a combination pulverizer, roller, packer, and clod crusher. In one operation it will make all these steps at the same time, preparing an ideal seed bed. In many localities this is the only tool of its kind used before and after seeding. It should be used on growing grain any time before the grain starts to joint, working the soil surface, and making a surface mulch that will remain until the crop is matured. It is also very profitable to roll meadows in the spring, firmly packing the loose dirt around the roots. Anyone using this tool finds it a profitable investment. The rear gang can be easily removed if a single roller is at any time desired.

Brillion Culti-Packer, 6 foot; rolls 5 feet, weight 762 lbs. Price	-----	\$ 92.00
Brillion Culti-Packer, 8 foot; rolls 7 feet 4 inches, weight 1030 lbs. Price	-----	121.50
Brillion Culti-Packer, 9 foot; rolls 8 feet, weight 1120 lbs. Price	-----	130.00

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

NO. 400—HOOVER VISIBLE POTATO PLANTER

Main Frame—Main frame is made of channel steel, in the form of a yoke, with both front and rear ends bolted solidly together, to which is bolted the main axle bearings and other parts of the planter.

Drive Wheels—Drive wheels are 40 inches in diameter with 4-inch concave tires and have a tread of 35 inches. The wide, concave tires prevent the wheels from sinking in soft ground or slipping on hillsides. Both wheels are provided with ratchets for driving the main axle, which prevents side draft or extra strain on either wheel.

Roller Bearings—Main axle revolves in roller bearing boxes, bolted solid to the main frame. The intermediate shaft also is provided with roller bearings and, as all the power for driving the planting mechanism passes through these bearings, it assures light draft.

Hopper—Potato hopper is placed at the front end of the planter, and is provided with an agitator, which prevents the potatoes bridging. Hopper is made of sheet steel with reinforced top, making it rigid and durable. The hopper holds about two and one-half bushels, and is low down for easy handling of seed.

Positive Feed Wheel—A feed wheel is placed in the rear of the potato hopper for proper handling of the seed to the picking chamber. This wheel elevates the potatoes to the picking chamber. The speed of this wheel is under the control of the operator, so that the right amount of seed is in the picking chamber, thus preventing the flooding of the picking chamber.

Picking Chamber—The picking chamber bolts solid to the main frame and extends below the axle and picker arms, and is provided with concaves to properly hold the seed for the pickers. Adjusting springs are provided to give these the right pressure on the seed to get the best results.

Accuracy—Three things are very important to the accuracy of a potato planter: First, the right amount of potatoes in the picking chamber. Second, concave spring adjustment, right for the size of the seed. Third, picker points right. All of these features are embraced in the "Hoover," as the whole planting operation is in direct view of the operator, thus permitting him to observe at once any adjustment necessary to the concave springs or pickers and which concave or picker that needs the adjusting.

Spacing arrangement for changing the dropping distance is very simple. It is not necessary to dismantle the machine or remove drive wheel. Spacing is provided as follows: 9, 11, 13, 14½, 16, 17½, 19½, 22 and 24 inches. Any two are furnished regularly.

No. 400—Hoover Visible Potato Planter, weight 670 lbs. One row. Price -----\$130.00

No. 405C—Hoover Visible Potato Planter, weight 1300 lbs. Two row, 36, 38, 40 in. 245.00

JOHN DEERE LOW DOWN SPREADER

With the Beater on the Axle

In designing the John Deere Spreader the inventor worked on two ideals. First: To build it low down, making it easy to load and at the same time making high traction wheels. Second: To reduce the number of parts formerly used in the construction of manure spreaders. As they studied their plans they found that one change would give them the desired results, namely—BUILD THE BEATER ON THE AXLE. This allowed them to lower the entire frame of the spreader, at the same time doing away with over one hundred and fifty working parts. There are no adjustments on the John Deere Spreader; no chains of clutches to give trouble.

All these changes from the old style of spreader construction, in addition to making it more adaptable for its work, tends to lengthen the life of the spreader and reduce the cost of upkeep.

Space is too limited to enumerate all the good features of this machine in this catalog. But we wish to mention twelve of the advantages:

1. Easy to load from the front to the rear—only thirty-six inches to top of box.
2. High Drive Wheels lighten the draft and furnish extra traction.
3. Simple beater drive—gears run in oil in dust-proof case.
4. No clutches—no chains—few adjustments.
5. Only about half the parts necessary on the ordinary spreader.
6. Main working parts mounted on axle—true alignment maintained—no binding, heavy draft or breakage.
7. Patented apron drive prevents racing of apron under all conditions—does not act as a brake.
8. Easy to understand and operate—only two levers.
9. Turns in its own length.
10. Tractor Hitch permits of operating spreader from tractor seat.
11. With straw-spreading attachment, it spreads straw perfectly—a two-in-one machine that one man can operate.

John Deere Manure Spreader, capacity 50 bushels, weight 1825. Kindly ask for descriptive circular. Price \$244.00 for size B.

IT PAYS TO PRESERVE MANURE

Manure has a commercial value based upon the amount of nitrogen, phosphorous and potash it contains. It has an auxiliary value in the organic substance which equals the plant food elements. According to our best authorities, the value of manure in normal times is as follows:

Cattle	-----\$2.02 per ton	Horse	-----2.21 per ton
Hog	-----3.29 per ton	Chicken	-----7.07 per ton
Sheep	-----3.30 per ton	Liquid	-----7.00 per ton

The above do not include the value of the organic substance. The United States Department of Agriculture in Farmers' Bulletin No. 21 estimates that, if the manure from livestock is preserved, its value each year is as follows:

Horse Manure	-----\$27.00	Hog Manure	-----12.00
Cattle Manure	-----19.00	Sheep	-----2.00

NOTE—At the present price of fertilizer, the value is much greater.

The ideal way to preserve manure in order to prevent waste is to spread while in a fresh state directly on the land. When that is done, there is no loss from leaching or evaporation, and very little from washing.

When conditions prevent the farmer from hauling it direct to the fields, he should use care to prevent losses. Manure wastes in two ways—leaching and evaporation.

If carelessly left in the yard or in piles unprotected, a large per cent is lost by leaching and washing away. That liquid is just as precious as the golden grain in the bin, and, if it is lost, the land is deprived of its just portion of food.

JOHN DEERE MOWER

Main frame one solid, heavily ribbed casting; bearings all bored at one time, insuring perfect alignment. Large adjustable lifting spring carries weight of bar on wheels; no neck weight, and traction is increased. 21 point malleable clutch engages instantly, giving sure, positive drive and least possible friction. Simple arrangement of gears lessens friction, lightens draft, which means maximum power with minimum wear. Tilting rod is adjustable so cutter bar can be set for any kind of cutting. Heavy drag bar protects pitman and is easily adjusted for lining up cutter bar with pitman. Pitman straps are steel forgings. Sickle head extra large, strong and durable. Bevel pinion placed with large end to rear, preventing end thrust of pitman shaft. A John Deere requires few repairs.

No. 1—4½ ft. John Deere Vertical Lift Mower, weight 744 lbs. Price \$103.00

JOHN DEERE SELF-DUMP RAKE

Heavy angle steel frame, well braced. Notice front frame angle extends to extreme end of frame; wheels have malleable hubs, heavy reinforced renewable sleeve, wide channel tire protecting the 20 7/16 round staggered spokes; wheels are interchangeable to secure new ratchet wearing surface. The rake is made almost entirely of steel and malleable iron, the heavy wheel ratchets being Grey iron. ½-inch steel truss rod reinforces the rake head; impossible to sag in center. 1¼-inch axles, slightly bent to give wheels necessary pitch. Wheels can never tip in at top. ¾-inch dump rods; high grade steel, interchangeable and reversible, giving them four times ordinary wear. Hand lever regulates position of teeth, and locks rake head for transportation by simply operating lever latch. Regular tooth holders accommodate minimum or maximum number teeth for fine or coarse raking.

8 ft. John Deere Self Dump Rake, 20 teeth, weight, 405 lbs., Price \$54.50.

9 ft. John Deere Self Dump Rake, 24 teeth, weight, 440 lbs. Price \$57.50.

McCORMICK MOWERS AND RAKES

McCORMICK VERTICAL LIFT MOWER

Can furnish these mowers in five ft. and six ft. if desired. is easily raised to a vertical position while machine is in motion and the mower is automatically thrown out of or in gear as bar is raised or lowered. Two horse, $4\frac{1}{2}$ ft. Easy running and simple in operation. The bar of the McCormick vertical life mower mower, weight 725 lbs. Price, \$103.00.

McCORMICK RAKE

McCormick rakes have hand riveted hinges and frames. McCormick rake wheels will stand the strain and knocks of hills and stony ground. Spokes are staggered, hubs are removable, tires have 2-inch face, axle is cold rolled, bolted to head with $\frac{1}{2}$ -inch bolts, the flange prevents the hay wrapping about the hub. They are of great strength and stiffness and so carefully balanced that they are most easy to operate.

ONE HORSE 3½ FOOT VERTICAL LIFT MOWERS

Suitable for use among stumps and on small farms. Easy running and simple in operation. Cutter bar is raised to a vertical position from the driver's seat while in operation, throwing machine out of gear, stopping movement of the knife and saving highly speeded machinery from a great deal of wear.

McCormick New Little Vertical One Horse Mower, weight 560 lbs. Prices on application

THE McCORMICK HAY TEDDER

Above illustration shows the New McCormick Hay Tedder. The main frame is of heavy angle steel, solidly riveted; cannot twist and sag. Wheels have channel tires, spokes widely staggered. Forks are of high grade spring steel and are provided with coil springs, which prevent breakage when striking an obstruction. The crank shaft is driven by means of a gear wheel mounted on the center of the axle, and hence the full driving power of both wheels is imparted to each fork. All tedders have combination pole and shafts.

6-Fork McCormick Steel Tedder, weight 525 lbs. Price on application.

8-Fork McCormick Steel Tedder, weight 565 lbs. Price on application.

JOHN DEERE DAIN SYSTEM RAKE—LEFT HAND

Follow the mower with a Dain System Side Delivery Rake—you don't need to wait until practically all the meadow is cut, and besides, you get air-cured hay—hay that retains its natural color and richness. This is the hay that brings the best price on the market. The mower goes around the field turning to the right; therefore, the Dain System Side Delivery Rake has the following advantages over other rakes:

- a—It can follow the mower, thus working against the head of the hay.
- b—It places all the hay upon clean stubble out of the way of the mower.
- c—Turns a good square corner without bunching the hay undesirably.

d—Air-cures the hay. It delivers two swaths of grass upside down in a loose continuous windrow. Thus, air can pass through it freely, curing the hay evenly with no loss of coloring, and the hay is not sun-scorched. The slow, steady motion of the teeth rakes the hay without injury. Teeth can be adjusted to rake clean in either light or heavy hay. Ample clearance is provided for making large windrows that are straight and easily followed by the loader. Rake is furnished with one or two caster wheels, as desired. These help support the frame. Cushion springs on the caster wheel posts absorb the jar when working on rough ground, and these parts also provide adjustment for height of the reel. Main frame is made of square steel tubes, and a square tubular arch over the reel insures great strength for supporting the reel and at the same time makes the rake simple and easy to handle.

Each wheel helps to drive the working parts, except when turning. Then the wheel describing the greater arc furnishes the power. The teeth are rotated at sufficient speed all the time to keep the rake from clogging.

All Adjustments Can Be Made From Seat

This is accomplished by means of a convenient shifting lever. The teeth can be angled to accommodate heavy or light hay, and points of teeth can be raised or lowered to work over uneven meadow surfaces. Furthermore, the teeth can be lifted up and held nearly horizontal for transportation.

Rake is thrown in and out of gear by means of a convenient lever and is readily adjustable for raking beans.

Left main wheel can be set out to give more clearance in raking unusually heavy hay.

This Rake is one of the most profitable and necessary tools in the successful curing of hay in this climate. Send for our special circular.

John Deere Dain System Side Delivery Rake, weight 1000 lbs. 4 wheel -----\$154.00

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

JOHN DEERE DAIN HAY LOADER—The “One-Man” Loader

Puts hay so far forward on the wagon that only one man—the driver—is required. It is the most popular loader of the rake bar type because it handles the hay exactly right. Its rakes are operated at the proper speed to require the least power and yet rake clean. Strokes of the rakes overlap, practically raking the ground twice. Gathers hay from swath the full width of the machine, regardless of mower used, dividing the swath when necessary. Ground rakes quickly adjustable to any height desired so as not to gather the bottom trash. Instant change to windrow. The Elevator adjusts itself automatically to light and heavy hay. Adjustable throat opening and expansible deck prevent chocking. Converging side boards and elevating bars narrow the stream of hay at delivery point, preventing it from falling off the wagon, while the delivery action of the rake bars pushes hay toward front of wagon. The Dain does not pull or drag hay back off the load.

The Smooth Running Loader Mounted entirely on wheels. Rear wheels caster—there is no dragging around corners. Roller bearings are used on all main journals, and principal working parts are hammock-mounted. They swing back and forth freely. Wheels are directly under loader, securing a narrow tread. Loader can be operated close to fences and ditches and moved through ordinary gates.

Built to Last—The main frame of the Dain Rake Bar Loader combines lightness, stiffness, strength and flexibility. Steel is used for the principal parts and the whole is braced and trussed effectually. Both wheels drive the working parts. The straight chain drive is simple and reliable. Working parts of loader are easily thrown in and out of gear.

Universal coupling enables driver to uncouple loader without getting off the wagon.

John Deere Dain Hay Loader, weight 1000 lbs. -----\$176.65

Earle True Taper Grass Scythe, length 28 to 34 inches \$2.00.

American Scythe Snath, Select Bent Ash Body, Malleable Iron Fitting \$1.75

No. 90 Swivel Reversible Carrier

**NO. 90 NEY SWIVEL REVERSIBLE CARRIER
FOR 4x4 WOOD TRACK
Furnished with Iron Sheaves Only**

This carrier is constructed entirely of malleable iron; travelers and sheaves revolve on turned steel bushings, making it long-lived and easy running. Has large track traveler with wide tread, running easily and not roughing up track.

It is easily and quickly reversed from one end to the other in the barn.

Those desiring wood track carriers will find this one of the most simple and perfect carriers yet devised.

Single
Harpoon
Fork

No. 353—Double Harpoon Fork. is made of the very best steel. It is regular length tine, 25 inches. Weight 19 lbs. Price \$3.50.

No. 676—Double Harpoon Fork, extra long tine, 32 inches. Weight 32 lbs. Price, \$6.50.

Single Harpoon Hay Fork—This fork is too well know to need any description. Made of high grade material and will not get out of order. Single harpoon hay fork, regular length, weight 11 lbs. Price \$5.50.

Double Harpoon Fork

HAY KNIVES

NEY WAVING EDGE SERRATED HAY KNIFE

The easiest and fastest hay knife on the market. It will cut loose or packed hay, straw, peavines, etc., from the stack, mow or bale. Handles are adjustable to suit either hand. It is a favorite wherever used. **Ney Serrated Hay Knife. Price \$2.50.**

HAND KNIFE AND TOOL GRINDER

Is readily attached to the mower wheel by means of a thumb latch, which holds the grinder firmly in position. Grinds sections evenly from point to heel automatically and can also be regulated to grind out nicks or broken edges. Furnished regularly with one bevel stone for sickle grinding. Flat stone for tool grinding can be supplied extra.

Hand Knife and Tool Grinder with Bevel Stone.

Weight, 40 lbs. Price \$6.50.

EXPORT GRIST MILL

This is a new departure in the way of a hand grinding mill, and is not to be compared with those made on the old coffee mill principle.

The shaft is made of cold rolled steel, and the grinding plates are of the hardest metal to stand the greatest amount of wear, and when they are finally worn out they can be replaced at a small cost. Grinds 1 lb. of wheat a minute. Also grinds all other kinds of grain, separately or mixed, roots etc., fine or coarse, as desired. A valuable mill for the housekeeper, poultryman, farmer, druggist, etc. Hand wheel is 19½ inches in diameter. **Export Grist Mill, weight 23 lbs., \$7.00.**

RAPID CLOVER CUTTER

A Practical, Inexpensive Machine for Poultry Raisers.

The Rapid Clover Cutter is designed for cutting, either green or dry, such growths as clover, alfalfa, vegetable tops, etc., into ½-inch lengths. These growths are the cheapest and most productive egg-forming poultry foods for cold weather.

The feature that gives the Rapid easy supremacy over similar machines is the cutting mechanism. The machine can be kept in perfect cutting order at all times, because the cutter bar is easily accessible, and the four 7-inch spiral steel knives can be readily removed for sharpening. Those who are familiar with "ordinary" clover cutter construction will appreciate these improvements.

The Rapid is made only of iron and steel, from entirely new patterns. It is a strong feeder, has large capacity, runs unusually easy and will do perfect work. Length over all, 28½ inches.

Rapid Clover Cutter. weight 60 lbs., \$23.50.

HOCKING VALLEY CIDER MILLS

In the Hocking Valley Cider Mills are adopted the principles of the large hydraulic presses to a hand mill. The grinding device consists of a hardwood cylinder, revolving rapidly with serrated steel knives running lengthwise, which break down the juice cells and make a pomage that yields under the press every particle of juice in the fruit. A quart of water will clean it after using, an important feature of these mills is the absence of metal of any kind to rust and impair the quality of the cider. Hocking Valley Bantam Cider Mill weight 120 lbs. -----\$29.00

The two tub Hocking Valley Cider Mills are made in the following sizes, all having greater capacity than corresponding sizes of other mills. The Hocking Valley Junior, in capacity, almost equals the medium of other mills.

Junior Hocking Valley Cider Mill, with 10x10½-in. tubs, weight 175 lbs. Price -----\$42.00

Medium Hocking Valley Cider Mill, with 12x12½-in. tubs, weight 255 lbs. Price -----\$53.00

Senior Hocking Valley Cider Mill with 14x15½-in. tubs, weight 360 lbs. Price -----\$73.00
Pulley for medium or senior mills \$3.00.

HOCKING VALLEY JUNIOR CIDER MILL --

ROOT CUTTERS

The feeding of roots to stock is being practiced more and more in this country. Like various other foods, roots are more valuable and convenient to feed when cut or sliced, and the "Rapid" Cutter and Slicer, shown here, is an excellent machine for this purpose, with large capacity. It is simple and not liable to get out of order.

FIG 2

Description of Cutter—The three cutting knives on the fly-wheel follow closely after small projecting slicing or slitting knives, which cut at right angles to the edge of the cutting knives, thus reducing the material to a very nice condition for feeding. The hopper bottom is of slanting cast grating, which allows dirt, gravel or foreign matter to fall through and thus be kept separate from the cut feed.

Safety—The opposite side of the hopper is solid, and entirely covers up the fly-wheel and knives, so that children or others around the machine cannot come in contact with these parts.

For Hand or Power—The shaft is best cold rolled steel, with strong crank on one end and fitted for 4-inch face, 10-inch diameter pulley on the other. The frame is hardwood and strong, being bolted through at the legs with tie rods running clear through, capacity about 50 bushels per hour.

Fig. 2—Weight 190 lbs. Price -----\$36.00

Fig. 3—Same as illustration, with exception of having perforated iron hopper instead of wooden hopper. Weight 215 lbs. Pulper and slicer --\$39.50

NO. 7 BANNER ROOT CUTTER The Poultryman's Friend

Vegetable Cutter—Will furnish green food during the winter for poultry and will cut potatoes, turnips, beets, carrots, apples, etc., in long shaving-like strings, readily eaten by your chickens.

No. 7—Banner Root Cutter, weight 50 lbs. \$9.50

FEED CUTTERS AND GRINDERS

No. 6 Geneva Feed Cutter

GENEVA POULTRY

FEED CUTTER

The Geneva Feed Cutter is carried for the accommodation of those of our patrons who prefer a cutter with the knives on the balance wheel. The knives are straight, flat and of best quality steel, easily adjustable to the shear bar. Can be removed, ground and replaced with ease. Cuts $\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, 1 and $1\frac{1}{4}$ inch. It is a perfect hand cutter. The simple construction makes it very easy to operate by hand. Every part of the machine is strong and well built. Can be used by power if desired.

No. 6—Geneva Poultry Feed Cutter with two 9-in. knives, weight, 190 lbs. -----\$52.50

No. 8—Geneva Poultry Feed Cutter, with two 10-in. knives weight, 225 lbs. -----\$57.00

No. 10—Geneva Feed Cutter, with two knives, lever to throw out of gear and reverse rollers; wt., 260 lbs. ---\$65.00

Can furnish power pulley.
We can supply larger Geneva Cutters.

PRINCIPAL FEATURES OF THE NO. 4 GRINDER

The Grinding plates in this grinder are of the single face type and differ somewhat in design from the plate furnished with No. 8 and No. 10. Like the larger sizes the No. 4 is a very efficient grinder and has the following features which make it particularly suited for the class of work for which it is offered.

Forced Feed.

Large Grain Hopper

Self-Aligning Plates.

Long Bearings

Large Shaft—one inch in diameter

Grinding Plates—four inches in diameter

Grinder Pulley—four inches diameter, four inch belt width.

Capacity—This grinder requires from 1 to $1\frac{1}{2}$ H. P. to operate it at a speed of from 500 to 750 R. P. M. The capacity of the grinder is from 1 to 3 bushels per hour. It will crack corn, if the grain is dry, at the rate of from 3 to 8 bushels per hour. The weight of the grinder is approximately 30 pounds.

Type B Feed Grinder, \$13.00.

PAPEC ENSILAGE CUTTER

The arrangement of the knives, cutting wheel and drum all supported in a one-piece semi-steel frame without joints of any kind, insures permanent alignment of the cutting mechanism, which means good clean ensilage of uniform size. Special parts for cutting long lengths can be furnished at small additional cost.

CAPACITY—The capacity of any ensilage cutter depends upon the length of cut, amount of power and condition of corn or other crop to be cut. Papec Cutters are guaranteed to cut and elevate AT LEAST one ton of green corn silage per hour for each horse power applied. The capacity on green alfalfa is about one-third as much as on green corn.

POWER—The power required to operate a Papec is from 20 to 33½ per cent less than for any other blower cutter doing the same work. Many of our 10- and 13-inch cutters are satisfactorily operated by small gasoline engines varying in size from 3 to 6 horse power.

SPEED—Beware of cutter operating at high speed as they are not only dangerous but consume an enormous amount of power, and power costs money. The Papec is guaranteed to elevate perpendicularly to the height of any silo at low speed—600 R. P. M. Furthermore, the cutting wheel is practically indestructible. It is made of semi-steel and reinforced on the rim by a heavy steel band which insures absolute safety.

CONVENIENT TO OPERATE—FED FROM GROUND

The feed table on the Papec is not only the right height to feed comfortable from the ground but is permanently assembled, does not have to be removed or folded when moving the cutter from one silo to another. The cutter is belted crosswise of the ground wheels, thereby doing away with the "jiggling" motion that is so disagreeable on some other makes of machines.

EASY TO SET UP AND TAKE DOWN

The Papec, when located, is ready for business as soon as the pipe is set up. The feed table does not have to be removed or propped up out of the way. There is nothing to remove or put together but the pipe. No other cutter can be set up and taken down so quickly.

ALL CUTTERS THOROUGHLY TESTED

All cutters are thoroughly tested at the factory in a special department maintained for this purpose. Each and every cutter is operated at a speed of from 1050 to 1200 R. P. M., or nearly 50 per cent greater than our maximum for actual use. By feeding in proportion to the power at hand the operator will find the Papec an eminently satisfactory cutter.

FAIRBANKS-MORSE "Z" ENGINES

1½ H. P. "Z" Type Engine

The Fairbank Morse "Z" Type Engines are made in three sizes—1½, 3, and 6 H. P. These Engines are equipped with the Bosch High Tension Oscillating Magneto—the highest grade ignition system known. This is the same magneto that is used on the highest priced automobiles of today—both stock and racing cars. It gives to your "Z" engine an intense, efficient, penetrating, synchronized spark—reliable, steady, unaffected by atmosphere or continuous usage. It is of master design—scientific, self-contained, simple, rugged—built of best materials by expert workmen. It is the magneto you can depend upon—simply oil it and forget it.

You simply cannot get more engine value per dollar than you get when you buy these engines. They are built especially to use kerosene, distillate, coal oil, tops and other cheaper fuels as well as gasoline. Fix this in mind. The "Z" engines are not gasoline engines built over for kerosene—they are not gasoline engines with kerosene attachment. They are real kerosene engines that will use gasoline as well. Here's where you get your economy—these engines use kerosene so successfully that you get the same power from a gallon of kerosene as from a gallon of gasoline—and you save the difference in cost.

The "Z" Engines have other very important and distinct features such as—

Throttling governor assures constant, reliable power. It makes the engine run smoothly.

Suction fuel feed—no pump—simple and reliable.

Convenient speed controller gives change of speed, if desired, while engine is running.

Removable bushings in bearings.

Close speed regulation.

Ample positive lubrication.

Practically automatic in operation, requiring but little attendance—easily started and stopped. Run smoothly, quietly, cleanly.

Furthermore, every bit of metal in these engines is effectively used to give greatest strength without excess weight. The crank shaft is of forged steel with extra large bearing surfaces—it is built for long life. The interchangeable die-cast liners in main and crank bearings are easy for you to replace if necessary. Need but little floor space—simple foundation.

Fairbanks-Morse Quality throughout.

FAIRBANKS-MORSE HOME WATER PLANT

AUTOMATIC

The very heart—the real basis—of all sanitation is running water. And sanitation is necessary to health, as all physicians will tell you.

The Fairbanks-Morse Home Water Plant brings sanitation and health to your home. Besides, it ends the drudgery of hand-pumping and carrying water in sloppy buckets. The plant operates from any light socket or home lighting plant circuit.

Pumps from spring, cistern, shallow well, stream or lake, UNDER PRESSURE. Noiseless.

PRESSURE AUTOMATICALLY maintained. ENTIRELY automatic—no adjusting. Not even a switch to turn. Has galvanized steel tank and famous Fairbank-Morse quality pump. FRESH WATER IS NEEDED FOR HEALTH and for a happy, comfortable home. Costs only a few cents a day to operate.

Home Water Plant with 35-gallon Tank, Capacity 200 gallons per hour, price	\$140.00
Home Water Plant with 70-gallon Tank, Capacity 200 gallons per hour, price	156.50

DEEP WELL AUTOMATIC WATER SYSTEM

AUTOMATIC PRESSURE TANK SYSTEM

Where the water supply is more than 22 feet below the surface, the shallow well outfit cannot be used and it is necessary to install a deep well water plant.

The Fairbanks-Morse Home Water Plant for deep wells is particularly suited for installations of this character. The pump head, in addition to lifting the water out of the well, will discharge against a pressure as high as 40 lbs., which is equivalent to raising the water 80 feet (including friction in the discharge pipe), above the pump.

This system is automatic. The two-pole automatic pressure switch which is regularly furnished with this equipment, will start the pump when the tank pressure falls to 20 lbs., and stop it when the tank pressure rises to 40 lbs. This is the standard adjustment, though the switch may be set to operate on any 20-lb. range below the maximum against which the pump is designed to operate, namely 40 lbs.

The Standard Automatic Pressure Tank System includes the regular pump head equipment which consists of the pump head, motor, well cylinder, pressure cylinder, discharge valve and sucker rod coupling ($\frac{1}{2}$ "-12 threads x $\frac{7}{16}$ "-12 threads and $\frac{3}{8}$ " pipe thread), and in addition, the following:

1. Air compressor attachment, mounted on pump.
2. Two-pole automatic pressure switch, set to close at 20 lbs. pressure and open when the tank pressure has reached 40 lbs.
3. Pressure relief valve with fittings to attach, to guard against accident from over pressure.
4. Galvanized tank with pressure guage, gauge glass and fittings. (The tank has two $\frac{3}{4}$ " threaded openings.) The standard outfit numbers cover a 70 gallon tank with the $\frac{1}{2}$ H. P. plant. No. pump-to-tank piping is included. Pipe for well not furnished at price.

$\frac{1}{2}$ H. P. PLANT

70 GAL. TANK

Maximum Lift in Feet	Capacity in Gals. per Hour	Size of Well Cylinder		Inside Diam. of Pressure Cylinder	Drop Pipe Recom- mended	With 110-220 Volt 60 Cycle Motor		With 32 Volt D. C. Motor	
		Inside Diam.				Outfit No.	Price	$\frac{1}{2}$ -H. P.	70-Gal.
155	95	1 $\frac{3}{8}$ "	3 $\frac{3}{16}$ "	1 $\frac{5}{8}$ "	1 $\frac{1}{2}$ "	6000-A	\$295.25	6100-A	Dough
110	165	1 $\frac{13}{16}$ "	2 $\frac{11}{16}$ "	2 $\frac{1}{16}$ "	2"	6001-A	\$298.25	6101-A	Doura

In addition to the above specifications, it will be necessary to add for well pipe and pump rod for depth of well.

PUMPS

PITCHER SPOUT CISTERN PUMPS

Pitcher Spout Pump

No. 7 ROUND SPOUT CISTERN PUMP

This pump has a bolted fulcrum cap and round spout. It has a 3-inch bored and polished iron cylinder, and is tapped for 1½-inch iron pipe. Weight 35 lbs. Price \$5.00.

NOTE—We stock different types of pumps that are not given here.

These well-known pumps are suitable for cisterns and shallow water. Revolving stand enables handle to be turned in any direction. By raising handle to full height valves are tipped and prevented from freezing. They are made of good material and with all modern improvements attached.

No. 2—3 -in. cylinder ; fits 1¼ -in. pipe; price \$3.50

No. 3—3½ -in. cylinder; fits 1½ -in pipe; price 3.90

No. 4—4 -in. cylinder; fits 1½ -in. pipe; price 5.00

CUP AND VALVE LEATHERS

We carry all sizes from ¾ inch up to 5 inch diameter, in our stock. Both solid and ring type.

No. 67 Buckeye House Force Pump—They are made for wells up to 20 feet in depth. The spout is provided with hose attachment to be used for sprinkling or fire protection. The body, or air chamber is provided with an extra outlet for attaching pipe leading to a tank. The handle can be swung around to any position for convenience of operator. Made with either polished iron or brass body cylinder.

No. 67 with 3-inch Iron Cylinder. Price \$10.00.

No. 67 with 3-inch Brass lined Cylinder. Price \$12.25.

FORCE PUMPS—Continued

No. 75 Pump Standard

The No. 75 Pump Stand makes a very satisfactory force pump for either hand or power use, in wells of reasonable depth. The piston rod is 1-inch diameter. The fulcrum cap is held in place by bolts and is quickly removed, thereby allowing the plunger of a deep well cylinder to be drawn up without disturbing pipe or pump stand.

The standard is tapped for 2-inch suction pipe and 1½-inch discharge pipe. Furnished with hose connection and a 1½-inch and 1¼-inch bushing.

No. 75 Force Pump Standard with Cock in Spout, weight 80 lbs. Price \$16.00.

We stock all sizes of iron brass lined, and all brass cylinders for No. 75 Standard. We also stock pipe, iron and hardwood pump rod.

Write us for prices.

Fairbanks-Morse Typhon Pump DOUBLE ACTING

These pumps are especially designed for use in mills and factories; also for use by market gardeners, farmers and ranchmen, as they are suitable for fire protection, drainage or irrigation. They are geared back in the proper ratio to secure best results for each size.

They are compact and easily accessible. They have a single cylinder lined with heavy brass tubing so it will not corrode or become rough, thereby cutting out packing of the piston. The piston rod is made of steel for strength, but covered with brass to prevent corrosion and consequent wear of the stuffing box packing. Any or all valves can be removed for inspection by simply loosening two nuts which allows the removal of two yokes and four valve covers, permitting free access to all valves without disturbing any other parts of the pump. All pumps are regularly fitted with rubber valves, but if the nature of the service requires, can be fitted with brass

valves. Valve seats are of brass and screwed into the valve decks, similar to the construction of large, heavy duty pumps. All bearings are babbitt lined and gears are machine cut, insuring quiet running and durable pumps. Each pump has an air chamber of sufficient size to insure uniform flow from the discharge which can be turned to any quarter, as desired. The pistons are packed with cup leathers, except sizes 2x3 and 2½x5, which are designed to pump against 200 pounds pressure, these have pistons packed with square Flax packing.

DOUBLE GEAR PUMP JACK

This double gear pump jack meets the demand for an extra strong jack for deep well work. It measures 13 inches between the large gear wheels, which especially adapt it for use with 3 way pumps. Made with double gears $1\frac{1}{2}$ inches wide, machine cut; wrist pins are 1-inch hard steel, shafts $1\frac{1}{2}$ inch drawn steel keyed to gears; side arms are of wood. The cross head is extra strong, made with a ball and socket joint to attach to pump rod. Pulleys are 12 inches in diameter with 3 inch face. Two strokes 6 and 9 inches. Back geared 6 to 1.

No. 426 Double Geared Pump Jack, weight 110 lbs. Price \$22.00.

Handy Pump Jack

The Handy Jack is furnished with a clamp by means of which you can easily attach it to any ordinary wind mill pump standard. It is double back geared and adapted for the heaviest work that should be put on any ordinary wind mill pump. The bearings of the Handy Pump Jack have large removable babbitt bushings which can be replaced when worn, and is supplied with compression grease cups for good, steady lubrication.

Handy Pump Jack—

PATENT NON-SHRINKING WATER TANKS

With Round Steel Hoops and Register

Made with a deep channel or groove in the top of the staves, which is filled with water from the patent cup outlet on the supply pipe, placed right over the edge of the tank. By keeping this groove full of water at all times, the staves are kept moist from top to bottom, whether the tank is full or only one inch of water in the bottom, and thereby shrinkage and leakage are prevented on these tanks.

All hoops are constructed of round milled steel with a tensile strength of 60,000 pounds per square inch, and all hoops are fitted with malleable iron adjustable lugs. Each section of hoop has a thread about five inches long on each end, which enables the tightening of the hoops in both directions. This is a great advantage over the flat hoops, which have to be driven, a job that is not very easily accomplished, or over the round hoops, where the different sections are fitted with a square head on one end, because such hoops only draw in one direction, and the hoops are always subject to an unequal tension.

PAINTS

Sun-Proof house paint is designed especially to resist extreme weather changes. If properly applied it will not crack, chip, peel or deteriorate in any other way. Patton Sun-Proof Paint will cover more surface, gallon for gallon, than any ordinary mixed paint. The pigments are ground extremely fine and therefore sink in and grip the surface of the wood, thus holding tighter and lasting longer. Made in 32 distinct colors.

Outside white, Kentucky green and Copper Verde, 5 gallons, \$4.15 per gallon; 1 gallon, \$4.20; ½-gallon, \$2.20; ¼-gallon, \$1.20; ⅛-gallon, 65c.

Inside White and all colors, 5 gallons, per gallon, \$4.00; 1 gallon, \$4.05; ½-gallon, \$2.10; ¼-gallon, \$1.10; ⅛ gallon, 60c.

PORCHITE PAINT

Patton's Porchite is especially manufactured for exterior use on surfaces subjected to wear, such as Porch floors, Boat decks, etc. It is exceedingly tough and elastic, and it is not affected by snow, rain, or sun, and colors will remain permanent. Made in 5 selected colors. Price per gallon, \$4.05; ½-gallon, \$2.10; ¼-gallon, \$1.10.

PATTON'S FLOORHIDE ENAMEL

Patton's Princess Floorhide is made especially for the protection and decoration of interior floors, whether cement, concrete, or wood. It is a varnish paint and dries with a nice gloss. Send for color card and complete information on the use of Patton's Floorhide. Made in 8 colors. Price per gallon, \$3.65; ½-gallon, \$1.90; ¼-gallon, \$1.00.

PATTON'S VELUMINA

Velumina is an OIL FLAT WALL Paint that gives the wall of your home a delicate velvet-like color. Velumina is washable and therefore it saves the cost of frequent re-decorating. It can be repeatedly washed and after each washing the color will be restored to its original brilliancy and cleanliness.

With Velumina you can produce very artistic interiors. Some of the largest buildings in America are finished with it. The Woolworth building for example. Made in white and 16 different colors. Price per gallon, \$3.70; ½-gallon, \$1.90; ¼-gallon, \$1.00.

PAINTS AND VARNISHES

PATTON'S AUTO GLOSS

It is easy to refinish your car with a brush and a can of Auto Gloss; and a dollar or two spent for Auto Gloss makes your car worth \$100.00 more. AUTO GLOSS dries with a smooth, hard, mirror-like finish that is unaffected by the weather or flying grit from the road. It will resist bumps and knocks remarkably well. This elasticity means that even though a car is dented the varnish will not crack. PATTON'S AUTO GLOSS is made in 16 different shades.

Navajo and Chassis Red, Price for ¼-gallon, \$2.25; ½ gallon, \$1.20; 1/16-gallon, 70c; 1/32-gallon, 40c.
 Black and Clear, Price for ¼-gallon, \$1.75; ½-gallon, 95c; 1/16-gallon, 55c; 1/32-gallon, 30c.
 All other colors, Price for ¼-gallon, \$2.00; ½-gallon, \$1.10; 1/16-gallon, 60c; 1/32-gallon, 35c.

WATERSPAR VARNISH

The water-proof, sole-proof varnish. Why scrub your floors when you can clean with a damp cloth? Waterspar Varnish applied to the floor makes scrubbing unnecessary as well as giving a very firm, durable finish that you will be proud of. A coat of Waterspar on old furniture will make it look like new—a new set of furniture with the price of a can of Waterspar. We also make FLOORSPAR for floor, Linoleums, and of same high quality as Waterspar.

Water or Floorspar, per gal., \$5.75; ½-gal., \$3.05; ¼-gal., \$1.60; ⅛-gal., 90c; 1/16-gal., 50c

Now isn't that a welcome surprise

PITCAIRN Sole-Proof Colored Varnishes

and tough that it can be hammered and

PITCAIRN WATER SPAR

This line includes:

- 7 transparent colored varnishes.
- 1 clear finish varnish.
- 8 opaque enamels.
- 1 dull black enamel.
- 1 gold bronze.
- 1 Aluminum bronze.
- 1 white and 1 colored undercoater.

Here you will find a product suitable for every household need. Pitcairn Sole-Proof colored varnishes cover a large amount of surface, producing a clear and brilliant finish that will give long service. The finish dries so hard

and tough that it can be hammered and abused, yet remain firm and unbroken.

For Water Spar Transparent, Dark Oak, Light Oak, Walnut, Cherry, Flat and Gloss Black, Mahogany, Dark Mahogany and Vernal Green: Prices, 1-gal., \$5.75; ½-gal., \$3.05; ¼-gal., \$1.60; ⅛-gal., 90c; 1/16-gal., 50c; 1/32-gal., 30c.

For Ivory, Pearl Grey, Pale Blue, Fern Green, Gloss White, Rich Cherry: Prices, 1-gal., \$6.50; ½-gal., \$3.40; ¼-gal., \$1.80; ⅛-gal., \$1.00; 1/16-gal., 55c; 1/32-gal., 30c.

For Ground Color, and Flat White, 1-gal., \$4.50; ½-gal., \$2.40; ¼-gal., \$1.30; ⅛-gal., 75c; 1/16-gal., 45c; 1/32-gal., 25c.

Graining Sets—Do your own graining—Price, 60c each.

PITCAIRN WOOD STAINS

Pitcairn Wood Stains are suitable for use on any woods, close or open grained. The more beautiful the wood the more pleasing the effect. One gallon will cover from 800 to 1000 square feet surface. Pitcairn Wood Stain is an oil stain and may be had in 10 different colors. Write us for prices. Wood stain color samples mailed on request.

PITCAIRN TECTOR

THE RIGHT FOUNDATION

Pitcairn Tector cannot be classed with any other undercoat material. It is nothing less than a wonderful paint discovery. We want to tell you more but owing to lack of space we cannot. Write for free booklet on Tector. Will mail on request.

THE GREAT UNDERCOATER

Pitcairn Tector, Urice, 1-gal., \$4.00; ½-gal., \$2.15; ¼-gal., \$1.20; ⅛-gal., 70c.

INDUSTRIAL BUILDING AND BARN PAINT

Made especially for warehouses, factory buildings, elevators, BARNS, roofs, either metal or wood and all exterior painting where a good, durable and economical paint is required. Has greater covering capacity than ordinary paints or those mixed by hand. There are 6 clear toned colors from which to select.

Industrial Building Paint in Red or Brown, 1-gal., \$3.00; ¼-gal., 90c.
Industrial Building Paint, Yellow, Gray, Green, 1-gal., \$3.50; ¼-gal., \$1.00.
On orders of 5 gallons of one color, reduction of 5c per gallon.

BANZAI ENAMEL

1. Best body. 2. Best covering. 3. Best flowing. 4. Whitest white, 5. Most brilliant. 6. Greatest durability.

The 6 points as given are absolutely true of Banzai Enamel and means in addition, the surety of smooth drying finish which make for ease in cleaning. Can be tinted for making any light shade, whether Ivory, Grey, Green, Brown, etc.

Banzai Double Cover Undercoater, pre gal., \$6.25; ½-gal., \$3.30; ¼-gal., \$1.75; ⅛-gal., 95c.

Banzai Enamel Egg Shell, per gal., \$9.00; ½-gal., \$4.65; ¼-gal., \$2.45; ⅛-gal., \$1.30; 1/16-gal., 70c.

Banzai Enamel Gloss, per gal., \$9.00; ½-gal., \$4.65; ¼-gal., \$2.45; ⅛-gal., \$1.30; 1/16-gal., 70c.

VARNISH REMOVER

Pitcairn Varnish Remover, 1-gal., \$2.50; ½-gal., \$1.35; ¼-gal., 70c; ⅛-gal., 40c; 1/16-gal., 25c.

We stock a large assortment of BRUSHES both for painting and varnishing. Owing to lack of space we are unable to list them here. Prices and quality are right.

LEAD, OILS, TURPENTINE

Dutch Boy White Lead, 1 lb., 20c; 5 lbs., 12½ lbs.; 25 lbs.; 50 lbs.; 100 lbs.

Orders for White Lead filled at market price the day received.

Raw Linseed Oil—Any quantity from 1 quart to 100 gallon—Market price.

Boiled Linseed Oil—Any Quantity from 1 quart to 100 gallons—Market price.

What Do Your Walls Say?

No one believes that "walls have ears," but it is a fact that they talk.

A wall can say "restfulness, sanitation, beauty, durability"—and it can say other things not so flattering!

Velumina

The Oil Flat Wall Paint

brings out the best points of wall decoration and would give your home an atmosphere you would appreciate—and so would your friends.

Velumina is a practical paint, made with an Oil Base, and this means permanence. A Velumina wall can be washed, so it is easily kept clean and sanitary.

Let us show you color schemes and post you on the latest developments in interior house decorations.

Our Mr. John W. Jones will do all that is possible to assist you, Just ask.
